

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**

(Deemed to be University under section 3 of the UGC Act 1956)

**FACULTY OF ENGINEERING AND TECHNOLOGY**

**DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING**

**CURRICULUM**

**AND**

**SCHEME OF EXAMINATION**

**(B.TECH IN COMPUTER SCIENCE & ENGINEERING)**

**BATCH: 2021-25**

## **FOREWORD**

This is to certify that this booklet contains the entire Curriculum and Scheme of Examination of B.Tech(Computer Science and Engineering) being offered at the Faculty of Engineering and Technology(FET) of this University. This has been duly vetted and finally approved by the Academic Council of the University vide its 37<sup>th</sup> meeting held on 2<sup>nd</sup> July 2021 and changes, if any deemed appropriate, shall be duly incorporated after the necessary approval by the Academic Council.

This Curriculum and Scheme of Examination of B.Tech (Computer Science and Engineering) shall be implemented w.e.f. AY 2021-22.

**Date:**

**Prof. (Dr.) Naresh Grover  
Dean-Academics, MRIIRS**

MRIIRS

**Preamble:**

The Department of Computer Science & Engineering (CSE) focuses on mastering the fundamental concepts both theoretically and practically. The curriculum for the course is geared towards regional, national, and global needs. Keeping in view the growth in industry and increasing demand for computer professionals, some industry associated courses like Mobile Application Programming Using Android, Python, Web development, R programming, Grid Computing, Cloud computing, WEKA, Go Language, SWIFT, Kotlin, Blockchain Technology, Internet of Things, and Machine Learning are also included. The courses like professional communication, Quantitative Aptitude and Personality Development, Industrial projects, and Internships facilitate students to cope up with the industrial environment. The course has been designed specifically to address the rising global outlook and focuses on upcoming technologies in the field of Computer Science and Engineering. This aims to cater to the needs of the industry and R&D organizations. Students also practice research by studying Research & Innovation Catalyst (RIC) in different semesters. The curriculum includes Environmental Studies, Constitution of India, Cyberlaw & Ethics. Students get the opportunity to learn various foreign languages French, German, Spanish for their global needs. Also, there is a provision to opt for various MOOC courses.

Curriculum also illustrates the categorization of Regional, National, and Global courses. Courses like Chemistry, Physics, Mathematics, etc. are under the Regional category, courses like Programming for Problem Solving, EVS, etc. are under the National category and the courses like Professional Communication, Machine Learning, etc. fall under the category of Global.

For providing the latest technology updates to the students, regular interactions are in practice with Information Technology organizations like TCS, IBM, Sun Microsystems, L&T, Infosys, HCL, Tech Mahindra, Dell-EMC, R Systems International, etc. The Department has collaborated with IBM to jointly deliver B.Tech (Computer Science & Engineering) programmes with a specialization in Cloud Computing, Business Analytics & Optimization, Cyber Security & Forensics, and Graphics & Gaming. Approximately 25 percent of the credits shall relate to the specific specialization in a particular programme.

The curriculum enumerates Employability, Skill Development, and Entrepreneurship. Courses like Object-Oriented Programming, Database Management Systems, etc. focus on Employability. Courses like Artificial Intelligence, Machine Learning, etc. emphasize Skill Development. Courses like Summer Internship-II, Project, etc. focus on Entrepreneurship. The program provides the distinct categorization on Environment and Sustainability, Professional Ethics and Human Values like EVS, Professional Communication, Cyberlaw & Ethics, etc.

MRTIIRS

## **VISION OF THE DEPARTMENT**

To empower the graduates to be technologically adept, innovative, self-motivated and responsible citizens, possessing human values and contribute significantly towards being a center of excellence in providing globally standard education, through a conducive Teaching and Research environment, that responds swiftly to the challenges of the ever changing world.

## **MISSION OF THE DEPARTMENT**

- To achieve academic excellence by imparting in-depth knowledge to the students through effective pedagogies and hands-on experience on the latest tools and technologies.
- To pursue interdisciplinary research that will serve the needs of the entire global community.
- To prepare students to be continuous learners in a connected world and imbibe professional skills and ethical responsibilities in them.
- To strengthen the Industry-Academia interface that will help the graduates to emerge as leaders in academics or an inspiring revolutionary in entrepreneurship.

MRTRRS

## **ABOUT THE DEPARTMENT**

The Department of Computer Science & Engineering was established in 1997. The B. Tech Computer Science & Engineering programme offered by the Department had been accredited thrice by the National Board of Accreditation (NBA) in 2003, 2007, and 2018. The Department focuses on mastering the fundamental concepts both theoretically and practically. It motivates for learning, intellectual efficacy, and self-reliance, which provides the best foundation for continuing professional achievement. Master of Technology in Computer Engineering programme provides intensive training to the students at an advanced level to enable them to take up research and development activities. The course curriculum has been specially tailored to fulfill the growing global outlook and focus on upcoming technologies in the field of Computer Science and Engineering to cater to the needs of the industry and R&D organizations. The Faculty members of the Department are actively involved in research and development activities and continuously participating and contributing to National and International Conferences and Seminars. The faculty members of the Department are well published, experienced, conferred with M. Tech/Ph. D degree.

The Department is having several student chapters of the professional bodies like IEEE, CSI, ACM & ISTE. Students are participating in various activities regularly to enhance their technical and interpersonal skills under the banner of these professional societies. The Department also interacts regularly with Information Technology organizations like TCS, IBM, Sun Microsystems, L&T, Infosys, HCL, Tech Mahindra, Dell-EMC, R Systems International, etc. for providing the latest technology updates to the students.

MRIIRS has collaborated with IBM to jointly offer B.Tech-Computer Science & Engineering programmes with a specialization in Cloud Computing, Business Analytics & Optimization, Cyber Security & Forensics, and Graphics & Gaming. The subject matter experts from IBM technology teach the faculty members about the cutting edge technologies through 'Train the Trainer' programmes. IBM provides Learning Management System, Industry Projects for students, Expert Lectures, Industry connectivity for students & teachers to enable them to experience the live IT environment. This partnership help students to acquire domain skills in the most advanced areas of IT and preferential placements by IT companies. Students enrolled in these programmes have access to an online Eco-system Platform namely Innovation Center for Open Standards enabling them to access course material, discussion forums, student projects, industry mentors, and news-clips.

Students enrolled in these programs undertake live projects developed by IBM/other IT majors under the mentorship of industry experts and go for industry visits in software development and testing centers. They also attend a one-week extensive training programme at Bangalore in IBM facilities at their cost in which hands-on training is provided by IBM and other IT company experts. IBM shall also issue certificates for various modules after successful completion in addition to the MRIIRS Degree. The Programmes in association with IBM lead to a big increase in job opportunities and industry readiness for the students.

Approximately 25% of the credits shall relate to the specific specialization in a particular programme and replace certain courses covered under normal B. Tech CSE Programmes.

The Department has also collaborated with other leading industries to give exposure to the students. TCG Digital solutions private Limited will set up a virtual Cyber Security platform lab for training the students in the area of cybersecurity. The Department also has collaborations with Infosys, Dell-EMC & R-Systems International Ltd. These collaborations help the students to work on the technologies which are currently being used in the industry.

## **PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)**

The Department of Computer Science and Engineering (CSE), in consultation with various stakeholders, has formulated the Programme Educational Objectives (PEOs). These are broad statements describing the career and professional accomplishments of the graduates, that the programme is preparing them to achieve, after receiving the degree. The PEOs of the B. Tech Programme in Computer Science and Engineering are as follows:

**PEO-1:** To prepare the graduates for a successful career in industry, consultancy, teaching and allied areas related to the subjects of Computer Science and Engineering.

**PEO-2:** To assimilate the graduates with team-spirit, leadership and problem-solving skills so they can lead organizations they join or initiate their own ventures.

**PEO-3:** To prepare and assist the graduates to be successful in higher education leading to Masters and Research programmes, thereby creating and disseminating knowledge through research activities in the theory and application of computing.

**PEO-4:** To groom the graduates as professional engineers with an understanding of professional and ethical responsibilities, enabling them to contribute effectively to the growth and development of a body of knowledge.

**PEO-5:** To instill the ability to analyze the requirements, understand the technical specifications and design the innovative solutions by applying the principles of computing.

## **PROGRAMME OUTCOMES (POs) - Engineering Graduates will be able to:**

1. **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## **PROGRAMME SPECIFIC OUTCOMES (PSOs)- Engineering Graduates will be able to:**

1. **Legacy Software:** Upgrade and maintain legacy software systems by using modern techniques, programming skills, and tools.
2. **Development of Software Systems:** Develop, test and maintain Software systems for business and other applications, that meets the automation needs of the society and industry.
3. **Research and Development:** Cultivate the field of computing and its latest trends, to pursue teaching, research & development activities and to work effectively in a team.

## **MAPPING OF PROGRAMME EDUCATIONAL OBJECTIVES TO PROGRAM OUTCOMES**

<b>POs</b>	<b>PO 1</b>	<b>PO 2</b>	<b>PO 3</b>	<b>PO 4</b>	<b>PO 5</b>	<b>PO 6</b>	<b>PO 7</b>	<b>PO 8</b>	<b>PO 9</b>	<b>PO 10</b>	<b>PO 11</b>	<b>PO 12</b>	<b>PSO 1</b>	<b>PSO 2</b>	<b>PSO 3</b>

<b>PEO 5</b>	3	3	3	3	3	1	1	1	2	2	1	2	3	3	3

## **Semester system and Choice Based Credit System (CBCS)**

A credit-based system of study and students' performance/progress is measured by the number of credits that he/she has earned, i.e. completed satisfactorily. Based on the course credits and grades obtained by the student, the grade point average is calculated.

### **(a) Course credits assignment**

Each course has a certain number of credits assigned to it depending upon its duration in periods for a lecture, tutorial, and laboratory/clinical practice in a week. A few courses/activities are without credit (s) and are referred to as Audit Pass Courses (APC) but are mandatory to pass as partial fulfillment of the award of a degree.

### **(b) Earning of Credits**

At the end of every course, a letter "Grade" shall be awarded in each course for which a student has registered. On obtaining a minimum Pass Grade, the student shall accumulate the course credits as Earned Credits. A student's performance shall be measured by the number of credits that he/she has earned and by the weighted grade point average. Grades obtained in the audit courses shall not be counted for computation of grade point average, however, shall be mandatory to pass as partial fulfillment of the award of a degree.

For the Award of Degree of a Programme B.Tech in Computer Science and Engineering, he/she has to earn a minimum of 160 credits during the 4-year duration of the programme in 8-semesters. The total credits required to be earned have been further classified under two baskets of courses: "Compulsory Courses Basket (CBB)", and "Elective Courses Basket (ECB)". A total of 122.5 credits are required to be earned under CBB and 37.5 credits under ECB.

All courses under CBB are required to be qualified and cleared/pass by every student enrolled under the programme and are semester-wise listed in the study scheme along with the credits assigned to each course.

Under Elective Courses Basket (ECB), there will be three types of courses:

- Semester-wise courses offered by the department itself
- Open/Inter-disciplinary courses offered at the Institute/University level notified from the office of Dean-Academics.
- Massive Open Online Courses (MOOCs) available on Study Webs of Active-Learning for Young Aspiring Minds (SWAYAM) Platform or any other platform as recommended by UGC/AICTE and notified from the office of Dean-Academics.

Each course shall have credits assigned to it. The student shall be required to register courses every semester for as many courses/credits specified under the "Elective Courses Basket" depending upon his/her interest, capability/pace of learning, and availability of time slot (without any clash in time table) to earn all required total credits under the "Elective Courses Basket" during the entire programme duration.

However, for registration of courses [including courses under "Compulsory Courses Basket", "Elective Courses Basket" and Previous Semester Courses (wherein he/she was declared ineligible based on attendance or he/she could not clear the course within permissible given chances)], if any, the maximum limit in a semester shall be 30 credits.

# **SEMESTER – I**

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BPH-106: PHYSICS FOR ENGINEERS**

Periods/week Credits

L: 3 T:0 3

Duration of Examination: 3 Hrs

Max. Marks : 200

Continuous Evaluation : 100

End Term Examination : 100

**Pre-requisite: Basic knowledge of 10+2 level Physics**

**Course Type: Basic Sciences**

**Course Outcomes:** The students will be able to:

BPH-106.1 discuss and explain the key concepts and principles of quantum physics, lasers and optical fibres

BPH-106.2 apply the basic concepts of semiconductors and devices based on them

BPH-106.3 analyze the structure, characterization techniques and applications of advanced material.

BPH-106.4 recall the basic concept of electromagnetism and understand their applications to the theory of electromagnetic waves.

**Unit-1 Semiconductors (8 Lectures)**

Physical properties of semiconductors, direct and indirect band gap semiconductors, compound semiconductors, organic and inorganic semiconductors, Fermi level and Fermi energy, occupation probability, concentration of charge carriers, generation and recombination, carrier transport: drift and diffusion, energy band diagram of unbiased and biased P N Junction, Light Emitting Diode, Photodetectors - p-n photodiode, PIN, Photoconductivity, Effect of impurity & Traps, Photovoltaic effect and Solar cell.

**Unit-2 Quantum Physics (8 Lectures)**

Limitations of classical physics, Black-body radiations, Planck's hypothesis, Photo-electric effect, Compton effect, Uncertainty principle, Matter waves, Phase and group velocity, Schrodinger's equations (time dependent and independent), Particle in a box (motion in one dimension), Basics of quantum statistics.

**Unit-3 Lasers and Optical Fibres (8 Lectures)**

Introduction to laser, Spontaneous and stimulated emissions of radiations, Einstein's coefficients and relation among them, Population inversion and laser pumping, Characteristics of lasers, Components of laser, He-Ne laser, Semiconductor laser, Applications of laser.

Introduction to optical fibres, Acceptance angle and acceptance cone, Numerical aperture, Classification of fibres, Attenuation, Losses associated with optical fibres, Merits and applications of optical fibres.

**UNIT 4: Advance Material and Synthesis (6 Lectures)**

Introduction to nanomaterials, Nano-science and nano-technology, Two main approaches in nanotechnology, Bottom up technique, Top down technique, Quantum dot and graphene, Methods to produce Nanomaterials, Chemical vapour deposition, Sol-gel process, Molecular beam epitaxy, Physical and chemical properties of nanomaterials, Carbon nanotubes: single and multi-walled nanotubes, Synthesis of Nanotubes: carbon arc method, Laser evaporation method, Sputtering, applications of advanced materials.

**UNIT 5: Investigating Techniques (6 Lectures)**

Properties of X-Ray, Bragg's Law, Bragg's Spectrometer, Rutherford Back Scattering, Raman effect and Raman spectroscopy, Hall effect, Vander Pauw measurements for carrier density, resistivity, Hot-point probe measurement, AFM, SEM, photoluminescence spectroscopy, band gap by UV-Vis spectroscopy.

**Unit-6 Electrodynamics (8 Lectures)**

Divergence and curl of electrostatic field, Laplace's and Poisson's equations for electrostatic potential. Solutions of Laplace equation in one dimension, Dielectric Polarization and Dielectric constant, Piezoelectricity, Bio-Savart law and Ampere's circuital theorem, Continuity equation for current densities, Displacement current, Maxwell's equations, Electromagnetic

energy – Flow of energy and Poynting vector, The wave equation; Plane electromagnetic waves in vacuum, their transverse nature, Energy carried by electromagnetic waves.

**Text Books/ Reference Books:**

1. P. Bhattacharya, 2017, Semiconductor Optoelectronic Devices, Pearson education.
2. D.J Griffiths, 2015, Introduction to Electrodynamics, Pearson education.
3. Avadhanulu and Kshirsagar, 2014, A textbook of Engineering Physics S. Chand.
4. S.P. Taneja, 2018, Modern Physics for Engineers, R. Chand & Co.
5. Mark Ratner and Daniel Ratner, 2003, Nanotechnology, Pearson.
6. M.N.O. Sadiku, 2015, Elements of Electromagnetics, Asian Edition, Oxford Higher Education.

**Distribution of Continuous Evaluation:**

Sessional- I	30%
Sessional- II	30%
Assignment/Tutorial	20%
Class Work/ Performance	10%
Attendance	10%

**Evaluation Tools:**

- Assignment/Tutorials
- Sessional tests
- Surprise questions during lectures/Class Performance
- Term end examination

Assignments, Sessional and End Semester Examination paper will consist of various difficulty levels to accommodate the different capabilities of students. Assessment should cover all course outcomes and upper limit for lower order skills will be 40% (for knowledge-oriented questions). However, weightage for different cognitive levels in the question papers can vary.

**Instructions for paper setting:** The paper setter must ensure the coverage of entire syllabus while setting the question papers and mention the learning outcomes across each section to be measured by the examination. Weightage of the sections may vary as per the number of respective lecture hours mentioned in the syllabus. Action verbs should be used from Bloom’s Taxonomy while designing question papers.

(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BMA-101: Mathematics- I**

Periods/week	Credits	Max. Marks	: 200	
L: 3	T: 1	4	Continuous Evaluation	: 100
Duration of Examination: 3 Hrs		End Sem Examination	: 100	

**Pre-requisites:** The students must have the knowledge of mathematical concepts of Intermediate level.

**Course Type:** Basic Sciences

**Course Outcomes:** Students will be able to-

- BMA-101.1. Draw the role of mathematics which allows both algebraic and graphical representations of a function.
- BMA-101.2. Define the terminology of Integration, Differential Equations, Matrices and Vectors
- BMA-101.3. Explain improper integrals, power series, linear system of equations and vector space.
- BMA-101.4. Use the knowledge of Beta and Gamma Functions, rank of matrices, expansion of functions and diagonalization.
- BMA-101.5. Apply the concepts of integration, differentiation, matrices and vectors to solve real life problems.
- BMA-101.6. Find the surface area and maxima and minima of a function.

**PART-A**

**Unit 1: Integral Calculus:**

Evolutes and involutes; Evaluation of definite and improper integrals; Beta and Gamma functions and their properties; Applications of definite integrals to evaluate surface areas and volumes of revolutions.

**Unit 2: Differential Calculus:**

Rolle's theorem, Mean value theorems, Taylor's and Maclaurin's theorems with remainders, indeterminate forms and L'Hospital's rule, Maxima and minima.

**Unit 3: Matrices:**

Matrices, Vectors: addition and scalar multiplication, matrix multiplication, Linear systems of equations, linear Independence, rank of a matrix, determinants, Cramer's Rule, inverse of a matrix, Gauss elimination and Gauss-Jordan elimination.

**PART-B**

**Unit 4: Vector Spaces-I**

Vector Space, linear dependence of vectors, basis, dimension; Linear transformations (maps), range and kernel of a linear map, rank and nullity, Inverse of a linear transformation, Rank-Nullity theorem, composition of linear maps, Matrix associated with a linear map.

**Unit 5: Vector spaces-II**

Eigenvalues, eigenvectors, symmetric, skew-symmetric, and orthogonal Matrices, eigenbases. Diagonalization, inner product spaces, Gram-Schmidt Orthogonalization.

**Text Books/Reference Books:**

1. G.B. Thomas and R.L. Finney, 2002, Calculus and Analytic geometry, 9<sup>th</sup> Edition, Pearson, Reprint.

# MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH & STUDIES

(Deemed to be University under section 3 of the UGC Act 1956)

## BEE-101A: BASIC ELECTRICAL ENGINEERING

Periods/week Credits

L: 3 T: 0 3

Duration of Examination: 3 Hours

Max. Marks : 200

Continuous Evaluation : 100

End Semester Exam : 100

**Pre-requisites: NIL**

**Course Type: Engineering Science**

**Course Outcomes:** After completion of this course the students will be able to

BEE-101A.1 understand the components of electrical network, low voltage electrical installation, earthing and working of batteries.

BEE-101A.2 apply the basic theorems and laws for solving both dc and ac networks.

BEE-101A.3 differentiate between single phase series and parallel circuits and three phase system.

BEE-101A.4 explain the construction and working of transformers, electrical machines and power converters

### **Unit 1: DC CIRCUITS (8 hours)**

1.1 Electrical circuit elements (R, L and C), voltage and current sources,

1.2 Kirchoff Voltage and Current Laws,

1.3 Analysis of simple circuits ( two loops) with dc excitation ,

1.4 Superposition Theorem,

1.5 Thevenin's Theorem,

1.6 Norton's Theorem,

1.7 Time domain analysis of first order system- RL circuit,

1.8 Time domain analysis of first order system- RC circuit.

### **Unit 2: AC CIRCUITS (8 hours)**

2.1 Single Phase-AC Generation,

2.2 Sinusoidal Waveform- peak value average and rms values

2.3 Phasor representation, L, C, RL, RC circuit

2.4 RLC Series Circuits

2.5 Power factor, Real power, Reactive power and Apparent power

2.6 RLC parallel circuits

2.7 Resonance

2.8 Three Phase Emf Generation, Delta and Star Connections

2.9 Voltage and current relation in star and delta connections

### **Unit 3: TRANSFORMERS (6 hours)**

3.1 Magnetic materials

3.2 BH characteristics,

3.3 Working Principle and Emf Equation of transformer,

3.4 Ideal and Practical transformer,

3.5 Equivalent circuit Losses in transformer,

3.6 Efficiency and regulation of transformer

3.7 Auto transformer

3.8 Three phase transformer connections.

### **Unit 4: DC MACHINES (5 hours)**

4.1 Construction and working of DC motor,

4.2 Torque-speed characteristic and speed control of separately excited dc motor,

4.3 Construction and working of DC generator,

4.4 EMF equation of DC generator,

4.5 Introduction to power converters/power switching devices.

**Unit 5: AC MACHINES (6 hours)**

- 5.1 Generation of rotating magnetic fields,
- 5.2 Construction and working of a three-phase induction motor
- 5.3 Significance of torque-slip characteristic,
- 5.4 Loss components and efficiency of three phase induction motor
- 5.5 Starting and speed control of induction motor,
- 5.6 Single-phase induction motor working and types
- 5.7 Construction and working of synchronous generators.

**Unit 6: ELECTRICAL INSTALLATIONS (6hours)**

- 6.1 Components of LT Switchgear: Switch Fuse Unit (SFU), MCB, ELCB, MCCB,
- 6.2 Types of Wires and Cables,
- 6.3 Earthing,
- 6.4 Types of Batteries, Important Characteristics for Batteries,
- 6.5 Elementary calculations for energy consumption,
- 6.6 Power factor improvement and battery backup.

**Text Books/ Reference Books:**

1. I. J. Nagrath, D. P. Kothari ,2007, Basic Electrical Engineering, TMH.
2. S. NathChakrabarti, C. K. Chanda , 2009, Basic Electrical Engineering, TMH,2009.

**NAAC 'A' Grade University**

**BCS-100 : ARTIFICIAL INTELLIGENCE FOR ENGINEERS**

Periods/week Credits

L :2 T: 0 2.0

Duration of Exam: 3 Hrs

**Pre-Requisite:** Basic Knowledge of Computers

**Course Type:** Engineering Science Course

Max. Marks: 200

Continuous Evaluation: 100

End Term Examination:100

**Course Outcomes:** The students will be able to-

BCS-100.1 Understand the evolution and various approaches of AI

BCS-100.2 Familiarize with the role of data, data storage, processing, algorithm, visualization, regression, classification and clustering.

BCS-100.3 Identify the Natural Language Processing in designing AI models.

BCS-100.4 Illustrate the use of various concepts of neural network and its applications.

BCS-100.5 Recognize the applications of AI and its domains in real-life applications.

**Unit 1: An overview to AI**

- 1.1 The evolution of AI to the present
- 1.2 Various approaches to AI
- 1.3 What should all engineers know about AI?
- 1.4 Other emerging technologies
- 1.5 AI and ethical concerns

**Unit 2: Data & Algorithms**

- 2.1 History of Data
- 2.2 Data Storage and Importance of Data and its Acquisition
- 2.3 The Stages of data processing
- 2.4 Data Visualization
- 2.5 Regression, Prediction & Classification
- 2.6 Clustering & Recommender Systems

**Unit 3: Natural Language Processing**

- 3.1 Speech recognition
- 3.2 Natural language understanding
- 3.3 Natural language generation
- 3.4 Chatbots
- 3.5 Machine Translation

**Unit 4: Artificial Neural Networks**

- 4.1 Deep Learning
- 4.2 Recurrent Neural Networks
- 4.3 Convolution Neural Networks
- 4.4 The Universal Approximation Theorem
- 4.5 Generative Adversarial Networks

**Unit 5: Applications**

- 5.1 Image and face recognition
- 5.2 Object recognition
- 5.3 Speech Recognition besides Computer Vision
- 5.4 Robots
- 5.5 Applications

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH & STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**BME-101A: ENGINEERING GRAPHICS & DESIGN**

Periods/week Credits

Max. Marks : 200

L: 0 T: 0 P: 4 2

Internal/Continuous Assessment : 100

Duration of Examination: 3 Hrs

End Semester Exam : 100

**Prerequisites: NIL**

**Course Type: Engineering Science Course**

**Course Coordinator / Co-Coordinator:**

**Course Outcomes: After completion of this course the students will be able to**

- BME-101A.1 understand the role and importance of Engineering Graphics, design/drafting in cognitive development.
- BME-101A.2 conceptualize engineering drawing and descriptive geometry to understand different components and machineries.
- BME-101A.3 visualize objects with the help of engineering principles, projection theories including their applications to solve problems related to engineering and production.
- BME-101A.4 develop capability of understanding engineering drawing problems and implementation of respective solution.
- BME-101A.5 develop capability of selection of solutions for a given design problem.
- BME-101A.6 develop of capability of designing a product or assembly with its various components with a systematic design approach

**Theory (Detailed Content)**

**Traditional Engineering Graphics:**

Principles of Engineering Graphics; Orthographic Projection; Descriptive Geometry; Drawing Principles; Isometric Projection; Surface Development; Perspective; Reading a Drawing; Sectional Views; Dimensioning & Tolerances; True Length, Angle; intersection, Shortest Distance.

**(Except the basic essential concepts, most of the teaching part can happen concurrently in the laboratory)**

**Part-A**

**Unit 1: Introduction to Engineering Drawing, Orthographic Projections**

Principles of Engineering Graphics and their significance, usage of drawing instruments, lettering, Conic sections including the Rectangular Hyperbola (General method only); Cycloid, Epicycloid, Hypocycloid and Involute; Scales – Plain, Diagonal and Vernier Scales; Principles of Orthographic Projections-Conventions - Projections of Points and lines inclined to both planes; Projections of planes inclined Planes - Auxiliary Planes;

**Unit 2: Projections of Regular Solids & Sections and Sectional Views of Right Angular Solids**

Inclined to both the Planes- Auxiliary Views; Draw simple annotation, dimensioning and scale. Floor plans that include: windows, doors, and fixtures such as WC, bath, sink, shower, etc. Prism, Cylinder, Pyramid, Cone – Auxiliary Views; Development of surfaces of Right Regular Solids - Prism, Pyramid, Cylinder and Cone; draw the sectional orthographic views of geometrical solids, objects from industry and dwellings (foundation to slab only).

**Unit 3: Isometric Projections**

Principles of Isometric projection – Isometric Scale, Isometric Views, Conventions; Isometric Views of lines, Planes, Simple and compound Solids; Conversion of Isometric Views to Orthographic Views and Vice-versa, Conventions;

**Theory (Detailed Content)**

**Computer Graphics**

Engineering Graphics Software; -Spatial Transformations; Orthographic Projections; Model Viewing; Co-ordinate Systems; Multi-view Projection; Exploded Assembly; Model Viewing; Animation; Spatial Manipulation; Surface Modelling; Solid Modelling; Introduction to Building Information Modelling (BIM)

**(Except the basic essential concepts, most of the teaching part can happen concurrently in the laboratory)**

## Part-B

### Unit 4: Overview of Computer Graphics, Customization & CAD Drawing

Listing the computer technologies that impact on graphical communication, Demonstrating knowledge of the theory of CAD software [such as: The Menu System, Toolbars (Standard, Object Properties, Draw, Modify and Dimension), Drawing Area (Background, Crosshairs, Coordinate System), Dialog boxes and windows, Shortcut menus (Button Bars), The Command Line (where applicable), The Status Bar, Different methods of zoom as used in CAD, Select and erase objects.; Isometric Views of lines, Planes, Simple and compound Solids; consisting of set up of the drawing page and the printer, including scale settings, Setting up of units and drawing limits; ISO and ANSI standards for coordinate dimensioning and tolerancing; Orthographic constraints, Snap to objects manually and automatically; Producing drawings by using various coordinate input entry methods to draw straight lines, Applying various ways of drawing circles;

### Unit 5: Annotations, layering, other functions

Applying dimensions to objects, applying annotations to drawings; Setting up and use of Layers, layers to create drawings, Create, edit and use customized layers; Changing line lengths through modifying existing lines (extend/lengthen); Printing documents to paper using the print command; orthographic projection techniques; Drawing sectional views of composite right regular geometric solids and project the true shape of the sectioned surface; Drawing annotation, Computer-aided design (CAD) software modeling of parts and assemblies. Parametric and non-parametric solid, surface, and wireframe models. Part editing and two-dimensional documentation of models. Planar projection theory, including sketching of perspective, isometric, multiview, auxiliary, and section views. Spatial visualization exercises. Dimensioning guidelines, tolerancing techniques; dimensioning and scale multi views of dwelling;

### Unit 6: Demonstration of a simple team design project

Geometry and topology of engineered components: creation of engineering models and their presentation in standard 2D blueprint form and as 3D wire-frame and shaded solids; meshed topologies for engineering analysis and tool-path generation for component manufacture; geometric dimensioning and tolerancing; Use of solid-modeling software for creating associative models at the component and assembly levels; floor plans that include: windows, doors, and fixtures such as WC, bath, sink, shower, etc. Applying color coding according to building drawing practice; Drawing sectional elevation showing foundation to ceiling; Introduction to Building Information Modelling (BIM).

# MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES

(Deemed to be University under section 3 of the UGC Act 1956)

NAAC 'A' Grade University

**BPH-151A: PHYSICS LAB**

Periods/week Credits

P: 2 1

Duration of Examination: 2 Hrs

Max. Marks : 100

Internal : 50

External : 50

**Pre-requisite: Basic knowledge of 10+2 level Physics**

**Course Type: Basic Sciences Courses**

**Course Outcomes:** The students will be able to:

BPH-151A.1 calculate zero error, least count, maximum percentage error, percentage error and understand their importance

BPH-151A.2 understand the principle, concept and working of the experiments

BPH-151A.3 rearrange/assemble the different components of a device or a circuit

BPH-151A.4 describe the methodology of science and the relationship between observation and theory

## List of Experiments:

1. To calculate the hysteresis loss and magnetic susceptibility by tracing B- H curve.
2. To determine the value of Planck's constant  $h$  by a photo cell.
3. To determine the grating element of a given grating by using LASER.
4. To study Hall Effect in a semiconductor and to find (i) Hall voltage and Hall coefficient (ii) number of charge carriers per unit volume (iii) mobility.
5. To draw the characteristics of a solar cell and to find the fill factor.
6. To find the band gap of an intrinsic semiconductor using four probe method.
7. To draw the V-I characteristics of a PIN diode.
8. To determine numerical aperture of an optical fibre.
9. To determine the volume magnetic susceptibility of manganese sulphate solution at different concentrations.
10. To find the charge to mass ( $e/m$ ) ratio of an electron.
11. To study the resonance phenomena in LCR circuits.
12. To study the variation of magnetic field from Helmholtz coil.
13. To determine the moment of inertia of a flywheel.
14. To determine the Young's modulus of the material of a given beam supported on two knife-edges and loaded at the middle point.
15. To determine the Modulus of Rigidity of a wire by Maxwell's Needle.

## Text Books/References:

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BEE-151A: BASIC ELECTRICAL ENGINEERING LAB**

Periods/week	Credits	Max. Marks	: 100
P: 2	1	Internal/Continuous Evaluation:	50
Duration of Examination: 2 Hours		End Semester Exam	: 50

**Pre-requisite: Basic knowledge of 10+2 level Physics**

**Course Type: Engineering Sciences Courses**

**Course Outcomes**

**After completion of this course the students will be able to**

- BEE-151A.1 familiarize with the measuring instruments, breadboard, CRO, components of LT installation
- BEE-151A.2 understand the transformers connection both single and three phase.
- BEE-151A.3 study the working principles of electric machines and power converters
- BEE-151A.4 design a simple PCB with software.

**LIST OF EXPERIMENTS:**

1. Introduction and use of measuring instruments – voltmeter, ammeter, multi-meter, oscilloscope. Real-life resistors, capacitors and inductors and verification of basic laws.
2. To measure the steady-state and transient time-response of R-L/R-L circuits to a step change in voltage (transient may be observed on a storage oscilloscope).
3. To examine sinusoidal steady state response of R-L, and R-C circuits – impedance calculation and verification. Observation of phase differences between current and voltage.
4. To find the resonance frequency in R-L-C circuits..
5. To observe the no-load current waveform of transformer on an oscilloscope (non- sinusoidal wave-shape due to B-H curve nonlinearity should be shown along with a discussion about harmonics).
6. To perform Load test on a transformer: measurement of primary and secondary voltages and currents, and power.
7. To connect Three-phase transformers in Star and Delta and verify voltage and current relationships (line-line voltage, phase-to-neutral voltage, line and phase currents). Phase-shifts between the primary and secondary side and to measure three-phase power in balanced three-phase circuits.
8. Identification of various types of Printed Circuit Boards (PCB) and soldering techniques.
9. Introduction to PCB design software.
10. PCB Lab a) Artwork & printing of simple PCB b) Etching & drilling of PCB.
11. Demonstration of cut-out sections of machines: dc machine (commutator-brush arrangement), induction machine (squirrel cage rotor), synchronous machine (field winding - slip ring arrangement) and single-phase induction machine.
12. To draw Torque -Speed Characteristic of dc motor.
13. To find Synchronous speed of two and four-pole three-phase induction motors, check Direction reversal by change of phase-sequence of connections and to draw Torque-Slip Characteristic of an induction motor.
14. To Study components of LT, switchgear- MCB, ELCB, MCCB.
15. To Study DC-DC Converter.

**Text Books:**

Dr. N K Jain ,2010, A text book of Practicals in Electrical Engineering, Dhanpatrai Publishing Co.

**Instructions for Exam:** Every student needs to complete 10 experiments in a semester. One experiment out of 10 given randomly needs to be performed in exams.

**BHM-201A: English**

Periods/week Credits  
L: 2 T:0 P:0 2  
Duration of Exam: 2 Hours

Max. Marks: 100  
Continuous Evaluation: 50  
External (Written): 50

**Prerequisites:**

Students are expected to have an inclination towards understanding the need for life skills required to succeed in their career and should know Basic English.

**Course Type: Program Core**

**Course Outcomes: The students would be able to-**

- BHM-201A.1. Speak in English confidently
- BHM-201A.2. Acquire proficiency in reading and writing skills
- BHM-201A.3. Communicate in grammatically correct English.
- BHM-201A.4. Create and deliver presentations confidently.
- BHM-201A.5 Understand the meaning of professional communication.

**Unit 1. Vocabulary Building**

- 1.1 The concept of Word Formation
- 1.2 Root words from foreign languages and their use in English
- 1.3 Acquaintance with prefixes and suffixes from foreign languages in English to form derivatives.
- 1.4 Synonyms, antonyms, and standard abbreviations.

**Unit 2. Basic Writing Skills**

- 2.1 Sentence Structures
- 2.2 Use of phrases and clauses in sentences
- 2.3 Importance of proper punctuation
- 2.4 Creating coherence
- 2.5 Organizing principles of paragraphs in documents
- 2.6 Techniques for writing precisely

**Unit 3. Identifying Common Errors in Writing**

- 3.1 Subject-verb agreement
- 3.2 Noun-pronoun agreement
- 3.3 Misplaced modifiers
- 3.4 Articles
- 3.5 Prepositions
- 3.6 Redundancies
- 3.7 Clichés

**Unit 4. Nature and Style of sensible Writing**

- 4.1 Describing
- 4.2 Defining
- 4.3 Classifying
- 4.4 Providing examples or evidence
- 4.5 Writing introduction and conclusion

**Unit 5. Writing Practices**

- 5.1 Email Writing
- 5.2 Cover Letter
- 5.3 Essay

## Unit 6. Oral Communication

- 6.1 Listening Comprehension
- 6.2 Pronunciation, Intonation, Stress and Rhythm
- 6.3 Common Everyday Situations: Conversations and Dialogues
- 6.4 Communication at Workplace
- 6.5 Interviews
- 6.6 Formal Presentations

## BHM-MC-001: CONSTITUTION OF INDIA

Periods/week	Credits	Max. Marks	: 100
L :0	T: 1	AP	Continuous Evaluation: 50
Duration of Exam: 2 Hrs		End Semester Exam	: 50

**Pre-Requisite: Nil**

**Course Type: HSMC**

### Unit-1: Background:

India's struggle for independence, Formation of the Constituent Assembly, The Union and its Territory : Nomenclature, Formation of New States and Alteration of Areas, Citizenship : Citizenship at the Commencement of the Constitution, Rights of Citizenship of certain persons, Rights of Citizenship of certain persons of Indian origin residing outside India, Continuance of the rights of Citizenship, Parliament to regulate the right of the Citizenship by law.

### Unit-2: Fundamental Rights and Directive Principles :

Definition, Laws inconsistent with or in derogation of the Fundamental Rights, Equality before law, Prohibition of discrimination on grounds of religion, race, caste, sex or place of birth, Equality of opportunity in matters of public employment, Abolition of untouchability, Abolition of Titles- Right to Freedom, Right against Exploitation, Right to freedom of religion, Cultural and Educational rights, Right to constitutional remedies, Directive principles of State Policy : Definition, Right to work, Right to education and to public assistance in certain cases, provisions for just and humane condition of work and maternity relief, uniform civil code for the citizens, protection and improvement of environment and safeguarding of forests and wildlife, protection of monuments and places and objects of national importance, separation of judiciary from executive, promotion of international peace and security and Fundamental Duties.

### Unit-3: The Union:

The executive, The President and Vice President of India, Council of Ministers, Attorney General for India, Parliament, Legislative procedure, The Union Judiciary: Establishment and constitution of Supreme Court, Powers and Functions of Supreme Court, Original Jurisdiction of the Supreme Court, The States : Definition, The Governor, Council of Ministers, The Advocate General for the State, The State Legislature, Legislative Procedure, High Courts in the State, The Union Territories, The Panchayats, Municipalities, Relations between the Union and the States.

### Unit-4: Services under the Union and the States:

Services, Public Service Commissions, Elections: Election Commission of India, Emergency Provisions : Proclamation of Emergency, Amendment of the Constitution, Temporary, Transitional and Special Provisions, Schedules : First to Tenth Schedule and Miscellaneous.

## BCH-106: CHEMISTRY FOR ENGINEERS

Periods/week Credits

L: 2 T: 0 2

Duration of Examination: 3 Hrs

Max. Marks : 200

Continuous Evaluation : 100

End Term Examination : 100

**Pre-requisite: Basic knowledge of 10+2 level Chemistry**

**Course Type: Basic Sciences**

**Course Outcomes:** The course will enable the student to-

BCH-106.1. Apply fundamental principles to predict the structure, stereochemistry, bonding and general properties of materials.

BCH-106.2. Predict potential applications and practical utility of chemistry in different areas and propose suitable analytical techniques for practical applications.

BCH-106.3. Develop the understanding of water treatment techniques, electrochemical cells and combustion technology.

### **Unit 1: Water Treatment Chemistry (5 Lectures)**

Impurities in water, Drinking Water quality standards, Hardness, types and its determination by EDTA method, Alkalinity and its determination, numerical problems based on hardness & alkalinity, Water softening methods: zeolite, ion-exchange process, Desalination of water: Reverse osmosis (RO) & Electro-dialysis process

### **Unit 2: Electrochemical cells and Fuels (5 Lectures)**

Basic concepts of cells, Primary cells, Secondary cells and batteries, Fuel cells, Fuels and their types, Combustion technology

### **Unit 3: Phase Rule and its applications (4 Lectures)**

3.1 Terminology of Gibb's phase rule and problems based on phase rule equation, One component system (water), Two component Eutectic system (Pb-Ag), Industrial applications of phase diagrams

### **Unit 4: Atomic and molecular structure (5 Lectures)**

Limitations of classical mechanics in treating atomic and molecular phenomena, Schrodinger equation, Particle in a box solution and their applications for conjugated molecules and nanoparticles, Molecular orbital treatment for homo-nuclear diatomic molecules, Bonding in Coordination Compounds: Crystal field theory

### **Unit-5: Stereochemistry (4 Lectures)**

Structural isomers and stereoisomers, Representations of 3 dimensional structures, Enantiomers, diastereomers, Absolute configurations and conformational analysis

### **Unit6: Analytical Techniques(5 Lectures)**

Basic Principles of spectroscopy, UV- VIS spectroscopy and its applications, IR spectroscopy and its applications, Principle and analytical applications of Atomic Absorption spectroscopy, brief overview of Inductively coupled plasma mass spectrometry

### **Text Books/ Reference books/Web references:**

**Distribution of Continuous Evaluation:**

Sessional- I	30%
Sessional- II	30%
Assignment/Tutorial	20%
Class Work/ Performance	10%
Attendance	10%

**Evaluation Tools:**

Assignment/Tutorials  
 Sessional tests  
 Surprise questions during lectures/Class Performance  
 Term end examination

Assignments, Sessional and End Semester Examination paper will consist of various difficulty levels to accommodate the different capabilities of students. Assessment should cover all course outcomes and upper limit for lower order skills will be 40% (for knowledge-oriented questions). However, weightage for different cognitive levels in the question papers can vary.

**Instructions for paper setting:** The paper setter must ensure the coverage of entire syllabus while setting the question papers and mention the learning outcomes across each section to be measured by the examination. Weightage of the sections may vary as per the number of respective lecture hours mentioned in the syllabus. Action verbs should be used from Bloom's Taxonomy while designing question papers.

## BMA-201: Mathematics- II (Probability and Statistics)

Periods/week	Credits	Max. Marks	: 200	
L: 3	T: 1	4	Continuous Evaluation	: 100
Duration of Examination: 3 Hrs		End Sem Examination	: 100	

**Pre-requisites:** The students must have the knowledge of basic concepts of probability of Intermediate level.

**Course Type:** Basic Sciences

**Course Outcomes:** Students will be able to-

- BMA-201.1. Understand the role of mathematics in in the digital society.
- BMA-201.2. Define the concepts of probability and random variables and various discrete and continuous probability distributions and their properties.
- BMA-201.3. Demonstrate the knowledge of measures of central tendency, correlation and regression.
- BMA-201.4. Explain the types of probability distributions with formulas or plotted through graphs for easy interpretation of the data.
- BMA-201.5. Construct and examine the samples.
- BMA-201.6. Apply statistical methods for studying data samples.

### PART-A

#### Unit 1: Basic Probability

Probability spaces, conditional probability, independence, Discrete random variables, Independent random variables, the multinomial distribution, Poisson approximation to the binomial distribution, infinite sequences of Bernoulli trials, sums of independent random variables; Expectation of Discrete Random Variables, Moments, Variance of a sum, Correlation coefficient, Chebyshev's Inequality.

#### Unit 2: Continuous Probability Distributions

Continuous random variables and their properties, distribution functions and densities, normal, exponential and gamma densities.

#### Unit 3: Bivariate Distributions

Bivariate distributions and their properties, distribution of sums and quotients, conditional densities, Bayes' rule.

### PART-B

#### Unit 4: Basic Statistics

Measures of Central tendency: Moments, skewness and Kurtosis, Probability distributions: Binomial, Poisson and Normal, evaluation of statistical parameters for these three distributions, Correlation and regression – Rank correlation.

#### Unit 5: Applied Statistics

Curve fitting by the method of least squares- fitting of straight lines, second degree parabolas and more general curves. Test of significance: Large sample test for single proportion, difference of proportions, single mean, difference of means, and difference of standard deviations.

#### Unit 6: Small Samples

Test for single mean, difference of means and correlation coefficients, test for ratio of variances - Chi-square test for goodness of fit and independence of attributes.

**NAAC 'A' Grade University**

**BCS-101A: PROGRAMMING FOR PROBLEM SOLVING**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Term Examination : 100

**Pre-Requisite:** Basic Knowledge of Computers

**Course Type:** Engineering Science Course

**Course Outcomes:** The students will be able to-

- BCS-101.1. Formulate simple algorithms for arithmetic and logical problems with correct logic.
- BCS-101.2. Implement the conditional statement and iteration with understanding of concepts.
- BCS-101.3. Decompose a problem into functions and able to understand use of functions.
- BCS-101.4. Apply advanced C programming techniques such as arrays, pointers, dynamic memory allocation, structures to develop solutions for particular problems.

**PART- A**

**Unit-1: Introduction to Programming**

- 1.1. Introduction to programming
- 1.2. Introduction to components of a computer system (disks, memory, processor, where a program is stored and executed, operating system, compilers etc.)
- 1.3. Idea of Algorithm: steps to solve logical and numerical problems. Representation of Algorithm: Flowchart/ Pseudo code with examples.
- 1.4. From algorithms to programs; source code, variables (with data types) variables and memory locations, Syntax and Logical Errors in compilation, object and executable code.
- 1.5. Expressions, Precedence and Associativity, Expression Evaluation, Type conversions

**Unit-2: Loops and Conditional Statements**

- 2.1 Arithmetic expressions and precedence
- 2.2 Conditional Branching; Writing and evaluation of conditionals and consequent branching
- 2.3 Iteration and loops

**Unit-3: Arrays and Structures**

- 3.1 Arrays (1-D, 2-D): 1 D array and function—Passing individual array elements to a function, passing individual array elements address to a function, passing whole 1d array to a function, 2D array and function, Passing individual array elements to a function, passing individual array elements address to a function, passing whole 2d array to a function
- 3.2 Character Arrays and Strings
- 3.3 Structures; Defining Structures
- 3.4 Array of Structures

**PART –B**

**Unit-4: Functions**

- 4.1 Functions (including using built in libraries)
- 4.2 Parameter passing in functions
- 4.3 call by value.
- 4.4 Passing arrays to functions: idea of call by reference
- 4.5 Recursion, as a different way of solving problems.
- 4.6 Example programs, such as Finding Factorial, Fibonacci series.

**Unit-5: Basic Algorithms**

- 5.1 Iterative Searching (Linear and Binary Search)
- 5.2 Basic Sorting Algorithms with implementation (Bubble, Insertion and Selection)
- 5.3 Finding roots of equations
- 5.4 Notion of order of complexity through example programs (no formal definition required)

## Unit-6: Pointers and File Handling

- 6.1 Idea of pointers, Defining pointers, Pointer to an array, Array of pointers, Pointers and two dimensional arrays
- 6.2 Use of Pointers in self-referential structures
- 6.3 Notion of linked list (no implementation)
- 6.4 File Handling :Working with text files and Binary Files, File operations using std. library and system calls–File management I/O functions

(Deemed to be University under section 3 of the UGC Act 1956)

**BBT-100 BIOLOGY FOR ENGINEERS**

Periods/week Credits  
L: 2 T: 0 P:0 02  
Duration of Examination: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Semester Examination:100

**Pre-requisites:** Knowledge of 10+2 Science

**Course Type:** Basic Sciences

**Course Outcomes:**

The students will be able to-

- BBT-100.1 describe the taxonomic diversity of life forms and their functions.
- BBT-100.2 assess the role of biomolecules in physiology and genetics.
- BBT-100.3 illustrate the structural and functional organization of the human body.
- BBT-100. 4 apply the principles of biology for sustenance.

**PART-A**

**Unit 1: The Living World**

- 1.1 What is living World?
- 1.2 Diversity in the living world
- 1.3 Taxonomy and Biological Classification
- 1.4 Structural organization in plants and animals
- 1.5 Cell- The unit of Life

**Unit 2: Microbiology**

- 2.1 Microbial diversity, Ecology and Population dynamics, Microbial growth on surfaces Environmental effect on microbial growth.
- 2.2 Bioremediation, examples of bioremediation, Acid mine drainage, Enhanced metal recovery, Wastewater microbiology
- 2.3 Solid waste microbiology, Landfills, Leachate, Anaerobic degradation phases.
- 2.4 Antimicrobial resistance

**PART-B**

**Unit 3: Biochemistry**

- 3.1 Carbohydrates- monosaccharides, disaccharides and Polysaccharides,
- 3.2 Lipids- fatty acids, fats and oils, lipids of biological importance
- 3.3 Amino acids – essential and non-essential amino acids, peptide bond formation
- 3.4 Proteins- overview of proteins synthesis, structural organization, functions of proteins
- 3.5 Nucleic acids- structure and functions of DNA and RNA.
- 3.6 Enzymes: role as biological catalysts, Mechanism of enzyme action, Industrial applications of enzymes

**Unit 4: Human Anatomy**

- 4.1 General Anatomy- Basic terms in anatomy- Anterior, posterior, lateral, medial, Elementary tissues of the human body
- 4.2 Cardiovascular system, Respiratory System
- 4.3 Gastrointestinal System, Genito-urinary system
- 4.4 Musculoskeletal system, Nervous system & Sense organs
- 4.5 Endocrine System

**Unit 5: Human Physiology**

- 5.1 Body fluids and salts, composition and functions of blood, Blood groups, blood clotting
- 5.2 Cardiac cycle and heart sounds, Electrocardiogram (ECG), Blood pressure, Hypertension, Hypotension, Arteriosclerosis, Atherosclerosis, Angina, Myocardial infarction, Congestive heart failure and cardiac arrhythmias

- 5.3 Respiratory volumes and capacities, Hypoxia, Asphyxia
- 5.4 Disorders of GIT, Endocrine disorders
- 5.5 Microbial infections, Cancer

### Unit 6: Genetics & Computational Approach to Biology

- 6.1 Genetics- DNA as a blueprint and RNA as a messenger, from DNA sequence to Genes (From alphabets to words), Mendelian Inheritance
- 6.2 DNA to Chromosomes- Genes and Mutations, Information pathways – Replication, Transcription and Translation, Epigenetic Modifications.
- 6.3 Computational Approach to Biology- Finding a needle in the haystack – Making sense of the Big Data, Types of Biological Datasets.
- 6.4 The “Omics” Approach, Introduction to Network Biology - Basics of Graph and Network Theory, Cellular Networks.

# MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH & STUDIES

(Deemed to be University under section 3 of the UGC Act 1956)

## BME-102: WORKSHOP/MANUFACTURING PRACTICES

Periods/weekCredits

Max. Marks :200

L: 0 T: 0P:4 2

Continuous Assessment :100

Duration of Examination:3Hrs

End Semester Exam :100

**Prerequisites: basic knowledge of Science and Mathematics Course**

**Type: Engineering Science Course**

### Course Outcomes:

**After completion of this course the students will be able to**

- BME-102.1 Learn the basic manufacturing/fabrication processes and develop skills to fabricate with their own hand.
- BME-102.2 Understand how to operate various traditional and modern machine tools used in industries.
- BME-102.3 Apply knowledge of the dimensional accuracies and dimensional tolerances, basics of various measuring instruments, hand tools and cutting tools.
- BME-102.4 Acquire knowledge of safety measurements
- BME-102.5 Understand the impact of manufacturing engineering solution.
- BME-102.6 Assemble different mechanical component/parts

### Lectures & Videos (10 Hrs)

#### (i) Detailed Content

1. Manufacturing Methods- casting, forming, machining, joining, advanced manufacturing methods (3lectures).
2. CNC machining, Additive manufacturing (1lecture)
3. Fitting operations & power tools (1lecture)
4. Electrical &Electronics (1lecture)
5. Carpentry (1lecture)
6. Plastic moulding, glass cutting (1lecture)
7. Metal casting (1lecture)
8. Welding (arc welding & gas welding), brazing (1lecture)

#### (ii) Workshop Practice: (60hours)

1. Machine shop (10hours)
2. Fitting shop (8hours)
3. Carpentry (6 hours)
4. Electrical & Electronics (8 hours)
5. Welding shop (8 hours) (Arc welding 4 hrs + gas welding 4hrs)
6. Casting (8hours)
7. Smithy (6hours)
8. Plastic moulding & Glass Cutting (6hours)

## Students Project Fabrication

Students have to fabricate product from the assigned list with their own hands. They will also get practical knowledge of the dimensional accuracies and dimensional tolerances possible with different workshop processes. The final product should be assembly of different components fabricated by different workshop practices.

For e.g. Tack-hammer; Project Display Stand; Pen stand, Screw Driver, Variable size Spanner, Electrical Extension Board with electronic circuits or any other product which should involve multiple workshop practices to fabricate a single product.

Each student will be issued the drawings of the product assembly along with the drawing of the sub-part assembly, mentioning the dimensions, tolerance, sub-products used.

Students should follow the process planning sheet of the product and get involved in different workshop practices to complete the jobs for final submission.

Note: Each student should do more than one product to get hands on experience of all the workshop practices.

NAAC 'A' Grade University  
**BCH-151A: CHEMISTRY LAB**

Periods/week Credits  
P: 2 1  
Duration of Examination: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Term Examination : 50

**Pre-requisite: Basic knowledge of 10+2 level Chemistry**  
**Course Type: Basic Sciences Courses**

**Course Outcomes:** The students will be able to:

- BCH-151A.1. analyze the need and utility of the experiments.
- BCH-151A.2. do precise quantitative measurements using volumetric glassware, analytical balance, and prepare standards solutions independently.
- BCH-151A.3. carry out experiments to check the hardness, alkalinity and chloride content of different water samples and interpret the results.
- BCH-151A.4. employ the basic methods/techniques to measure surface tension, viscosity, conductance, emf, saponification value of different samples.

**List of Experiments:**

1. Preparation and standardization of volumetric solutions.
2. Determination of viscosity using Ostwald Viscometer.
3. Determination of hardness of water by EDTA method.
4. Determination of alkalinity of water.
5. Determination of strength of solution by Conductometric titration.
6. Determination of Ferrous ion concentration using Potentiometer.
7. Determine the percentage composition of given mixture of sodium hydroxide and sodium chloride.
8. Determination of viscosity of lubricating oils using Redwood viscometers.
9. Determination of chloride content of water.
10. Determination of surface tension using Stalagmometer.
11. Determination of saponification value of oils.
12. Determination of the partition coefficient of a substance between two immiscible liquids.

(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-151A: PROGRAMMING FOR PROBLEM SOLVING LAB**

Periods/week Credits  
P :2 1.0  
Duration of Exam: 2 Hrs

Max. Marks :100  
Continuous Evaluation : 50  
End Term Examination : 50

**Co-Requisite:** Programming for problem solving (BCS-101A)

**Course Type:** Engineering Science Course

**Course Outcomes:** Students will be able to-

- BCS-151A.1. Formulate the algorithms for simple problems in C language.
- BCS-151A.2. Understanding of syntax errors as reported by the compilers as well as logical errors.
- BCS-151A.3. Write iterative as well as recursive programs, implementing of arrays, strings and structures and various graph traversing algorithms.
- BCS-151A.4. Declare pointers of different types and able to understand the concept of file handling.

**NOTE:** The laboratory should be preceded or followed by a tutorial to explain the approach or algorithm to be implemented for the problem given.

**List of Practicals:**

Tutorial 1: Problem solving using computers:

Lab1: Familiarization with programming environment

Tutorial 2: Variable types and type conversions:

Lab 2: Simple computational problems using arithmetic expressions

Tutorial 3: Branching and logical expressions:

Lab 3: Problems involving if-then-else structures

Tutorial 4: Loops, while and for loops:

Lab 4: Iterative problems e.g., sum of series

Tutorial 5: 1D Arrays: searching, sorting:

Lab 5: 1D Array manipulation

Tutorial 6: 2D arrays and Strings

Lab 6: Matrix problems, String operations

Tutorial 7: Functions, call by value, call by reference

Lab 7: Simple functions

Tutorial 8: Recursion, structure of recursive calls

Lab 8: Recursive functions

Tutorial 9: Numerical methods (Root finding, numerical differentiation, numerical integration):

Lab 9: Programming for solving Numerical methods problems

Tutorial 10: Pointers, structures and dynamic memory allocation

Lab 10: Pointers and structures

Tutorial 11: File handling

Lab 11: File operations

**BCH-MC-002: EVS**

Periods/week    Credits  
L: 0 T: 1 P: 0    AP  
Duration of Exam: 2 Hrs

Max. Marks        : 100  
Continuous Evaluation    : 50  
End Sem Examination    : 50

**Pre-requisites: Basic knowledge of Environment related issues**  
**Course Type: HSMC**

**Course Outcomes :** Students will be able to-

BCH-MC-002.1: Comprehend various environmental issues through various activities.

BCH-MC-002.2: Understand that each and every action of ours reflects on the environment and collaborate in groups to suggest innovative ways to protect environment through project work/report writing.

Idea of an activity based course on environment protection is to sensitize the students on environment related issues through various activities. Students must understand that each and every action of ours reflects on the environment and vice versa.

**Activities:**

- i) Small group meetings about conservation and management of natural resources, conservation of biodiversity, solid waste management and environmental remediation
- ii) Visit to a local polluted site-Urban/Rural/Industrial/Agricultural
- iii) Expert talk
- iv) Slogan writing /Poster making event
- v) Cycle rally to create awareness on issues like pollution control, cleanliness, and waste management.
- vi) Plantation activity
- vii) Cleanliness drive
- viii) Drive for segregation of waste
- ix) Visit to an area to document environmental assets: river/ forest/ flora/fauna, etc.
- x) Environment protection related efforts

**Distribution of marks:**

Continuous Evaluation Marks

Evaluation based on participation in activities: 50 marks

End Sem Examination Marks

Field work, Report writing & Viva: 20+20+10 = 50 marks

(Humanities and Social Sciences including Management Courses)

Periods/week Credits  
L: 0 T:0 P:2 1

Max. Marks : 100  
Continuous Evaluation: 50  
End Semester Exam (Written) : 50

**Prerequisites:**

Basic knowledge of English language

**Course Type: HSMC**

**Course Outcomes:**

- BHM-151.1. Students would be able to speak in English confidently.
- BHM-151.2. To develop the understanding of correct pronunciation and intonation.
- BHM-151.3. Students would be able to communicate professionally in a corporate environment.

**List of Activities**

1. Listening exercises for correct pronunciation and intonation
2. Role plays for speaking confidently
3. Group Discussions
4. Extempore
5. Mock Interviews
6. In Class Presentations
7. JAM Sessions
8. Theatre activity

# **SEMESTER – III**

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-301: DATA STRUCTURES & ALGORITHMS**

Periods/week	Credits	Max. Marks	: 200	
L :3	T: 1	4.0	Continuous Evaluation	: 100
Duration of Exam: 3 Hrs		End Sem Examination	: 100	

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-301.1. Define the concepts of data structures, searching, sorting and their complexity
- BCS-DS-301.2. Understand the structured data types and their applications
- BCS-DS-301.3. Apply the data structures to real life problems of sorting, searching, traversal
- BCS-DS-301.4. Analyze the complexity of different data structures operations, sorting and searching
- BCS-DS-301.5. Evaluate the different sorting algorithms in best, average and worst case scenarios
- BCS-DS-301.6. Design the best solution for real life problems using various data structures

**PART-A**

**Unit 1: Introduction**

- 1.1 Basic Terminologies: Elementary Data Organizations, Data Structures
- 1.2 Operations: insertion, deletion, traversal
- 1.3 Analysis of an Algorithm, Asymptotic Notations, Time-Space trade off
- 1.4 Searching: Linear Search and its complexity analysis
- 1.5 Binary Search Techniques and its complexity analysis

**Unit 2: Linked Lists**

- 2.1 Singly linked lists: Representation in memory
- 2.2 Algorithms of several operations: Traversing, Searching
- 2.3 Insertion into, Deletion from linked list
- 2.4 Doubly linked list: operations on it and algorithmic analysis
- 2.5 Circular Linked Lists: all operations their algorithms and the complexity analysis
- 2.6 Header linked List and Header nodes

**Unit 3: Stacks and Queues**

- 3.1 ADT Stack and its operations
- 3.2 Applications of Stacks: Expression Conversion
- 3.3 Evaluation of Infix, prefix and Postfix Expression – corresponding algorithms and complexity analysis
- 3.4 Queues: Definition, Implementation of Linear Queues and Its Operations
- 3.5 Circular Queue, Priority Queues and Its Implementation
- 3.6 Linked representation of Stack and Queue
- 3.7 Queue Algorithms and their analysis
- 3.8 Applications of queues

**PART-B**

**Unit 4: Trees**

- 4.1 Basic Tree Terminologies, Different types of Trees: Binary Tree, Threaded Binary Tree
- 4.2 Binary Search Tree and its operations with complexity analysis
- 4.3 AVL Tree and its operations with complexity analysis
- 4.4 B Tree, B+ Tree: definitions, algorithms and analysis
- 4.5 Applications of Binary Trees

**Unit 5: Graph**

- 5.1 Basic Terminologies and Representations
- 5.2 Graph Traversals Algorithms: Breadth First and Depth First
- 5.3 Minimum Spanning Trees(Prim's and Kruskal's Algorithm)
- 5.4 complexity analysis of Graphs

**Unit 6: Sorting and Hashing**

- 6.1 Objective and properties of different sorting algorithms: Selection Sort
- 6.2 Bubble Sort, Insertion Sort
- 6.3 Quick Sort
- 6.4 Merge Sort, Heap Sort
- 6.5 Performance and Comparison among all the methods
- 6.6 Hashing

**Text Books/ Reference Books:**

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BEC-DS-322: DIGITAL ELECTRONICS AND CIRCUITS**

Periods/week	Credits	Max. Marks	: 200
L: 3	T: 0	3	Continuous Evaluation : 100
Duration of Examination: 3 Hrs		End Sem Examination	: 100

**Pre-requisites: Basic Knowledge of computers**  
**Course Type: Engineering Sciences**

**Course Outcomes :** Students will be able to-

- BEC-DS-322.1. Differentiate between various types of digital techniques.
- BEC-DS-322.2. Design and implement combinational and sequential circuits.
- BEC-DS-322.3. Analyze and implement various types of Flip Flops & counters.
- BEC-DS-322.4. Discuss and distinguish the concepts of A/D and D/A converters.
- BEC-DS-322.5. Explain logic families like TTL, ECL, NMOS, PMOS and CMOS and will be able to implement interface between TTL and CMOS.
- BEC-DS-322.6. Appreciate and communicate the learning for catering to professional ethics and social needs.

**PART-A**

**Unit 1: Fundamentals of Digital Logic Circuits**

- 1.1 Digital Signals, Logic Gates, Concept of Universal Gates, Boolean algebra
- 1.2 Number Systems- Decimal, Binary, Signed Binary, Octal and Hexadecimal, Conversion of Bases
- 1.3 Binary Arithmetic, 2's Complement Arithmetic, BCD Arithmetic
- 1.4 Codes: BCD code, Excess-3 code, Gray code and Alpha-numeric codes
- 1.5 Error Detection and Correction: Parity Method, Hamming Code Method

**Unit 2: Combinational Logic Design**

- 2.1 Standard representation of logic functions: SOP & POS expression & Designing using Logic Gates
- 2.2 Boolean expression minimization techniques: K-Map (up to four variables) , Quine-McCluskey Method
- 2.3 Adder: Binary Adder & Subtractor, BCD Adder & Subtractor
- 2.4 Digital Comparator, Multiplexer, De-multiplexer, Encoder, Decoder
- 2.5 Code Converters, Priority Encoder, BCD to 7 Segment Decoder
- 2.6 Design of Combinational Circuits using ROM, PAL and PLA

**Unit 3: Flip-Flops**

- 3.1 Combinational v/s Sequential Circuits
- 3.2 Latch v/s Flip-Flop
- 3.3 Types of Flip-Flops: S-R, J-K, D & T, Excitation Table of Flip Flops, Toggling & Race around Condition
- 3.4 Master Slave Flip-Flop
- 3.5 Clocked Flip-Flop Design: Conversion from one type of Flip-Flop to another type of Flip-Flop

**PART-B**

**Unit 4: Sequential Logic Design**

- 4.1 Introduction to Shift Registers & Types: SISO, SIPO, PISO and PIPO
- 4.2 Bidirectional Shift Register, Universal Shift Register
- 4.3 Synchronous v/s Asynchronous Counters
- 4.4 Asynchronous Counters: Ripple Counter, Decade Counter, Synchronous Counters: Ring and Johnson Counter
- 4.5 Designing of Asynchronous Counter, Designing of Synchronous Counter

**Unit 5: A/D and D/A Converters**

- 5.1 Requirement of A/D and D/A Conversion
- 5.2 Specifications of D/A Converters, Specifications of A/D Converters

- 5.3 Types of D/A Converter: Weighted Register Type, R-2R Ladder Type DAC
- 5.4 Types of A/D Converters: Successive Approximation Type, Parallel Comparator Type, Dual Slope, Counter Type ADC

**Unit 6: Digital Logic Families**

- 6.1 Unipolar and Bipolar Logic Families, Characteristics of Digital ICs
- 6.2 Bipolar Logic Families: TTL Configuration- Open Collector Output, Totem Pole Output, Tristate Output
- 6.3 ECL
- 6.4 Unipolar Logic Families: NMOS, PMOS, CMOS
- 6.5 Interfacing between TTL and CMOS

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-302A: OBJECT ORIENTED PROGRAMMING**

Periods/week	Credits	Max. Marks	: 200
L :2	T: 1	3.0	Continuous Evaluation : 100
Duration of Exam: 3 Hrs		End Sem Examination	: 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Core**

**Course Outcomes:** Students will be able to -

- BCS-DS-302A.1. Define the procedural and object oriented paradigm with concepts of streams, classes, functions, data and objects.
- BCS-DS-302A.2. Understand dynamic memory management techniques using pointers, constructors, destructors, etc
- BCS-DS-302A.3. Identify the concept of function overloading, operator Overloading, Virtual Functions and Polymorphism.
- BCS-DS-302A.4. Categorize inheritance with the understanding of early and late binding, usage of exception handling, generic programming
- BCS-DS-302A.5. Implement File Handling and stream file operations using Functions and their corresponding pointers also learn to handle errors in File handling.
- BCS-DS-302A.6. Create the Template and Exception and Demonstrate concepts and functionalities of Try, Catch blocks and handle exceptions using throw and re-throw

**PART A**

**Unit-1: Object Oriented Concepts**

- 1.1. Procedure Oriented programming,
- 1.2. Introduction to Object Oriented Programming; Basic Concepts of OOPs: Class, Object, Data Abstraction, Encapsulation (Information Hiding),
- 1.3. Access modifiers: public, protected, private, package.
- 1.4. Polymorphism, Overloading; Inheritance, Reusability,
- 1.5. Dynamic Binding, Message Passing,
- 1.6. Benefits of OOPS concept,
- 1.7. Applications of OOP,
- 1.8. A simple C++ program, keywords, datatypes (basic, user-defined, derived)

**Unit-2: Classes and Objects**

- 2.1 Introduction to classes and objects.
- 2.2 Class Scope, Accessing class members: Variables and Methods.
- 2.3 Initializing class objects with constructors.
- 2.4 Default and Parameterized Constructor.
- 2.5 Constants variables and constant member functions.
- 2.6 Objects as members of class, Abstract Class.
- 2.7 friend function
- 2.8 Dynamic Memory Allocation.
- 2.9 Static Class Members, Proxy Classes, Destructors

**Unit-3: Polymorphism**

- 3.1 Concept of polymorphism.
- 3.2 function overloading
- 3.3 Constructor Overloading,
- 3.4 Operator overloading, Restrictions on Operator Overloading, Overloading operators: <<, >>, Unary Operators, Overloading Binary Operators.
- 3.5 Operator overloading using friend function.
- 3.6 Operator Functions as Class Members versus Friend Functions,

## PART B

### Unit-4: Inheritance

- 4.1 Introduction to Inheritance, Base Classes and Derived Classes.
- 4.2 Types of inheritance,
- 4.3 virtual function, Pure Virtual function,
- 4.4 Abstract base classes: Use of virtual functions in classes.
- 4.5 Pointer to derived class,
- 4.6 Use of Protected and Private Inheritance and Member Functions.
- 4.7 Overriding Base Class Members in a Derived Class,
- 4.8 Use of Constructors and Destructors in derived Classes,
- 4.9 Implicit Derived Class Object to Base Class Object Conversion,
- 4.10 Composition versus Inheritance.

### Unit-5: File Handling

- 5.1 Introduction of file handling, Classes and file stream operations,
- 5.2 Creating sequential files, reading and writing files,
- 5.3 Opening and closing of file, detecting the end of file.
- 5.4 File Modes: sequential and random file modes.
- 5.5 File pointers and their manipulations,
- 5.6 Sequential input and output operations,
- 5.7 Updating a file: sequential and random access files,
- 5.8 Error handling during file operations.

### Unit-6: Templates & Exception Handling

- 6.1 Function Templates, Overloading Function Template,
- 6.2 Class Template, Class Templates and Non-Type Parameters,
- 6.3 Templates and Inheritance, Templates and Friend classes, Templates and Static Members,
- 6.4 Introduction of Exception Handling, Exception Handling mechanisms: Try, Throw, Catch.
- 6.5 Throwing an Exception, Catching an Exception,
- 6.6 Re-throwing an Exception, Exception specifications,
- 6.7 Processing Unexpected Exceptions,
- 6.8 Use of exceptions in inheritance.

End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of networks**  
**Course Type: HSMC**

**Course Outcomes:** The students will be able to-  
BHM-001A.1 Understand Networking basics and the various networking utilities  
BHM-001A.2 Understand the importance of information security  
BHM-001-A.3 Identify the various Internet frauds and various types of attacks faced by a Network.  
BHM-001A.4 Analyze the various cyber laws and its impact over society.  
BHM-001A.5 Evaluate the ethics, privacy rights and audits in cyber security.  
BHM-001A.6 Create the various Information Technologies Acts and rights.

**PART – A**

**Unit 1: Networks and the Internet**

- 1.1 Introduction to Network Basics,
- 1.2 General Architecture of Internet,
- 1.3 IP Addresses.
- 1.4 Uniform Resource Locators and their role,
- 1.5 Basic Network Utilities, IP Config, Ping, Tracert.

**Unit 2: Introduction to Computer Security**

- 2.1 Importance of Information and its Security,
- 2.2 Types of Threats: Malware, Denial of Service Attacks, Web Attacks, Session Hijacking, DNS Poisoning;
- 2.3 Basic Security Terminology.

**Unit 3: Cyber Attacks**

- 3.1 Introduction to Internet Frauds, Phishing, Cyber Stalking, Types of Attacks: Investment Offers, Auction Frauds, Identity Theft,
- 3.2 Protecting Yourself against Cyber Crime, Protecting against Investment Fraud, Protecting against Identity Theft,
- 3.3 Secure Browser Settings.
- 3.4 cyber laws and their scope and coverage,

**PART – B**

**Unit 4: Computer and its impact in Society**

- 4.1. Need for Cyber Law in 21<sup>st</sup> century
- 4.2. Development of Cyber Law in India

**Unit 5: Privacy Issue and Access Rights**

- 5.1. Introduction to Cyber Ethics
- 5.2. Freedom of Speech and Expression in Cyber Space
- 5.3. Right to Privacy and Right to Data protection
- 5.4. Cyber Security Audit

**Unit 6: Information and Technology Act & Intellectual Property Rights**

- 6.1. Historical Background and objectives
- 6.2. Legal Recognition of Electronic Record & Procedure
- 6.3. Offences and Penalties.

**Text Books / Reference Books:**

1. William Easttom, 2011, Computer Security Fundamentals, 2<sup>nd</sup> ed, Pearson.
2. Dr. Pramod Kr. Singh, 2007, Laws on Cyber Crimes, Book Enclave, Jaipur
3. Mark. F. Grady and Francesco Parisi, 2006, The Law and Economics of Cyber Security, Cambridge University Press.

**Instructions for paper setting:** Seven questions are to be set in total. First question will be conceptual covering entire syllabus and will be compulsory to attempt. Three questions will be set from each PART-A and PART-B (one from each unit). Student needs to attempt two questions out of three from each part. Each question will be of 20 marks.

**Distribution of Continuous Evaluation:**

Sessional- I	30%
Sessional- II	30%
Assignment/Tutorial	20%
Class Work/ Performance	10%
Attendance	10%

**Evaluation Tools:**

Assignment/Tutorials  
 Sessional tests  
 Surprise questions during lectures/Class Performance  
 End Semester Examination

**NAAC 'A' Grade University**

**BMA-303: Mathematics-III (Calculus and Algebra)**

Periods/week Credits  
L :2 T: 0 2.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-requisites:** The students must have the knowledge of basic concepts of calculus of Intermediate level.

**Course Type:** Basic Sciences

**Course Outcomes:** Students will be able to-

- BMA-303.1. Understand the role of power series in engineering.
- BMA-303.2. Apply the knowledge of differentiation in real life problems.
- BMA-303.3. Understand the concept of ordinary differential equations.
- BMA-303.4. Demonstrate the applications of special functions.
- BMA-303.5. Apply the knowledge of differentiation in real life problems.
- BMA-303.6. Illustrate the nature of vectors and differential operators.

**PART-A**

**Unit 1: Sequences and series**

Convergence of sequence and series, tests for convergence, Power series, Taylor's series, series for exponential, trigonometric and logarithm functions.

**Unit 2: Multivariable Calculus (Differentiation)**

Limit, continuity and partial derivatives, directional derivatives, total derivative, Tangent plane and normal line, Maxima, minima and saddle points, Method of Lagrange multipliers, gradient, curl and divergence.

**PART-B**

**Unit 3: First Order Ordinary Differential Equations**

Exact, linear and Bernoulli's equations, Euler's equations, Equations not of first degree: equations solvable for  $y$ , equations solvable for  $p$ , equations solvable for  $x$  and Clairaut's type

**Unit 4: Ordinary Differential Equations of Higher Orders**

Second order linear differential equations with variable coefficients, method of variation of parameters, Cauchy-Euler equation, Power series solutions; Legendre polynomials, Bessel functions of the first kind and their properties.

(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-351: DATA STRUCTURES & ALGORITHMS LAB**

Periods/week	Credits	Max. Marks	: 100
P :2	1.0	Continuous Evaluation	: 50
Duration of Exam: 2 Hrs		End Sem Examination	: 50

**Co-Requisite: Data Structures & Algorithms (BCS-DS-301)**  
**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-351.1. Define the iterative and recursive approach
- BCS-DS-351.2. Understand the various Data structures using C
- BCS-DS-351.3. Deploy the advance C programming techniques such as pointers, dynamic memory allocation, and structures to developing solutions for particular problems
- BCS-DS-351.4. Analyze various operation performed on elementary data structures
- BCS-DS-351.5. Select the appropriate data structures based upon problem environment
- BCS-DS-351.6. Design the solutions for the real-world problems

**List of Practicals:**

1. (a) Write a program to find factorial of a number through iterative method.  
(b) Write a program to find factorial of a number through recursion.
2. (a) Write a program to print the Fibonacci series through iterative method.  
(b) Write a program to print the Fibonacci series through recursion.
3. (a) Write a program to find an element in linear array using linear search.  
(b) Write a program to find an element in multi-array using linear search.
4. (a) Write a program to find an element in linear array using Binary search(Iterative).  
(b) Write a program to find an element in linear array using Binary search(Recursive).
5. Write a program to implement stack data structures statically and perform the following functions:  
a) Insertion      b) Deletion      c) Traversing
6. Write a program to convert infix notation to postfix notation using stack (application of stack).
7. Write a program to evaluate infix notation using stack (application of stack).
8. Write a program to implement linear queue data structures statically and perform the following functions:  
a) Insertion      b) Deletion      c) Traversing
7. Write a program to implement circular queue data structures statically and perform the following functions:  
a) Insertion      b) Deletion      c) Traversing
8. Write a program to implement dequeue(double ended queue) data structures statically. Ask from user for the type of dequeue to be implemented and call the functions accordingly.
9. Write a program for a menu-driven program that enable user to implement linked-list with all possible operations:  
a) Insertion at end      b) Insertion at beginning      c) Insertion at Specified Position  
d) Deletion at end      e) Deletion at beginning      f) Deletion at Specified Position  
g) Traversing      h) Counting the nodes
10. Write a program for a menu-driven program that enable user to implement circular linked-list with all possible operations:  
b) Insertion at end      b) Insertion at beginning      c) Insertion at Specified Position  
e) Deletion at end      e) Deletion at beginning      f) Deletion at Specified Position  
h) Traversing      h) Counting the nodes
11. Write a program for a menu-driven program that enable user to implement doubly linked-list with all possible operations:  
c) Insertion at end      b) Insertion at beginning      c) Insertion at Specified Position  
f) Deletion at end      e) Deletion at beginning      f) Deletion at Specified Position  
i) Traversing      h) Counting the nodes

12. Write a program for various tree traversal algorithms (Pre, Post, In order) using two dimensional representations for trees.
13. Write a program to simulate BFS graph traversing algorithms.
14. Write a program to simulate DFS graph traversing algorithms.
15. Write a program to implement MST using Prim's Algorithms
16. Write a program to implement MST using Kruskal's Algorithms
17. Write a Program to sort data using
  - a) Selection Sort
  - b) Insertion Sort
  - c) Bubble Sort
  - d) Quick Sort
  - e) Merge Sort
  - f) Heap Sort

**NAAC 'A' Grade University**

**BEC-DS-362: DIGITAL ELECTRONICS AND CIRCUITS LAB**

Periods/week Credits		Max. Marks	: 100
P: 2	1	Continuous Evaluation	: 50
Duration of Examination: 2 Hrs		End Sem Examination	: 50

**Co-requisites: Digital Electronics and Circuits (BEC-DS-322)**  
**Course Type: Engineering Science**

**Course Outcomes:** Students will be able to-

- BEC-DS-362.1. Execute the operations of various TTL gates.
- BEC-DS-362.2. Apply K map minimizing procedures for circuit realization.
- BEC-DS-362.3. Analyze and implement combinational circuits.
- BEC-DS-362.4. Analyze and implement various sequential circuits.
- BEC-DS-362.5. Demonstrate the working of various logic families.
- BEC-DS-362.6. Appreciate and communicate the learning for catering to professional ethics and societal needs.

**List of Experiments:**

1. To verify the truth tables of TTL gates: AND, OR, NOT, NAND, NOR & EX-OR Gates.
2. To design and realize a Boolean function using K map.
3. To realize half/full adder and half/full subtractor using:  
i. X-OR and basic gates ii. Only NAND gates.
4. To verify the operation of Multiplexer and Demultiplexer.
5. To verify BCD to excess -3 code conversion using NAND gates
6. To verify the truth table of comparator.
7. To verify the truth tables of S-R, J-K, T and D type flip flops.
8. To verify the operation of bi-directional shift register.
9. To design and verify the operation of 3-bit synchronous counter.
10. To design the operation of a Ring counter.
11. To design the operation of a Johnson counter.
12. To design and verify the operation of asynchronous UP / DOWN decade counter using J-K flip flops.
13. To design and verify the operation of synchronous UP / DOWN decade counter using J-K flip flops.
14. To design and realize a sequence generator for a given sequence using J-K flip flops.

**PROJECTS BASED ON ABOVE EXPERIMENTS:**

1. Design various logic gates using transistor
2. Design and verify the operation of 2-bit synchronous counter using JK flip flops
3. Design a binary to gray code converter using gates
4. Design visitor counter using BCD to 7 Segment Display
5. Design and verify the operation of logic gates using Multiplexer

**NOTE:** Every student needs to do minimum 10 numbers of experiments/practicals and 1 project in a semester. 20% new experiments should be added every year.

(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-352: OBJECT ORIENTED PROGRAMMING SYSTEMS LAB**

Periods/week	Credits	Max. Marks	: 100
P :2	1.0	Continuous Evaluation	: 50
Duration of Exam: 2 Hrs		End Sem Examination	: 50

**Co-Requisite: Object Oriented Programming (BCS-DS-302A)**  
**Course Type: Program Core**

**Course Outcomes:** Students will be able to -

- BCS-DS-352.1 Define the procedural and object oriented paradigm with concepts of streams, classes, functions, data and objects.
- BCS-DS-352.2. Understand the concept of dynamic memory management techniques using pointers, constructors, destructors, etc
- BCS-DS-352.3. Apply function overloading, operator Overloading, Virtual Functions and Polymorphism.
- BCS-DS-352.4. Classify inheritance with the understanding of early and late binding, usage of exception handling, generic programming
- BCS-DS-352.5. Evaluate File Handling and stream file operations using Functions and their corresponding pointers also learn to handle errors in File handling.
- BCS-DS-352.6. Design the Template and Exception and Demonstrate concepts and functionalities of Try, Catch blocks and handle exceptions using throw and re-throw.

**List of Practicals:**

- Q1. Raising a number  $n$  to a power  $p$  is the same as multiplying  $n$  by itself  $p$  times. Write a function called `power ( )` that takes a double value for  $n$  and an int value for  $p$ , and returns the result as double value. Use a default argument of 2 for  $p$ , so that if this argument is omitted, the number will be squared. Write a main ( ) function that gets values from the user to test this function.
- Q2. A point on the two dimensional plane can be represented by two numbers: an X coordinate and a Y coordinate. For example, (4,5) represents a point 4 units to the right of the origin along the X axis and 5 units up the Y axis. The sum of two points can be defined as a new point whose X coordinate is the sum of the X coordinates of the points and whose Y coordinate is the sum of their Y coordinates.  
Write a program that uses a structure called point to model a point. Define three points, and have the user input values to two of them. Then set the third point equal to the sum of the other two, and display the value of the new point. Interaction with the program might look like this:
- ```
Enter coordinates for P1:      3  4
Enter coordinates for P2:      5  7
Coordinates of P1 + P2 are :  8, 11
```
- Q3. Create the equivalent of a four function calculator. The program should request the user to enter a number, an operator, and another number. It should then carry out the specified arithmetical operation: adding, subtracting, multiplying, or dividing the two numbers. (It should use a switch statement to select the operation). Finally it should display the result.  
When it finishes the calculation, the program should ask if the user wants to do another calculation. The response can be 'Y' or 'N'. Some sample interaction with the program might look like this.

```
Enter first number, operator, second number: 10/ 3
Answer = 3.333333
Do another (Y/ N)? Y
Enter first number, operator, second number 12 + 100
Answer = 112
Do another (Y/ N) ? N
```

Q4. Phone number, such as (212) 767-8900, can be thought of as having three parts: the area code (212), the exchange (767) and the number (8900). Write a program that uses a structure to store these three parts of a phone number separately. Call the structure phone. Create two structure

variables of type phone. Initialize one, and have the user input a number for the other one. Then display both numbers. The interchange might look like this:

```
Enter your area code, exchange, and number: 415 555 1212
My number is (212) 767-8900
Your number is (415) 555-1212
```

- Q5. Create two classes DM and DB which store the value of distances. DM stores distances in metres and centimeters and DB in feet and inches. Write a program that can read values for the class objects and add one object of DM with another object of DB. Use a friend function to carry out the addition operation. The object that stores the results maybe a DM object or DB object, depending on the units in which the results are required. The display should be in the format of feet and inches or metres and centimetres depending on the object on display.
- Q6. Create a class rational which represents a numerical value by two double values- NUMERATOR & DENOMINATOR. Include the following public member Functions:
- constructor with no arguments (default).
  - constructor with two arguments.
  - void reduce( ) that reduces the rational number by eliminating the highest common factor between the numerator and denominator.
  - Overload + operator to add two rational number.
  - Overload >> operator to enable input through cin.
  - Overload << operator to enable output through cout.
- Write a main ( ) to test all the functions in the class.
- Q7. Consider the following class definition
- ```
class father {
protected :int age;
public;
    father (int x) {age = x;}
    virtual void iam ( )
    { cout<< "I AM THE FATHER, my age is : "<< age<< endl;}
};
```
- Derive the two classes son and daughter from the above class and for each, define iam ( ) to write our similar but appropriate messages. You should also define suitable constructors for these classes. Now, write a main ( ) that creates objects of the three classes and then calls iam ( ) for them. Declare pointer to father. Successively, assign addresses of objects of the two derived classes to this pointer and in each case, call iam ( ) through the pointer to demonstrate polymorphism in action.
- Q8. Demonstrate C++ program to read and print **student's information and their parents information** using two classes. Student class and parent class detail of the classes are  
Student class: Name, Age, Course, Marks in 12<sup>th</sup>, rank  
Parent class: Name, Age, Profession, address, qualification
- Q9. Write a program that creates a binary file by reading the data for the students from the terminal. The data of each student consist of roll no., name (a string of 30 or lesser no. of characters) and marks.
- Q10. A hospital wants to create a database regarding its indoor patients. The information to store include
- a) Name of the patient
  - b) Date of admission
  - c) Disease
  - d) Date of discharge
- Create a structure to store the date (year, month and date as its members). Create a base class to store the above information. The member function should include functions to enter information and display a list of all the patients in the database. Create a derived class to store the age of the patients. List the information about all to store the age of the patients. List the information about all the pediatric patients (less than twelve years in age).
- Q11. Make a class **Employee** with a name and salary. Make a class **Manager** inherit from **Employee**. Add an instance variable, named department, of type string. Supply a method to **toString** that prints the manager's name, department and salary. Make a class **Executive** inherit from **Manager**.

Supply a method **to String** that prints the string **"Executive"** followed by the information stored in the **Manager** superclass object. Supply a test program that tests these classes and methods.

Q12. Imagine a tollbooth with a class called toll Booth. The two data items are a type unsigned int to hold the total number of cars, and a type double to hold the total amount of money collected. A constructor initializes both these to 0. A member function called payingCar ( ) increments the car total and adds 0.50 to the cash total. Another function, called nopayCar ( ), increments the car total but adds nothing to the cash total. Finally, a member function called displays the two totals. Include a program to test this class. This program should allow the user to push one key to count a paying car, and another to count a nonpaying car. Pushing the ESC key should cause the program to print out the total cars and total cash and then exit.

Q13. Write a function called reversit( ) that reverses a string (an array of char). Use a for loop that swaps the first and last characters, then the second and next to last characters and so on. The string should be passed to reversit ( ) as an argument.  
Write a program to exercise reversit ( ). The program should get a string from the user, call reversit ( ), and print out the result. Use an input method that allows embedded blanks. Test the program with Napoleon’s famous phrase, "Able was I ere I saw Elba)".

Q14. Create some objects of the string class, and put them in a Deque-some at the head of the Deque and some at the tail. Display the contents of the Deque using the forEach ( ) function and a user written display function. Then search the Deque for a particular string, using the first That ( ) function and display any strings that match. Finally remove all the items from the Deque using the getLeft ( ) function and display each item. Notice the order in which the items are displayed: Using getLeft ( ), those inserted on the left (head) of the Deque are removed in "last in first out" order while those put on the right side are removed in "first in first out" order. The opposite would be true if getRight ( ) were used.

Q15. Create a base class called shape. Use this class to store two double type values that could be used to compute the area of figures. Derive two specific classes called triangle and rectangle from the base shape. Add to the base class, a member function get\_data ( ) to initialize base class data members and another member function display\_area ( ) to compute and display the area of figures. Make display\_area ( ) as a virtual function and redefine this function in the derived classes to suit their requirements. Using these three classes, design a program that will accept dimensions of a triangle or a rectangle interactively and display the area.  
Remember the two values given as input will be treated as lengths of two sides in the case of rectangles and as base and height in the case of triangles and used as follows:

$$\begin{aligned} \text{Area of rectangle} &= x * y \\ \text{Area of triangle} &= \frac{1}{2} * x * y \end{aligned}$$

# MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES

(Deemed to be University under section 3 of the UGC Act 1956)

**NAAC 'A' Grade University**

## **DTI -300: Design, Thinking and Innovation-I**

Periods/week Credits  
L:0 T:1 P:0 1

Max. Marks : 50  
Continuous Assessment : 50

**Pre-requisites: Nil**

**Course Type: Research & Training**

### **Course Outcomes:**

DTI 300.1. To explore different sources for generating ideas for Research.

DTI 300.2. To understand the problem classification based on domain specific resources.

DTI 300.3. To realize the design thinking stages.

DTI 300.4. To present critical analysis of literature survey.

### **Activity 1: Motivation**

- 1.1 Divergent thinking and brain storming
- 1.2 Creative process

### **Activity 2: Introduction to Design Thinking**

- 2.1 Empathize Mode
  - 2.1.1 Discussions and deliberations
- 2.2 Define Mode
- 2.3 Ideate Mode
  - 2.3.1 Contemporary Relevance.
  - 2.3.2 Tools and techniques for generating ideas
  - 2.3.3 Idea Challenges

### **Activity 3: Problem Classification**

- 3.1 Domain Classification.
- 3.2 Identification of Mentors

### **Activity 4: Problem identification**

- 4.1 Literature survey and option analysis.
- 4.2 Feasibility study.
- 4.3 Formulation of problem statement.
- 4.4 Expected Outcome / Model of the problem.
- 4.5 Planning Matrix

### **Activity 5: Presenting the Ideation**

- 5.1 Structuring and preparation of PPT
- 5.2 Review on presentation skills and content delivered
- 5.3 Incorporating the review comments.

**Course Articulation Matrix:**

CO Statement (DTI-300)	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2
DTI 300.1	1	2	-	-	1	-	2	3	3	3	2	2	-	3
DTI 300.2	2	3	-	-	2	3	3	2	2	2	2	3	3	-
DTI 300.3	3	3	1	2	3	2	2	3	2	-	-	2	2	2
DTI 300.4	3	3	1	2	3	3	2	3	3	-	2	2	3	-

**'3' (Tick) or 'More' Substantial/High Correlation, '2' Moderate/Medium Correlation, '1' Slightly/Low Correlation, 'Blank' No Correlation**

**Evaluation Criteria:** The following evaluation parameters shall be considered for internal assessment by both research coordinators and faculty coordinator or research mentors:-

S. No:	Parameters	Description	Marks	
1.	<b>Attendance</b>	Percentage of classes attended by the students	5	5
2.	<b>Continuous Performance</b>	Group participation and response of the students to a given task:		15
		Judge individual student in the group	5	
		Meeting timelines as per activity plan	10	
3.	<b>Literature Review</b>	Student interaction with faculty mentors	5	15
		Relevance of the topic	3	
		Usage of Scientific Literature Databases. e.g., Scopus/ Web of Science/ etc.	2	
		Number of relevant papers / design referred for the given topic	5	
4.	<b>PPT &amp; Report</b>	Report structure and Slide sequence	5	15
		Contribution of individual group member towards the presentation and report	5	
		Scientific/Technical writing	5	
<b>Max. Marks</b>			<b>50</b>	<b>50</b>

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BHM-MC-004: QUANTITATIVE APTITUDE**

Periods/week Credits  
P :2 0  
Duration of Exam: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Pre-Requisite: Basic Knowledge of XII standard maths**  
**Course Type: HSMC**

**Course Outcomes:** Students will be able to-

- BHM-MC-004.1. Recognize problems based on arithmetic & number system.
- BHM-MC-004.2. Solve problems based on verbal reasoning & simplification.
- BHM-MC-004.3. Calculate the correct answers to the problems within given time.
- BHM-MC-004.4. Plan their career meticulously by setting their time oriented goals.
- BHM-MC-004.5. Introspect and enhance their personality.
- BHM-MC-004.6. Develop cultural sensitivity and communicate respectfully across cultures.

**PART – A**

**Unit 1: Number System 1**

- 1.1 Vedic Mathematics
  - 1.1.1 Basic of mathematics
  - 1.1.2 Addition and subtraction using Vedic Mathematics
  - 1.1.3 Multiplication of two and three numbers.
- 1.2 Simplification
  - 1.2.1 BODMAS rule
  - 1.2.2 Fractions and recurring decimals
  - 1.2.3 Surds and indices
- 1.3 Numbers
  - 1.3.1 Types of numbers and number tree
  - 1.3.2 Divisibility Rule
  - 1.3.3 HCF & LCM

**Unit 2: Verbal Reasoning 1**

- 2.1 Direction Sense Test
- 2.2 Blood Relation Test

**Unit 3: Arithmetic 1**

- 3.1 Problem on Ages
- 3.2 Problem on Numbers
- 3.3 Averages

**PART – B**

**Unit 4: Career Planning**

- 4.1 **Career planning Process** - Self Assessment, Research, Decision Making, Action and Employability
- 4.2 **Goal Setting:** Relevance, SMART goals, The Dos & Don'ts

**Unit 5: Personality Enhancement**

- 5.1 **Emotional Intelligence:** Emotional Self -Awareness, Self- Control, Emotional Management
- 5.2 **Stress Management:** What is Stress, Types of Stress, Stress Response Example, Vulnerability to Stress, Why do we Stress out, Stress Warning Symbols, Suggestions for Reducing Stress,
- 5.3 **Time Management:** Setting Priorities, Managing Time, Four Quadrants of Time Management
- 5.4 **Team Building:** Definition –Team, Characteristics of effective Teams, Competence,

Clear and Compelling goal, Supportive Environment, Alignment, Designing the Team, Identifying Roles and Responsibilities, Determining Reward, Troubleshooting Guide, Good Team member

**Unit 6: Effective Communication**

- 6.1 **Courtesy in Communication:** Being Polite, Self -Discipline, Respecting Others and understanding other’s perspective in communication
- 6.2 **Inter cultural Communication:** Breaking Stereotypes, Diversity Inclusion and Cultural Sensivity

**Text Books/Reference Books:**

- 1. R S Aggarwal, 2017, Quantitative Aptitude for Competitive Examinations, S Chand & Company Pvt Ltd
- 2. R S Aggarwal, 2018, A Modern Approach to Verbal& Non Verbal Reasoning, S Chand & Company Pvt Ltd.
- 3. Mark A Griffin, College to Career: The Student Guide to Career and Life Navigation.
- 4. Anthony Gutierrez, Effective Communication in the Workplace.

**Instructions for paper setting:** Fifty MCQ will be set in total. TwentyFive MCQ will be set from Part A and Twenty Five MCQ will be set from Part B. All questions will be compulsory. Each question will be of 1 mark. There will be no negative marking. Calculator will not be allowed.

**Distribution of Continuous Evaluation:**

Sessional- I	30%
Sessional- II	30%
Assignment/Tutorial	20%
Class Work/ Performance	10%
Attendance	10%

**Course Articulation Matrix:**

# MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES

(Deemed to be University under section 3 of the UGC Act 1956)

NAAC 'A' Grade University

**BHM-MC-002: SPORTS AND YOGA**

Periods/week Credits  
L: 2 T: 0 0

Max. Marks : 100  
Continuous Evaluation : 100

Duration of Examination: 1Hr

**Pre-requisite: None**

**Course Type: HSMC**

**Course Outcomes:** The course will enable the student to-

BHM-MC-002.1. Understand the importance of sound health and fitness principles as they relate to better health.

BHM-MC-002.2. Participate in variety of physical and yogic activities aimed at stimulating their continued inquiry about Yoga, physical education, health and fitness.

## **Unit 1: Introduction to Physical Education, Wellness & Lifestyle (6 Lectures)**

Meaning & definition of Physical Education, Aims & Objectives of Physical Education, changing trends in Physical Education, Meaning & Importance of Physical Fitness & Wellness, Components of Physical fitness, Health related fitness and wellness, Preventing Health Threats through Lifestyle Change, Concept of Positive Lifestyle.

## **Unit 2: Fundamentals of Anatomy & Physiology in Physical Education, Sports & Yoga (8 Lectures)**

Define Anatomy, Physiology & Its Importance, Effect of exercise on the functioning of various body systems (Circulatory System, Respiratory System, Neuro-Muscular System etc.), Meaning and Concept of Postures, Causes of Bad Posture, Advantages & disadvantages of weight training., Concept & advantages of Correct Posture, Common Postural Deformities – Knock Knee; Flat Foot; Round Shoulders; Lordosis, Kyphosis, Bow Legs and Scoliosis, Corrective Measures for Postural Deformities.

## **Unit 3: Yoga & Lifestyle (6 Lectures)**

Elements of Yoga, Introduction - Asanas, Pranayama, Meditation & Yogic Kriyas, Yoga for concentration & related Asanas, Relaxation Techniques for improving concentration - Yog-nidra, Asanas as preventive measures.

## **Unit 4: Training, Planning & Psychology in Sports (8 Lectures)**

Meaning of Training, warming up and limbering down, Skill, Technique & Style, Meaning and Objectives of Planning, Tournament – Knock-Out, League/Round Robin & Combination. Definition & Importance of Psychology in Physical Edu. & Sports, Define & Differentiate Between Growth & Development, Adolescent Problems & Their Management, Psychological benefits of exercise.

### **Text Books/References:**

1. Ajmer Singh and Rachhpal Singh Brar, 2019, Essentials of Physical Education, Kalyani Publishers.
2. B.K.S. Iyengar, 2015, Yoga for Sports, Westland publications.

### **Evaluation Tools:**

**Class Quiz, Rubrics**

**Proj-CS-300A: SUMMER INTERNSHIP –I**

Periods/week	Credits	Max. Marks	: 50
2 weeks Minimum	1.0	Continuous Evaluation	: 50
Duration of Exam: 2 Hrs			

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Projects**

**Course Outcomes:** Students will be able to-  
Proj-CS-300A.1. Recognize the real field challenges.  
Proj-CS-300A.2. Apply their learning skills for real- life problem solution.  
Proj-CS-300A.3. Identify their areas of interest in research.  
Proj-CS-300A.4. Enhance their innovative skills.  
Proj-CS-300A.5. Develop solutions for specific problem.  
Proj-CS-300A.6. Prepare a summarized report.

**i.Introduction to git and github**

**Requirements:** Lab with Linux OS installed. Preferably Ubuntu 18.04 LTS

Contents

Day 1: Setting up a local repository & remote repository

git init  
git clone  
git config  
git alias  
Commands on github

Day 2: Saving Changes

git add  
git commit  
git diff  
git stash  
gitignore  
commands on git hub

Day 3: Inspecting a repository

git status  
git tag  
git blame  
git branch  
commands on git hub

Day 4: Undoing Changes

git checkout  
git clean  
git revert  
git reset  
git rm

Day 5: Rewriting History

git commit –amend  
git rebase  
git rebase -i  
git reflog

## ii.Presentation

Presentation topics can include:

- a. Developing a professional profile with LinkedIn
- b. Supply Chain Management
- c. Free and Open Source Software's
- d. Introduction to GitHub and SourceForge.net
- e. Storage Technologies
- f. Geographical Information System
- g. IDS and Firewalls
- h. Professional certifications in the area of Networks and their requirements (Cisco, Redhat)
- g. Professional certifications in the area of Cloud Computing and their requirements
- h. Professional certifications in the area of Cyber security and their requirements
- i. Professional certifications in the area of Graphics and Gaming
- j. Professional certifications in the area of Big Data Analytics
- k. Industry 4.0
- l. Academics 4.0
- m. Intrusion detection system
- n. Software reverse engineering
- o. Mobile operating systems
- p. linux variants
- q. Virtualization technologies
- r. Open Source libraries for graphics (OpenGL)
- s. Technologies involved in Cloud Setup
- t. Alternative to Microsoft office software and their comparison
- u. Open Source Software based firewalls and their setup
- v. Digital Marketing: applications and processes
- w. Customer Identity Access Management
- x. Network monitoring : softwares, implementations and applications
- y. Chatbots: Introduction, working and applications
- z. Ngix Server: Introduction, working and Applications
- aa. Free and open source based plot libraries
- ab. Linux Kernel Programming
- ac. Real Time Operating system
- ad. Free and open source based antivirus softwares
- ae. e-learning platforms for technical courses and their comparison
- af. e-learning technologies for the course development and hosting

## iii. Course Title: Javascript Programming

**Pre-requisites:** c(or any programming language), HTML5, CSS, XML

**Requirements:** System with notepad and internet connection

**Objective:** The candidate should be able to understand the key technologies involved in web development including javascript, bootstrap, jquery and angular js. The student will be able to develop the web based solution, after the successful completion of the course.

Unit1: Getting Started (2 Hours): JavaScript Foundation, Variables, Boolean, Operators( Mathematical, logical, relational, bitwise), Control Flow, Functions and methods, data type conversion, input and output, date and time functions.

Unit2: Scope, Arrays and Iterations (2 hours): Scope of variable, 1/2/3 dimensional arrays, loop statements (for, while), functions, alerts, prompts,

Unit3: Objects, Errors and Debugging (2 hours): Objects, Advanced objects and this keywords, erro, error handling, pattern Matching

Unit4: Document Object Model(2 hours):browser and javascript, getting access to the form elements, setting the properties of elements at run time, handling page events, Cookies, Introduction to Ajax

Unit5: Jquery (2 hours):Getting started, selectors, events, effects, get/set/add/remove, CSS classes, dimensions, traversal.

Unit6: Responsive web design (2 hours):Introduction to RWD, bootstrap Frameworks, typographic, colors, tables, buttons, images, jumbotron, cards, navs, navbar, badges, Collaps, Carousel, toast, scrollspy.

Unit7: Angular JS (2 hours): Introduction, expressions, modules, directives, model, data binding

Unit8: Angular JS (2hours): Controllers, scopes, filters, services, http, tables, select, DOM, Events, Forms, Validation

Unit9: Angular JS(2hours): include, animations, routing

Unit10: Revision and small project (2 hours)

iv. **Course Title: C Programming**

**Pre-requisites:** NIL

**Requirements:** internet connection

C program to solve Polynomial and Differential Equations.

C program to declare memory for an integer variable dynamically.

C program to read and print name, where memory for variable should be declared at run time.

C program to find sum of array elements using Dynamic Memory Allocation.

C Program to find the sum of digits of a number until a single digit is occurred.

C program to find class of an IP Address.

C program to print weekday of given date.

EMI Calculator (C program to calculate EMI).

Implement Tic Tac Toe.

Implement stone paper scissor game.

To implement Quick sort.

To implement structure of an employee using Pointers.

**Distribution of Continuous Evaluation:**

Presentation/Viva	40%
Report	20%
Class Work/ Performance	20%
Attendance	20%

**COURSE ARTICULATION MATRIX :**

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-201: WEB PROGRAMMING THROUGH PHP & HTML**

Periods/week Credits    Max. Marks    : 200  
L: 3    T: 0    3.0  
Duration of Examination: 3 Hrs

Continuous Evaluation : 100  
End Term Examination :100

**Pre-Requisite:** Nil  
**Course Type:** Program Elective

**Course Outcomes:** Students will be able to-  
BCS-DS-201.1: Design web pages.  
BCS-DS-201.2: Apply technologies of Web Programming.  
BCS-DS-201.3: Experiment object oriented aspects to Scripting.  
BCS-DS-201.4: Create connections with databases.

**PART – A**

**Unit 1: PHP Basics**

- 1.1 Introduction to Hypertext Preprocessor (PHP)
- 1.2 Support for Database, PHP Installation
- 1.3 Working with PHP, Why PHP?
- 1.4 Basic Syntax of PHP, PHP statement terminator and case insensitivity
- 1.5 Embedding PHP in HTML
- 1.6 Comments, Variables, Assigning value to a variable
- 1.7 Constants, Managing Variables

**Unit 2: Operators, Controls Structures and Functions in PHP**

- 2.1 Arithmetic Operators, Bit-wise Operators, Comparison Operators, Logical Operators, Concatenation Operator, Incrementing/Decrementing Operator, Ternary Operator, Operator Precedence
- 2.2 String Manipulation: strtoupper(), strtolower(), ucfirst(), ucwords(), strcmp(), strlen(), substr(), trim()
- 2.3 Conditional Control Structures: If statement, If- else statement, If- else if statement, Nested If
- 2.4 Switch statement
- 2.5 Looping Control Structures: For loop, While loop
- 2.6 Do- While loop, For-each, Loop control: Break and Continue
- 2.7 Functions, User-Defined function, Function Definition, Function Call
- 2.8 Function with arguments, Function with return value, Call by value and call by references
- 2.9 Understanding variable scope, Global Variables, Static Variables, Include and Require, Built-in functions in PHP

**Unit 3: Arrays and PHP File Handling**

- 3.1 Introduction to Array, Array in PHP
- 3.2 Creating an Array, Accessing Elements of an Array, Modifying Elements of an Array
- 3.3 Finding the Size of an Array, Printing an Array in the readable Way, Iterating Array Elements
- 3.4 Modifying Array while iteration, Iterating Array with Numeric index, Removing Element from an Array  
Converting an Array to String, Converting String to an Array
- 3.5 Array Sorting
- 3.6 Multidimensional Array, Accessing elements of a Multidimensional Array, Iterating Multidimensional Array
- 3.7 Introduction, File Open, File Creation, Writing to files, Reading from File, Searching a record from a file, Closing a File
- 3.8 Using PHP with HTML Forms

**PART – B**

#### **Unit 4: Class, Object and Exception Handling, JAVA Script**

- 4.1 Introduction, Object, Class, Defining Class in PHP
- 4.2 Object in PHP, Usage of \$this variable
- 4.3 Constructor, Constructor with Parameters
- 4.4 Introduction to Exception, Exception Handling mechanisms
- 4.5 Creating Custom Exceptions, Multiple Catch Blocks
- 4.6 Exception Propagation, Error Handling in PHP
- 4.7 Java Introduction
- 4.8 JavaScript Basics

#### **Unit 5: Advanced PHP-Form Handling, Session Management**

- 5.1 CreatingForms in HTML
- 5.2 GET and POST, Accessingform data
- 5.3 File Uploading
- 5.4 Session Management, Startinga Session, ManipulatingwithExisting Session

#### **Unit 6: Database and MYSQL, XML, PHP Development using Eclipse**

- 6.1 DatabaseDefinition and Basics
- 6.2 MYSQL, SQL, SQL Functions
- 6.3 PHP and MYSQL, ExecuteQueries
- 6.4 XML, XML SyntaxRules
- 6.5 Creating a Document Object Model (DOM)Document
- 6.6 Eclipse Overview
- 6.7 Creating a PHP Project

#### **Text Books / Reference Books:**

1. Web Programming through PHP: 2nd Ed., Dec 2014, IBM ICE Publication.
2. PHP Bible: Tim Converse,Joyce Park, 2nd Ed., Oct 2002, John Wiley and Sons
3. PHP A beginners guide: William McCarty, Bill McCarty, 1st Ed. ,2001,McGraw Hill Professional

**BCS-DS-251A: WEB PROGRAMMING THROUGH PHP & HTML LAB**  
(CC, BA, CF, GG)

Periods/week Credits  
P: 2 1.0  
Duration of Exam: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Pre-Requisite: Nil**  
**Course Type: Program Elective**

**Course Outcomes:** Students will be able to-  
BCS-DS-251A.1 Execute basic programs in PHP.  
BCS-DS-251A.2 Implement functions and arrays in PHP.  
BCS-DS-251A.3 Embed PHP in HTML.  
BCS-DS-251A.4 Implement concept of Classes and Objects in PHP.  
BCS-DS-251A.5 Implement Java Scripting in PHP projects.

**List of Practicals:**

**1. Basics Programming**

- Exercise 1 – Branching Statements using character
- Exercise 2 - Branching Statements using number
- Exercise 3 – Looping Statement
- Exercise 4 – String Functions
- Exercise 5 – String Manipulation
- Exercise 6 - Calculator
- Exercise 7 - Strings

**2. Practicals using Functions**

- Exercise 8 – Generate Employee ID
- Exercise 9 – Calculate Tax
- Exercise 10 – Reverse a string
- Exercise 11 – Call by value and Call by reference
- Exercise 12 – Find Grade

**3. Practicals using Arrays**

- Exercise 13 – Sorting
- Exercise 14 – Find grade
- Exercise 15 – Sort Array
- Exercise 16 – Multidimensional Array
- Exercise 17 – Population Details

**4. File Handling programs**

- Exercise 18 – Writing into a existing file
- Exercise 19 – Read from a file
- Exercise 20 – Filter the contents from the file
- Exercise 21 – File Copy

**5. PHP programming thru HTML**

- Exercise 22 – PHP with HTML

**6. Programs related with php Classes and Objects**

- Exercise 23 – Student Registration
- Exercise 24 – Online Examination System
- Exercise 25 – Online Feedback System

**7. Exception Handling in php**

- Exercise 26 – User Defined Exception
- Exercise 27 – Exception Propagation
- Exercise 28 – Error Handling in PHP

**8. Java Scripting**

- Exercise 29 – Arithmetic Operation

- Exercise 30 – Html and java script

(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-322: Service Oriented Architecture**

Periods/week Credits    Max. Marks    : 200  
L: 3    T: 0    3.0  
Duration of Examination: 3 Hrs

Continuous Evaluation : 100  
End Term Examination :100

**Pre-Requisite: Nil**

**Course Type:** Program Elective

**Course Outcomes:** The students will be able to-

1. Understand the key principles behind SOA.
2. Relate web services technology elements for realizing SOA.
3. Distinguish applications based on XML
4. Develop web services using technology elements

**PART- A**

**Unit-1: Introduction**

Concepts of Distributed Computing, XML, Fundamental of SOA, evolution of SOA

**Unit-2: Web Services Fundamental and Standard**

Web Services: Definition, Architectures and Standards. Directory services, SOAP, REST WSDL, UDDI

**Unit-3: Principles of Service-Oriented Architecture**

Service- orientation and object- orientation, SOA Standards Stack, SOA with Web Services, Key Principles of SOA

**PART –B**

**Unit-4: SOA and WS Extension**

Message Exchange Pattern, Coordination, Atomic Transactions, Business Activities, Orchestration, Choreography, WS-Addressing, WS- Reliable Messaging, WS-Policy (including WS-Policy Attachments and WS-Policy Assertions), WS-Metadata Exchange, WS-Security (including XML-Encryption, XML- Signature, and SAML).

**Unit-5: Principles of Service-Oriented Computing**

RPC versus Document Orientation, Service Life Cycle, Service Creation, Service Design and Build, Service Deployment, Publish Web service using UDDI, Service Discovery, Service Selection, Service Composition, Service Execution and Monitoring, Service Termination, Service Composition and Modeling Business Processes with Business Process Execution Language (BPEL)

**Unit-6: SOA Platforms:**

SOA support in J2EE – Java API for XML- based web services (JAX-WS) - Java architecture for XML binding (JAXB) – Java API for XML Registries (JAXR) - Java API for XML based RPC (JAX-RPC)- SOA support in .NET

**Text Books / Reference Books:**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Term Examination : 100

**Pre-Requisite: Basic Knowledge of Networks**  
**Course Type: Program Electives**

**Course Outcomes: The students will be able to-**

BCS-DS-323.1: Understand the web protocols, web architecture and web applications.

BCS-DS-323.2: Design interactive and dynamic websites using HTML, CSS and JavaScript.

BCS-DS-323.3: Develop applications using Java & Implement server side script using PHP, JSP and Servlets.

BCS-DS-323.4: Develop applications using Node JS, Angular JS, JSON, XML and AJAX.

**PART-A**

**Unit 1: INTRODUCTION TO INTERNET**

Internet Overview- Networks - Web Protocols — Web Organization and Addressing - Web Browsers and Web Servers -Security and Vulnerability-Web System Architecture – URL - Domain Name – Client-side and server-side scripting.

**Unit 2: WEB DESIGNING**

HTML5 – Form elements, Input types and Media elements, CSS3 - Selectors, Box Model, Backgrounds and Borders, Text Effects, Animations, Multiple Column Layout, User Interface.

**Unit 3: CLIENT-SIDE PROCESSING AND SCRIPTING**

JavaScript Introduction –Functions – Arrays – DOM, Built-in Objects, Regular Expression, Exceptions, Event handling, Validation- AJAX - JQuery.

**PART-B**

**Unit 4: SERVER SIDE PROCESSING AND SCRIPTING - PHP**

Introduction to PHP – Operators – Conditionals – Looping – Functions – Arrays- Date and Time Functions – String functions - File Handling - File Uploading – Email Basics - Email with attachments.

**Unit 5: PHP SESSION MANAGEMENT and DATABASE CONNECTIVITY**

Sessions-Cookies-MySQL Basics – Querying single and multiple MySQL Databases with PHP – PHP Data Objects. XML Basics – XSL, XSLT, XML Schema-JSON

**Unit 6: APPLICATION DEVELOPMENT USING NODE JS**

Introduction to Node.js- Installing Node.js - Using Events, Listeners, Timers, and Callbacks in Node.js – Introduction to MongoDB- Accessing MongoDB from Node.js.

# **SEMESTER – IV**

MRITIKS

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-401 : Discrete Mathematics**

Periods/week	Credits	Max. Marks	: 200
L :3	T: 1	4.0	Continuous Evaluation : 100
Duration of Exam: 3 Hrs		End Sem Examination	: 100

**Pre-Requisite: Basic Knowledge of computers**

**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-401.1. Memorize basic discrete mathematical techniques widely used in Computer Science.
- BCS-DS-401.2. Understand & derive solution of a given problem using mathematical induction and counting techniques.
- BCS-DS-401.3. Apply logical inference to prove the solution of given problem.
- BCS-DS-401.4. Discriminate different problems based on their algebraic structure.
- BCS-DS-401.5. Formulate Boolean functions and by using properties of Boolean algebra can simplify the expressions.
- BCS-DS-401.6. Generate solution of a given problem with graph & tree techniques.

**PART- A**

**Unit-1: Sets, Relation and Function**

- 1.1 Operations and Laws of Sets, Cartesian Products.
- 1.2 Binary Relation, Partial Ordering Relation, Equivalence Relation.
- 1.3 Sum and Product of Functions, Bijective functions, Inverse and Composite Function
- 1.4 Image of a Set, Size of a Set.
- 1.5 Finite and infinite Sets, Countable and uncountable Sets.
- 1.6 Cantor's diagonal argument and The Power Set theorem, Schroeder-Bernstein theorem.

**Unit-2: Propositional Logic**

- 2.1 Syntax, Semantics, Validity and Satisfiability.
- 2.2 Basic Connectives and Truth Tables.
- 2.3 Logical Equivalence: The Laws of Logic, Logical Implication, Rules of Inference, The use of Quantifiers.
- 2.4 Proof Techniques: Some Terminology, Proof Methods and Strategies, Forward Proof, Proof by Contradiction, Proof by Contraposition, Proof of Necessity and Sufficiency.

**Unit-3: Counting Techniques and Mathematical Induction**

- 3.1 Basic counting techniques-inclusion and exclusion, pigeon-hole principle, permutation and combination.
- 3.2 The Well-Ordering Principle.
- 3.3 Mathematical Induction.
- 3.4 The Division algorithm: Prime Numbers, The Greatest Common Divisor: Euclidean Algorithm, The Fundamental Theorem of Arithmetic.

**PART –B**

**Unit-4: Recursion and Recurrence Relations**

- 4.1 Polynomials, evaluation of polynomials, Sequences,
- 4.2 Partial fractions, linear recurrence relation with constant coefficients,
- 4.3 Homogeneous solutions, Particular solutions, Generating functions, Total solution of a recurrence relation using generating functions.

**Unit-5: Algebraic Structures and Morphism**

- 5.1 Algebraic Structures with one Binary Operation.
- 5.2 Semi Groups, Monoids, Groups, Congruence Relation and Quotient Structures.
- 5.3 Free and Cyclic Monoids and Groups, Permutation Groups, Substructures.
- 5.4 Normal Subgroups, Algebraic Structures with two Binary Operation, Rings, Integral Domain and Fields. Boolean Algebra and Boolean Ring, Identities of Boolean algebra, Duality, Representation of

**Unit-6: Graphs and Trees**

- 6.1 Graphs and their properties, Degree, Connectivity, Path, Cycle, Sub Graph.
- 6.2 Isomorphism, Eulerian and Hamiltonian Walks.
- 6.3 Graph Colouring, Colouring maps and Planar Graphs, Colouring Vertices, Colouring Edges, List Colouring.
- 6.4 Perfect Graph, definition properties and Example.
- 6.5 Rooted trees, trees and sorting, weighted trees and prefix codes, Bi-connected component and Articulation Points, Shortest distances.

**Text Books/ Reference Books:**

- 1. Kenneth H. Rosen, Discrete Mathematics and its Applications, Tata McGraw – Hill
- 2. Susanna S. Epp, Discrete Mathematics with Applications, 4th edition, Wadsworth Publishing Co. Inc.
- 3. C L Liu and D P Mohapatra, Elements of Discrete Mathematics A Computer Oriented Approach, 3rd Edition by, Tata McGraw – Hill.

(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS -402: Computer Organization & Architecture**

Periods/week	Credits	Max. Marks	: 200
L :3	T: 0	3.0	Continuous Evaluation : 100
Duration of Exam: 3 Hrs		End Sem Examination	: 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-402.1. Learn the functional block diagram of a single bus architecture of a computer
- BCS-DS-402.2. Describe the function of the instruction execution cycle, RTL interpretation of instructions, addressing modes, instruction set.
- BCS-DS-402.3. Demonstrate assembly language program for specified microprocessor for computing 16 bit multiplication, division and I/O device interface (ADC, Control circuit, serial port communication).
- BCS-DS-402.4. Categorize & describe the process for Concurrent access to memory and cache coherency in Parallel Processors.
- BCS-DS-402.5. Compare different CPU organizations and instruction and will be able to design a memory module and able to analyze its operation by interfacing with the CPU.
- BCS-DS-402.6. Appraise CPU performance, and apply design techniques to enhance performance using pipelining, parallelism and RISC methodology

**PART-A**

**Unit 1: Functional blocks of a computer**

- 1.1 Functional blocks of a computer: CPU, memory, input-output subsystems, control unit.
- 1.2 Instruction set architecture of a CPU – registers, instruction execution cycle.
- 1.3 RTL interpretation of instructions, addressing modes, instruction set.
- 1.4 Case study – instruction sets of some common CPUs.

**Unit 2: Data representation**

- 2.1 Data representation: signed number representation, fixed and floating point representations, character representation.
- 2.2 Computer arithmetic – integer addition and subtraction, ripple carry adder, carry look-ahead adder, etc. multiplication – shift-and add, Booth multiplier, carry save multiplier, etc.
- 2.3 Division restoring and non-restoring techniques ,floating point arithmetic.

**Unit 3: Microprocessor architecture, CPU control unit and Memory system design**

- 3.1 Introduction to x86 architecture.
- 3.2 CPU control unit design: hardwired and micro-programmed design approaches.
- 3.3 Case study – design of a simple hypothetical CPU.
- 3.4 Memory system design: semiconductor memory technologies, memory organization.

**PART-B**

**Unit 4: Peripheral devices and their characteristics**

- 4.1 Peripheral devices and their characteristics: Input-output subsystems, I/O device interface
- 4.2 I/O transfers – program controlled, interrupt driven and DMA, privileged and non-privileged instructions, software interrupts and exceptions.
- 4.3 Programs and processes – role of interrupts in process state transitions
- 4.4 I/O device interfaces – SCII, USB.

**Unit 5: Pipelining and parallel processing**

- 5.1 Pipelining: Basic concepts of pipelining, throughput and speedup, pipeline hazards.
- 5.2 Parallel Processors: Introduction to parallel processors.
- 5.3 Concurrent access to memory and cache coherency.

## Unit 6: Memory organization

- 6.1 Memory organization: Memory interleaving, concept of hierarchical memory organization
- 6.2 Cache memory, cache size vs. block size, mapping functions
- 6.3 Replacement algorithms, write policies.

Periods/week Credits  
L :3 T: 1 4.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisites: Basic Knowledge of computers**

**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-403.1. Define the features of UNIX and Linux operating system to conceptualize the components involved in designing a contemporary OS
- BCS-DS-403.2. Understand the concepts of process, address space, file system and system components that are used in working of operating system and Compare various CPU scheduling algorithms.
- BCS-DS-403.3. Apply various inter-process communication mechanism.
- BCS-DS-403.4. Analyze how deadlock exists in the system and how to recover from it.
- BCS-DS-403.5. Evaluate the performance of segmented and paged memories.
- BCS-DS-403.6. Develop the I/O management functions in OS as part of a uniform device abstraction by performing operations for synchronization between CPU and I/O controllers.

**PART - A**

**Unit 1: Introduction**

- 1.1 Concept of Operating Systems, generations of operating systems, types of operating systems, OS services, system calls.
- 1.2 Structure of an OS – Layered, monolithic, microkernel operating systems.
- 1.3 Concept of virtual machine.
- 1.4 Case study on UNIX and WINDOWS operating system.

**Unit 2: Processes**

- 2.1 Definition, process relationship, different states of a process, process state transitions, Process Control Block (PCB), context switching.
- 2.2 Thread: Definition, various states, benefits of threads, types of threads, concept of multithreads.
- 2.3 Process Scheduling: Foundation and scheduling objectives, types of schedulers.
- 2.4 Scheduling criteria: CPU utilization, throughput, turnaround time, waiting time, response time.
- 2.5 Scheduling algorithms: pre-emptive and non pre-emptive, FCFS, SJF, RR.
- 2.6 Multiprocessor scheduling: real time scheduling: RM and EDF.

**Unit 3: Inter-process Communication**

- 3.1 Critical section, race conditions, mutual exclusion.
- 3.2 Hardware solution, strict alternation, peterson's solution, the producer\ consumer problem.
- 3.3 Semaphores, event counters, monitors, message passing.
- 3.4 Classical IPC Problems: reader and writer problem, dining philosopher problem etc.

**PART - B**

**Unit 4: Deadlocks**

- 4.1 Definition, necessary and sufficient conditions for deadlock.
- 4.2 Deadlock prevention.
- 4.3 Deadlock avoidance: Banker's algorithm.
- 4.4 Deadlock detection and recovery.

**Unit 5: Memory Management**

- 5.1 Basic concept, logical and physical address map.
- 5.2 Memory allocation: Contiguous memory allocation, fixed and variable partition, internal and external fragmentation and compaction.
- 5.3 Paging: principle of operation, page allocation, Hardware support for paging, protection and

- sharing, disadvantages of paging.
- 5.4 Virtual Memory: Basics of virtual memory, hardware and control structures.
- 5.5 Locality of reference, page fault , working set , dirty page/dirty bit, demand paging.
- 5.6 Page replacement algorithms: Optimal, First in First Out (FIFO), Second Chance (SC), Not Recently Used (NRU) and Least Recently Used (LRU).

**Unit 6: I/O Hardware**

- 6.1 I/O devices, device controllers, direct memory access.
- 6.2 Principles of I/O Software: Goals of interrupt handlers, device drivers, device independent I/O software.
- 6.3 Secondary-storage structure: Disk structure, disk scheduling algorithms.
- 6.4 File Management: Concept of file, access methods, file types, file operation, directory structure, file system structure. Allocation methods (contiguous, linked, indexed), free-space management (bit vector, linked list, grouping), directory implementation (linear list, hash table), efficiency and performance.
- 6.5 Disk Management: Disk structure, disk scheduling - FCFS, SSTF, SCAN, C-SCAN, disk reliability, disk formatting, boot-block, bad blocks.

**Text Books/ Reference Books:**

(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-404 : Database Management Systems**

Periods/week	Credits	Max. Marks	: 200
L :3	T: 1	4.0	Continuous Evaluation : 100
Duration of Exam: 3 Hrs		End Sem Examination	: 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-404.1. Recognize the importance of database management system, its components and architecture.
- BCS-DS-404.2. Describe different data models, and conceptual E-R model, able to understand the concepts transaction processing and concurrency control.
- BCS-DS-404.3. Apply essential DBMS concepts such as: information storage system, database security, integrity, concurrency.
- BCS-DS-404.4. Use multiple query language techniques, write relational algebra expression and optimization of query.
- BCS-DS-404.5. Evaluate database schema and its normalization.
- BCS-DS-404.6. Build a simple database system and demonstrate competence with the fundamental tasks involved with modelling, designing, and implementing a DBMS.

**PART- A**

**Unit-1: Database System Architecture**

- 1.1 Data Abstraction, Data Independence,
- 1.2 Data Definition Language (DDL), Data Manipulation Language(DML),
- 1.3 Entity-Relation Model,
- 1.4 Network Model, Relational and object oriented data models,
- 1.5 Integrity Constraints,
- 1.6 Data Manipulation Operation.

**Unit-2: Relational database Design, query languages and Optimization**

- 2.1 Relational Database Design, Domain and Data Dependency, Armstrong's axioms,
- 2.2 Normal Forms, Dependency preservation, Lossless Design,
- 2.3 Relational Query Languages, Relational algebra,
- 2.4 Tuple and Domain Relational Calculus,
- 2.5 SQL, DDL, and DML constructs,
- 2.6 Open Source and Commercial DBMS-MYSQL, ORACLE, DB2, SQL Server,
- 2.7 Query Processing and Optimization, Evaluation of Relational Algebra Expression,
- 2.8 Query equivalence, Join Strategies, Query Optimization Algorithms.

**Unit-3: Storage Strategies**

- 3.1 Indices,
- 3.2 B-trees,
- 3.3 Hashing.

**PART –B**

**Unit-4: Transaction Processing**

- 4.1 Transactions, ACID properties, concurrency control,
- 4.2 Serializability of scheduling, Locking and timestamp based scheduler,
- 4.3 Multi-version and optimistic concurrency control schemes,
- 4.4 Database Recovery.

**Unit-5: Database Security**

- 5.1 Authentication, Authorization and access control,
- 5.2 DAC, MAC and RBAC models, Intrusion Detection,
- 5.3 SQL injection.

## Unit-6: Advanced Topics

- 6.1 Object oriented and object relational databases,
- 6.2 Logical databases, Web Databases
- 6.3 Distributed databases, Data warehousing and Data Mining.

**BCS-DS-405: Computer Networks**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of Networks**  
**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-405.1. Develop the basic concept of network & layered architecture of OSI model.
- BCS-DS-405.2. Describe various LAN & WAN Standards with its protocols.
- BCS-DS-405.3. Describe of data link layer with its protocols
- BCS-DS-405.4. Understand various protocols like ARP, RARP and switching concepts comes under network layer.
- BCS-DS-405.5. Analyse transport layer protocols UDP, TCP and various congestion control algorithms.
- BCS-DS-405.6. Configure DNS DDNS, TELNET, EMAIL, File Transfer Protocol (FTP), WWW, HTTP, SNMP, Bluetooth, Firewalls using open source available software and tools.

**PART- A**

**Unit 1: Foundation of Computer Networks**

- 1.1 Data communication Components
- 1.2 Representation of data and its flow Networks
- 1.3 Various Connection Topology
- 1.4 Protocols and Standards : OSI model
- 1.5 Transmission Control Protocol (TCP/IP):Frame Format
- 1.6 Multiplexing - Frequency division, Time division and Wave division
- 1.7 Spread Spectrum Techniques.

**Unit 2: LAN and WAN Technologies**

- 2.1 LAN overview: LAN standards,
- 2.2 Channel access methods: CSMA, CSMA/CD, Token ring.
- 2.3 Ethernet: layered architecture, Fast Ethernet: layered architecture, Gigabit Ethernet (IEEE 802.3z): Format, Applications.10GB Ethernet: Overview and Specifications, Layered protocol architecture and Applications.
- 2.4 Wireless LAN (IEEE 802.11);, Bluetooth (IEEE 802.15): Security and applications.
- 2.5 Introduction to WAN, WAN technologies: SONET/SDH,
- 2.6 ATM: ATM cell, layered architecture, ATM signaling, addressing and applications.
- 2.7 Frame Relay Technology Overview and Standards.
- 2.8 ISDN & B-ISDN: Technology Overview, Interfaces and Channels.

**Unit 3: Overview of Data Link Layer**

- 3.1 Data Link Layer and Medium Access Sub Layer
- 3.2 Error Detection and Error Correction - Fundamentals,
- 3.3 Block coding, Hamming Distance, CRC;
- 3.4 Flow Control and Error control protocols - Stop and Wait, Go back – N ARQ, Selective Repeat ARQ, Sliding Window, Piggybacking, Random Access,
- 3.5 Multiple access protocols -Pure ALOHA, Slotted ALOHA

**PART- B**

**Unit 4: Overview of Network Layer**

- 4.1 Network Layer: Switching,
- 4.2 Logical addressing – IPV4, IPV6;
- 4.3 Address mapping – ARP, RARP, BOOTP and DHCP–Delivery,
- 4.4 Forwarding and Unicast Routing protocols.

**Unit 5: Overview of Transport Layer**

- 5.1 Transport Layer: Process to Process Communication,

- 5.2 User Datagram Protocol (UDP),
- 5.3 Transmission Control Protocol (TCP), SCTP
- 5.4 Congestion Control; Quality of Service,
- 5.5 QoS improving techniques: Leaky Bucket and Token Bucket algorithm

**Unit 6: Overview of Application Layer**

- 6.1 Domain Name Space (DNS), DDNS,
- 6.2 TELNET, EMAIL, File Transfer Protocol (FTP), WWW, HTTP, SNMP, Bluetooth,
- 6.3 Firewalls,
- 6.4 Basic concepts of Cryptography

**Text Books/ Reference Books:**

**BCS-DS-451: Operating Systems Lab**

Periods/week	Credits	Max. Marks	: 100
P :2	1.0	Continuous Evaluation	: 50
Duration of Exam: 2 Hrs		End Sem Examination	: 50

**Co-Requisite: Operating Systems (BCS-DS-403)**  
**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-451.1. State the features of Operating systems and programs, with a view to be able to implement simple systems in this model.
- BCS-DS-451.2. Understand how to obtain information regarding Host, Network, Protocol, Domain, create the utility functions on system.
- BCS-DS-451.3. Demonstrate the implementation of file systems and shell programming.
- BCS-DS-451.4. Examine the manipulation of the I/O devices and system components.
- BCS-DS-451.5. Argue how to change the content of system calls.
- BCS-DS-451.6. Develop various system programs under Linux to make use of OS concepts related to process synchronization, shared memory, file systems, etc.

**List of Practicals:**

1. Carry out installation of windows XP /NT Operating System and Check.
2. Carry out installation of LINUX/UNIX Operating System and check.
3. Perform the handling of following:  
System Tools, storage management, services and applications in windows operating system.
4. Implement the various commands of LINUX/UNIX Operating System.
5. Perform the handling of process management & file management functions of operating system: LINUX/UNIX.
6. Implement the file security and file sharing, redirection and UNIX Pipes.
7. Implement the Compilation process and compilation of C, C++ & Java Programs in UNIX & working with Libraries in UNIX.
8. **Shell Programming:** shell script overview & implementation.
  - A. shell variables and related commands.
  - B. Passing arguments to shell scripts
  - C. Program for control commands
  - D. Functions in shellWrite shell scripts and implement for the following:
  - a. handling (sorting, Searching)
  - b. Program for file handling
  - c. Program for GUI Program for Fibonacci series and factorial of a no.
  - d. Program for Sum /average/ highest of a no.
  - e. Program for string handling (reverse of sorting and comparing)
  - f. Program for array Development.
9. Write a shell script to create 5 file with size O, filename supplied as command line argument.
10. Write a shell script to check whether the contents of two files are same or not. If contents are same delete the 2<sup>nd</sup> file.
11. Write a shell script to search a line in a file which contains given set of words (use for loop)
12. Write a shell script to check whether a character entered is a small case, digit or a special symbol. (Use case)
13. Write a shell script to count the no. of words and no. of lines in a file.
14. Write a shell script to check every 30 secs. Whether user has login. The moment user logs in, Send a greeting to him as Good morning/ Good Afternoon/Good evening depending upon the time he logs in.
15. Write a shell script for menu driven program.
  1. Add
  2. Delete
  3. Display
  4. Edit
  5. List all menu
  6. Exit

16. Write a shell script to beep the speaker after every 10 minutes or after specified number of minutes.

(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-452: DATABASE MANAGEMENT SYSTEMS LAB**

Periods/week	Credits	Max. Marks	: 100
P :2	1.0	Continuous Evaluation	: 50
Duration of Exam: 2 Hrs		End Sem Examination	: 50

**Co-Requisite: Database Management Systems (BCS-DS-404)**  
**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-452.1. Recognize and effectively explain the underlying concepts of database Management System.
- BCS-DS-452.2. Populate and query a database using SQL DML/DDDL/DCL commands.
- BCS-DS-452.3. Apply different integrity constraints with respect to database using a state-of-the-art RDBMS.
- BCS-DS-452.4. Evaluate database using SQL queries.
- BCS-DS-452.5. Programming PL/SQL including stored procedures, stored functions.
- BCS-DS-452.6. Design and implement and normalize database schema for a Given problem-domain.

**List of Practicals:**

1. Create a student database (Roll No., Name, Dept.) and write the queries to carry out the following operations)
  1. Add 20 new records to the database.
  3. Delete 5 records from the database.
  4. Add another column phone No. to this database.
  5. Add values to the column phone No.
  6. Change the data type of column phone No. from number to var char2.
  7. Delete a table from the database.
  8. Drop the table.
2. Write queries to display records in ascending and descending order from the student database.
3. Calculate and display the total no of students enrolled in following subjects from students database:-
  - 5.1. Mathematics
  - 5.2. Science
  - 5.3. English
4. Write queries to implement following functions to the student database.
  - 5.4. Grouping functions.
  - 5.5. Date and time functions.
  - 5.6. Mathematical functions.
  - 5.7. Character functions.
  - 5.8. Conversion functions.
5. Create a view on student database to display the data of all the students in Computer Science, Mechanical and IT departments.
6. Create an employee database and create the following two tables:  
Employee (Empid, Name Department) and accounts (Empid, Salary)  
Display the name of all Employees having salaries greater than 10,000.
7. Display the name of employees along with their respective manager name from the following table.

Empid	Emp Name	Manager
E001	Ivan	E003
E002	Bayross	E004
E003	Cristinna	E002
E004	Maria	E001
8. Write queries to implement primary key, foreign key, Not Null and Check constraints on employee database.
9. Write queries to implement database triggers on student database.

10. Create a PL/SQL procedure called QUERY\_EMP to query the employee database retrieving the salary and job title for an employee when provided with the employee number compile the code, invoke the procedure and display the salary and job title for the employee.
11. Create a PL/SQL procedure NEW\_EMP to insert a new employee into the EMP\_ database. The procedure should contain a call to function VALID\_DEPT to check whether the department number specified for the new employee exists in the department table.  
Test your NEW\_EMP procedure by adding a new employee to the database.
12. Use a cursor to retrieve the department number and department name from the dept. table: Pass the dept. no. to another cursor to retrieve from the employee table the details of employee name, job and salary of all employees who is working in that department.
13. Develop two menu driven project for management of database system:
  1. Library Information System
    - (a) Engineering Courses
    - (b) MCA Course
  2. Inventory Control System
    - (c) Computer Lab
    - (d) College Store
  3. Student Information System
    - (e) Academic Section
    - (f) Finance Department
  4. Time Table Development System
    - (g) CSE, IT and MCA Departments
    - (h) Electrical and Mechanical Departments
    - (i)

**BCS-DS-453: COMPUTER NETWORKS LAB**

Periods/week Credits  
P :2 1.0  
Duration of Exam: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Co-Requisite: Computer Networks (BCS-DS-405)**  
**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-453.1. Describe the features of forming a network using switch & router .
- BCS-DS-453.2. Understand the concept of Packet Tracer software..
- BCS-DS-453.3. Simulate the processes of NS3.
- BCS-DS-453.4. Install & configure process.
- BCS-DS-453.5. Introduce proxy server & learning concepts of C language
- BCS-DS-453.6. Design a network using Wire Shark .

**List of Practicals:**

1. Identify different kinds of cables and connect two computers without any switch /with switch.
2. Design a network with the help of CISCO packet Tracer which involves a switch /hub.
3. Design a network with the help of router/without router on CISCO Packet Tracer.
4. Install a print server in LAN.
5. Write a program in NS3 to connect two to three nodes.
6. Write a program in NS3 to implement star ,bus ,hub & hierarchical topology .
7. Write a program in NS3 for connecting multiple routers & nodes & building a hybrid topology & then calculating network performance.
8. Analyze the network traces using Wire Shark Software .
9. Configure a proxy server for network.
10. Make a client server using C to transfer files from one host to another host.

NAAC 'A' Grade University

## DTI-400: Design, Thinking and Innovation -II

Periods/week Credits  
L:0 T:1 P:0 1

Max. Marks : 50  
Continuous Assessment : 50

**Pre-requisites: Design, Thinking and Innovation -I**

**Course Type: Research & Training**

**Course Coordinator: Mr. Yaman Hooda**

### Course Outcomes:

DTI 400.1. To understand the research methodologies/approaches/techniques used in the literature

DTI 400.2. To formulate the experimental procedures / algorithms based on research methodology

DTI 400.3. To develop prototype by experiment / simulation.

DTI 400.4. To analyze the recorded data / output.

### Activity 1: Methodology Study & Matrix design.

1.1. Analysis of different approach/methodology adopted by various researchers

1.2. Comparative analysis

1.3. Prospective Design.

### Activity 2: Design of experiments

2.1 Finalization of experimental procedure / algorithm design.

2.2 Procurement of materials / Hardware and Software.

2.3. Develop experimental setup / design

### Activity 3: Execution of experiments/simulations

3.1. Conduct experiments / build prototype.

3.2. Modification of the experimental set-up / algorithm.

### Activity 4:

4.1 Tabulating and analyzing data / output.

4.2 Assessment of the output with earlier published work / product

4.3 Interpretation and presentation of the results / outcome.

### Course Articulation Matrix:

CO Statement (XX-400)	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BHM-320: UNIVERSAL HUMAN VALUES**

Periods/week Credits  
L: 1 T: 1 2  
Duration of Examination: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Term Examination : 50

**Pre-requisite: None**

**Course Type: Humanities & Social Science**

**Course Outcomes:** The course will enable the student to-

BHM-320.1. Develop a holistic perspective based on self-exploration about themselves (human being), family, society and nature/existence.

BHM-320.2. Understand harmony in the human being, family, society and nature/existence

BHM-320.3. Strengthen the self-reflection, develop commitment and courage to act.

**Unit 1: Course Introduction - Need, Basic Guidelines, Content and Process for Value Education (5 Lectures)**

Purpose and motivation for the course, Self-Exploration—what is it? - Its content and process; 'Natural Acceptance' and Experiential Validation— as the process for self-exploration, Continuous Happiness and Prosperity— A look at basic Human Aspirations, Right understanding, Relationship and Physical Facility—the basic requirements for fulfillment of aspirations of every human being with their correct priority, Understanding Happiness and Prosperity correctly— A critical appraisal of the current scenario, Method to fulfill the above human aspirations: understanding and living in harmony at various levels.

**Unit 2: Understanding Harmony in the Human Being—Harmony in Myself! (5 Lectures)**

Understanding human being as a co-existence of the sentient 'I' and the material 'Body', Understanding the needs of Self ('I') and 'Body' - happiness and physical facility, Understanding the Body as an instrument of 'I' (I being the doer, seer and enjoyer), Understanding the characteristics and activities of 'I' and harmony in 'I', Understanding the harmony of I with the Body: Sanyam and Health; correct appraisal of Physical needs, meaning of Prosperity in detail, Program to ensure Sanyam and Health.

**Unit 3: Understanding Harmony in the Family and Society— Harmony in Human-Human Relationship (7 Lectures)**

Understanding values in human-human relationship; meaning of Justice (nine universal values in relationships) and program for its fulfillment to ensure mutual happiness; Trust and Respect as the foundational values of relationship, Understanding the meaning of Trust; Difference between intention and competence, Understanding the meaning of Respect, Difference between respect and differentiation; the other salient values in relationship  
Understanding the harmony in the society (society being an extension of family): Resolution, Prosperity, fearlessness (trust) and co-existence as comprehensive Human Goals, Visualizing a universal harmonious order in society— Undivided Society, Universal Order—from family to world family.

**Unit 4: Understanding Harmony in the Nature and Existence - Whole existence as Coexistence (6 Lectures)**

Understanding the harmony in the Nature, Interconnectedness and mutual fulfillment among the four orders of nature—recyclability and self-regulation in nature, Understanding Existence as Co-existence of mutually interacting units in all-pervasive space Holistic perception of harmony at all levels of existence.

Include practice sessions to discuss human being as cause of imbalance innature (film "Home" can be used), pollution, depletion of resources and role oftechnology etc.

**Unit 5: Implications of the above Holistic Understanding of Harmony onProfessionalEthics(5 Lectures)**

Naturalacceptanceofhumanvalues, DefinitivenessofEthicalHumanConduct, Basis for Humanistic Education, Humanistic Constitution and HumanisticUniversal Order, Competence in professional ethics, Case studies of typical holistic technologies, management models andproductionsystems, Strategy for transition from the present state to Universal Human Order: a. Atthe level of individual: as socially and ecologically responsible engineers,technologists and managers b. At the level of society: as mutually enrichinginstitutionsand organizations,

(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BHM-MC-006: Quantitative Aptitude and Personality Development-I**

Periods/week	Credits	Max. Marks	: 100
P :2	0	Continuous Evaluation	: 50
Duration of Exam: 2 Hrs		End Sem Examination	: 50

**Pre-Requisite: Basic Knowledge of English**  
**Course Type: HSMC**

**Course Outcomes:** Students will be able to-

- BHM-MC-006.1. Recognize & solve problems based on non-verbal reasoning.
- BHM-MC-006.2. Solve complex problems based on arithmetic reasoning.
- BHM-MC-006.3. Apply short tricks on complex problems of verbal reasoning.
- BHM-MC-006.4. Apply correct usage of grammar in communication.
- BHM-MC-006.5. Enhance their vocabulary and use it in day to day life.
- BHM-MC-006.6. Develop speed reading & writing skills.

**PART – A**

**Unit 1: Arithmetic II**

- 1.1 Percentages
- 1.2 Ratio & Proportion
  - 1.2.1. Proportionality
  - 1.2.2. Variations
  - 1.2.3 Partnership
- 1.3 Profit & Loss
  - 1.3.1. Basic terminology & Formulae
  - 1.3.2. Error in Weights
  - 1.3.3. Marked Price and Discounts
- 1.4 Time & Work
  - 1.4.1. Time and Work, Chain Rule
  - 1.4.1. Work & Wages
  - 1.4.2. Pipes & Cisterns
- 1.5 Mixtures & Alligations

**Unit 2: Verbal Reasoning 2**

- 2.1 Syllogism
- 2.2 Ranking
- 2.3 Coding-Decoding
- 2.4 Inequalities and Mathematical Operations

**Unit 3: Non Verbal Reasoning**

- 3.1 Pictorial Series
- 3.2 Missing Values
- 3.3 Analogy and Images

**Part B**

**Unit 4: Communication Accuracy**

- 4.1 Relevance of Verbal Ability and preparatory guidelines
- 4.2 Functional Grammar – Subject Verb Agreement
- 4.3 Tenses – Perfect, Simple, Continuous
- 4.4 Common Errors and rectification

**Unit 5: Word Power Building Skills**

- 5.1 Words: Antonyms, Synonyms, Verbal Analogies
- 5.2 Compound words: Homophones, Homonyms, Word Families
- 5.3 Root Word Technique for Prefixes & Suffixes
- 5.4: Word Power: 7 Tips for Learning New Words

## 5.5 Practice Vocabulary Exercises

### Unit 6: Reading & Writing Skills

- 6.1 Objectives of Reading, Definition & Types of Reading & Importance of Reading
- 6.2 Reading Techniques: SW3R, Active Reading, Detailed, Speed
- 6.3 Practice Exercises: Short & Medium Passages  
3.1 Writing: Introduction of Writing Skills, Objectives of enhancing Writing Skills & Types of Writing
- 6.4 Sentences, Phrases, Types of Sentences, Parts of Sentences
- 6.5 Paragraph Writing: Construction, Linkage & Cohesion

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-422: Open Source Software**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-422.1. Remember Open Source software, types of OSS, history, tools etc.
- BCS-DS-422.2. Understand Open Source Licensing, its types, IPR, Copyright etc.
- BCS-DS-422.3. Illustrate the architecture of linux, various linux distributions available, various linux commands, booting, installation.
- BCS-DS-422.4. Classify various open source web browsers and graphical user interface.
- BCS-DS-422.5. Analyze Networking Commands and various types of servers
- BCS-DS-422.6. Develop understanding on open source and open source communities.

**PART- A**

**Unit-1: Introduction to Open Source Software**

- 1.1 Introduction to Open Source Software (OSS)
- 1.2 History, evolution and benefits of Open Source
- 1.3 Types of OSS, Open Source Software vs Closed Source Software
- 1.4 Open Source tools
- 1.5 Open Source Software examples: The Origins
- 1.6 Advantages of Open Source Software
- 1.7 Open Source Challenges
- 1.8 Open Source Development Model-Overview, its benefits

**Unit-2: Open Source Licensing**

- 2.1 Licensing- Overview, types of Licensing
- 2.2 Types of Open Source Licensing, Commercial license vs Open Source License
- 2.3 Open Source Licensing Strategies, IPR, Copyright vs Copyleft
- 2.4 Copyright law, its issues, contracts, Patents
- 2.5 GNU-GPL, Apache license, License Review Process

**Unit-3: Linux (Open Source Operating System)**

- 3.1 Overview of Linux operating System, Linux Vs Unix
- 3.2 Architecture, Essential Linux Commands (Internal and External Commands)
- 3.3 Various Linux distributions available, Working with the System, Shells and Utilities
- 3.4 Booting, Installation, LILO, GRUB, Run levels
- 3.5 Stopping the System- Shutdown (reboot, halt)

**PART- B**

**Unit-4: Open Source Web browsers and GUI**

- 4.1 Open Source Web Browser- Overview, Examples
- 4.2 Case Study- Mozilla Firefox
- 4.3 The Graphical User Interface KDE, GNOME
- 4.4 Google chrome vs Mozilla Firefox

**Unit-5: Network and Security administration in open source**

- 5.1 Networking Commands, Apache Web Servers
- 5.2 DNS servers, DHCP servers, mail servers, FTP Servers.
- 5.3 Securing servers with Iptables, SSL
- 5.4 Working with the GNU Privacy guard

## Unit-6: Open Source adoption and communities

6.1 Open Source Initiative (OSI), Open Source Definition

6.2 Brook's law, Open Source Community

6.3 ASF, FSF

6.4 Drivers for adoption of Open Source

6.5 Examples of Open Source Adoption in the world

**BCS-DS-423: Cloud Computing**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-423.1. Define the basic of cloud computing.
- BCS-DS-423.2. Understand IaaS, PaaS and SaaS service model.
- BCS-DS-423.3. Apply their knowledge to implement and execute virtualization.
- BCS-DS-423.4. Differentiate between different deployment models.
- BCS-DS-423.5. Evaluate the services provides by different cloud models.
- BCS-DS-423.6. Create their own cloud based on various models.

**PART-A**

**Unit-1: Overview of Cloud Computing**

- 1.1 Introduction; Overview of Cloud Computing; Cloud Service models and Cloud Deployment Models
- 1.2 Cloud History – Internet technologies (SOA, Web Services, Web 2.0, mashups)
- 1.3 Distributed computing – Utility and Grid Computing, Hardware – VMWare ESXi, Xen, KVM
- 1.4 Virtual Appliances and the open Virtualization format
- 1.5 System Management; Anatomy of Cloud; Benefits of Cloud

**Unit-2: Cloud Computing Service Models**

- 2.1. Introduction to Infrastructure as a Service delivery model, characteristics of IaaS, examples of IaaS
- 2.2. Introduction to Platform as a Service delivery model, characteristics of PaaS
- 2.3. Introduction to Software as a Service delivery model, characteristics of SaaS, SaaS Origin
- 2.4. Architecture of IaaS, PaaS and SaaS
- 2.5. Applicability of IaaS, PaaS and SaaS in the industry

**Unit-3: Cloud Computing Reference Architecture (CCRA)**

- 3.1. Introduction to Cloud computing reference architecture (CCRA), benefits of CCRA
- 3.2. CCRA : Architectural Components – Service deployment , Service Orchestration
- 3.3. Architecture overview – The conceptual Reference Model
- 3.4. Cloud Consumer; Cloud provider; Cloud Auditor
- 3.5. Cloud carrier; Scope of control between Provider and Consumer

**PART B**

**Unit-4: Introduction to Virtualization**

- 4.1. Traditional IT Infrastructure
- 4.2. Benefits of Virtualization
- 4.3. Types of Virtualization
- 4.4. History of Virtualization
- 4.5. Types of Server Virtualization
- 4.6. Hypervisors
- 4.7. Anatomy of Server Virtualization
- 4.8. Benefits of Storage Virtualization
- 4.9. Types of Storage Virtualization

**Unit-5: Cloud Deployment Model-I**

- 5.1. What is a Private Cloud?, Illustration of Private Cloud, Advantages of Private Cloud,
- 5.2. Limitations of Private Cloud, Service Management, Journey into Private Cloud,
- 5.3. What is a Public Cloud?, Illustration of Public Cloud, Why Public Cloud,
- 5.4. Advantages of Public Cloud, Limitations of Public Cloud

## 5.5. Public v/s Private

### Unit-6: Cloud Deployment Model-II

- 6.1 What is a Hybrid Cloud?, Why Hybrid Cloud, Illustration of Hybrid Cloud,
- 6.2 Advantages of Hybrid Cloud, Challenges of Hybrid Cloud, Develop and manage hybrid workloads,
- 6.3 Developing applications for hybrid cloud, Develop applications using PaaS,
- 6.4 Managing hybrid workloads,
- 6.5 Journey into Hybrid Cloud, Step 1: Asses current IT infrastructure and business, Step 2: Explore cloud computing, Step 3: Create cloud deployment strategy plan, Step 4: hybrid cloud implementation.

**BCS-DS-475: Cloud Computing Lab**

Periods/week Credits  
P :2 1.0  
Duration of Exam: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Co-Requisite: Cloud Computing (BCS-DS-423)**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-475.1. State and repeat installation of virtual machines on different platforms.
- BCS-DS-475.2. Understand, how to create Network Topology on Cloud.
- BCS-DS-475.3. Demonstrate the process of virtualization.
- BCS-DS-475.4. Experiment on open Community using OpenStack.
- BCS-DS-475.5. Evaluate the roles given to users working on a same project.
- BCS-DS-475.6. Create their own cloud using OpenStack.

**List of Experiments:-**

1. Installation of VMWare
2. Virtual Machine Using VMware
3. KVM and guest operating system on CentOS6.3
4. Open Stack Installation
5. Familiarize with OpenStack dashboard
6. Trouble shooting in Virtual Machine
7. User and Project management
8. Common Cloud Management tasks
9. Overview of Openstack CLI
10. Overview of Nagios

**BCS-DS-427A: Python**

Periods/week	Credits	Max. Marks	: 200
L :2	T: 0	2.0	Continuous Evaluation : 100
Duration of Exam: 3 Hrs		End Sem Examination	: 100

**Pre-Requisite: Basic Knowledge of computers & Object Oriented Programming (BCS-DS-302A)**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-427A.1. Understand the basic concepts of Python programming such as data types, tuples, Lists, dicts, basic operators, and functions
- BCS-DS-427A.2. Demonstrate knowledge with the Python Program Development Environment (PPDE).
- BCS-DS-427A.3. Describe the principles of object-oriented programming using Python
- BCS-DS-427A.4. Perform high-level mathematical computing using the NumPy package and library of Mathematical Functions
- BCS-DS-427A.5. Solve problems requiring the writing of well-documented programs in the Python language, including use of the logical constructs.
- BCS-DS-427A.6. Design, code, and test Python programs on some mini projects

**PART-A**

**UNIT-1: Parts of Python Programming Language**

- 1.1 Identifiers, Keywords, Statements and Expressions, Variables, Operators, Precedence and Associativity,
- 1.2 Data Types, Indentation, Comments, Reading Input, Print Output, Type Conversions, The type() Function and Is Operator, Dynamic and Strongly Typed Language,
- 1.3 **Control Flow Statements**, The if Decision Control Flow Statement, The if...else Decision Control Flow Statement, The if...elif...else Decision Control Statement, Nested if Statement,
- 1.4 The while Loop, The for Loop, The continue and break Statements,
- 1.5 Built-In Functions, Commonly Used Modules,
- 1.6 Function Definition and Calling the Function, The return Statement and void Function,
- 1.7 Scope and Lifetime of Variables, Default Parameters,

**UNIT-2: Strings, List Methods & exception**

- 2.1 Creating and Storing Strings, Basic String Operations,
- 2.2 Accessing Characters in String by Index Number, String Slicing and Joining,
- 2.3 String Methods, Formatting Strings,
- 2.4 Lists, Creating Lists, Basic List Operations, Indexing and Slicing in Lists,
- 2.5 Built-In Functions Used on Lists, List Methods, The del Statement.
- 2.6 The anatomy of exception
- 2.7 Python Built-in Exceptions

**UNIT-3: Python Data Structures**

- 3.1 Creating Dictionary, Accessing and Modifying key: value Pairs in Dictionaries,
- 3.2 Built-In Functions Used on Dictionaries, Dictionary Methods, The del Statement,
- 3.3 **Tuples and Sets**, Creating Tuples, Basic Tuple Operations, Indexing and Slicing in Tuples,
- 3.4 Built-In Functions Used on Tuples, Relation between Tuples and Lists, Relation between Tuples and Dictionaries
- 3.5 Tuple Methods, Using zip() Function, Sets, Set Methods, Traversing of Sets, Frozenset

**PART-B**

**UNIT-4: Working with NumPy:**

- 4.1 Creating NumPy arrays
- 4.2 Indexing and slicing in NumPy
- 4.3 Downloading and parsing data

- 4.4 Creating multidimensional arrays
- 4.5 NumPy Data types
- 4.6 Array tributes
- 4.7 Indexing and Slicing
- 4.8 Creating array views copies
- 4.9 Manipulating array shapes I/O

**UNIT-5: Files Handling**

- 5.1 Types of Files, Creating and Reading Text Data, File Methods to Read and Write Data, Reading and Writing Binary Files,
- 5.2 The Pickle Module, Reading and Writing CSV Files, Python os and os.path Modules,
- 5.3 **Regular Expression Operations**, Using Special Characters, Regular Expression Methods,
- 5.4 Named Groups in Python Regular Expressions, Regular Expression with glob Module.

**UNIT-6: Object-Oriented Programming**

- 6.1. Classes and Objects, Creating Classes in Python, Creating Objects in Python,
- 6.2. The Constructor Method, Classes with Multiple Objects,
- 6.3. Class Attributes versus Data Attributes, Encapsulation,
- 6.4. Inheritance, The Polymorphism

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**

(Deemed to be University under section 3 of the UGC Act 1956)

**NAAC 'A' Grade University**

**BCS-DS-479A: Python Lab**

Periods/week Credits  
P: 2 1.0  
Duration of Examination: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Co-Requisite: Python (BCS-DS-427A)**

**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

BCS-DS-479A.1. To understand the basic concepts of Python programming such as data types, tuples, Lists, dicts, basic operators, and functions

BCS-DS-479A.2. To demonstrate knowledge with the Python Program Development Environment (PPDE).

BCS-DS-479A.3 To Describe the principles of object-oriented programming using Python

BCS-DS-479A.4. To perform high-level mathematical computing using the NumPy package and library of Mathematical Functions

BCS-DS-479A.5. Solve problems requiring the writing of well-documented programs in the Python language, including use of the logical constructs.

BCS-DS-479A.6. To Design, code, and test Python programs on some mini projects

**List of experiments-**

1. Write a Python program which accepts the radius of a circle from the user and compute the area.
2. Write a Python program to get the volume of a sphere with radius 6.
3. Write a Python program to find whether a given number (accept from the user) is even or odd, print out an appropriate message to the user.
4. Write a Python program to get the least common multiple (LCM) of two positive integers.
5. Write a Python program to create all possible strings by using 'a', 'e', 'i', 'o', 'u'. Use the characters exactly once.
6. Write a Python program to solve the quadratic equation.
7. Write a Python program to convert Celsius to Fahrenheit.
8. Write a Python program to find factorial of a Number.
9. Write a Python program to find the resolution of JPEG image.
10. Write a Python Program to generate Random Numbers.
11. Write a Python Program to find ASCII value of character present in a string.
12. Write a Python Program to find largest element in an array.
13. Write a Python Program to check if a given array is Monotonic or not.
14. Write a Python Program to find the length of the list.
15. Write a Python Program to reverse the given list.
16. Write a Python Program to count positive and negative numbers in a list.
17. Write a Python Program to check if a string is palindrome or not.
18. Write a Python Program to split and join a string.
19. Write a Python Program to sort Python Dictionary by Key or Value.
20. Write a Python Program to sort list of dictionaries by values using lambda function.
21. Write a Python Program to create grade calculator.
22. Write a Python Program using dictionary to find mirror characters in a string.
23. Write a NumPy program to test whether none of the elements of a given array is zero.
24. Write a NumPy program to test element-wise for positive or negative infinity.
25. Write a NumPy program to create an array of 10 zeros, 10 ones, 10 fives.
26. Write a NumPy program to create an array of all the even integers from 30 to 70
27. Write a NumPy program to compute sum of all elements, sum of each column and sum of each row of a given array
28. Write a Python Program to print double sided stair-case pattern.
29. Write a Python Program for Binary Search(Recursive and Iterative) algorithm.
30. Write a Python Program for Bubble Sort.

31. Write a Python Program to convert time from 12 hour to 24 hour format.
32. Write a Python Program to find the largest prime factor of a number.
33. Write a Python Program for Tower of Hanoi.
34. Write a Python Program for Triangular Matchstick Number.
35. Write a Python Program to copy odd lines of one file to other.

(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-428: Blockchain Technology**

Periods/week	Credits	Max. Marks	: 200
L :3	T: 0	3.0	Continuous Evaluation : 100
Duration of Exam: 3 Hrs		End Sem Examination	: 100

**Pre-Requisite: Basic Knowledge of computers**

**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-428.1. Understand what and why of Blockchain
- BCS-DS-428.2. Explore the major components of Blockchain
- BCS-DS-428.3. Learn about Bitcoin, Cryptocurrency, Ethereum
- BCS-DS-428.4. Learn about Hyperledger Fabric model and its Architecture
- BCS-DS-428.5. Identify a use case for a Blockchain application
- BCS-DS-428.6. Create your own Blockchain network application

**PART – A**

**Unit 1: Introduction to Blockchain**

- 1.1 Digital Money to Distributed Ledgers ,
- 1.2 Design Primitives: Protocols, Security, Consensus, Permissions, Privacy.
- 1.3 Blockchain Architecture and Design: Basic crypto primitives: Hash, Signature,) Hashchain to Blockchain, Basic consensus mechanisms

**Unit 2: Consensus**

- 2.1 Requirements for the consensus protocols, Proof of Work (PoW), Scalability aspects of Blockchain consensus protocols
- 2.2 Permissioned Blockchains: Design goals, Consensus protocols for Permissioned Blockchains

**Unit 3: Introduction to Bitcoin**

- 3.1 Currency, Double Spending, Cryptocurrency, P2P Payment Gateway, Wallet, Mining
- 3.2 Ethereum: Ethereum network, EVM, Transaction fee, Mist, Ether, gas, Solidity - Smart contracts, Truffle, Web3, Design and issue Cryptocurrency

**PART – B**

**Unit 4: Hyperledger Fabric (A) and (B):**

- 4.1. Hyperledger Fabric (A): Decomposing the consensus process ,Hyperledger fabric components, Chaincode Design and Implementation
- 4.2. Hyperledger Fabric (B):Beyond Chaincode: fabric SDK and Front End (b) Hyperledger composer tool

**Unit 5: Use case 1 and 2 :**

- 5.1. Use case 1: Blockchain in Financial Software and Systems (FSS): (i) Settlements, (ii) KYC, (iii) Capital markets, (iv) Insurance
- 5.2. Use case 2:Blockchain in trade/supply chain: (i) Provenance of goods, visibility, trade/supply chain finance, invoice management discounting, etc

**Unit 6: Use case 3 :**

- 6.1. Blockchain for Government: (i) Digital identity, land records and other kinds of record keeping between government entities, (ii) public distribution system social welfare systems
- 6.2. Blockchain Cryptography, Privacy and Security on Blockchain

**Text Books / Reference Books:**

- 1. Mastering Bitcoin: Unlocking Digital Cryptocurrencies, by Andreas Antonopoulos
- 2. Blockchain by Melanie Swa, O'Reilly
- 3. Hyperledger Fabric - <https://www.hyperledger.org/projects/fabric>
- 4. Zero to Blockchain - An IBM Redbooks course, by Bob Dill,

**Instructions for paper setting:** Seven questions are to be set in total. First question will be conceptual covering entire syllabus and will be compulsory to attempt. Three questions will be set from each PART-A and PART-B (one from each unit). Student needs to attempt two questions out of three from each part. Each question will be of 20 marks.

**Distribution of Continuous Evaluation:**

Sessional- I	30%
Sessional- II	30%
Assignment/Tutorial	20%
Class Work/ Performance	10%
Attendance	10%

**BCS-DS-481: Blockchain Technology Lab**

Periods/week	Credits	Max. Marks	: 100
P: 2	1.0	Continuous Evaluation	: 50
Duration of Examination: 2 Hrs		End Sem Examination	: 50

**Co-Requisite: Blockchain Technology (BCS-DS-428)**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-481.1. Learn the basic concepts of Cryptography and cryptocurrency.
- BCS-DS-481.2. Design and Compile Blockchain framework.
- BCS-DS-481.3. Develop programs for Bitcoin.
- BCS-DS-481.4. Implement the concepts of Blockchain wallet.
- BCS-DS-481.5. Demonstrate the usage of Consensus.
- BCS-DS-481.6. Handle the security in Blockchain.

**List of Practicals:**

1. Write a program for blockchain explorer.
2. Write a program for create your own cryptocurrency
3. Write a program for creating wallets and sending cryptocurrency.
4. Write a program for Naive blockchain construction
5. Write a program to show scalability aspects of Blockchain consensus protocols
6. Write a program for Memory Hard Algorithm – Hashcash implementation
7. Write a program for creating Direct Acyclic graph.
8. Write a program for creating Ethereum.
9. Write a program for Smart contract construction.
10. Write a program for tokenization and trading cryptocurrencies.
11. Write a program to start your own Initial Coin Offerings
12. Write a program to show the usage of Hyperledger Fabric
13. Write a program to implement blockchain network and mining.
14. Write a program for mitigating attack in blockchain.

**Note:** At least 5 more exercises to be given by the teacher concerned.

**BCS-DS-430: SOFTWARE ENGINEERING AND PROJECT MANAGEMENT**

Periods/week Credits  
L: 3 T: 0 3.0  
Duration of Examination: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-430.1. Define systematic approach and Project Management techniques for Software Development.
- BCS-DS-430.2. Deploy appropriate Project Development plan after collecting requirements of the client.
- BCS-DS-430.3. Estimate the cost, effort, schedule and staff requirement for a particular project at the planning stage.
- BCS-DS-430.4. Explain the quality, risks concepts and recovery techniques for a Project.
- BCS-DS-430.5. Track the project progress and learn different techniques used to manage scope, cost, schedule and quality issues.
- BCS-DS-430.6. Perform various activities related to project review and closure.

**PART -A**

**Unit-1: Software Development Life Cycle Plan**

- 1.1 Introduction of SDLC, its importance and selection,
- 1.2 SDLC Models and their comparative analysis: Waterfall model, V-Shaped software DLC model, Prototype model, Structured Evolutionary & Rapid Prototyping model, RAD model and Spiral model,
- 1.3 Requirement Analysis and Specification
- 1.4 System Design: Modular Design, Design Models, Architectural Design Of Software, Data Design
- 1.5 Software Testing Techniques

**Unit-2: Managing Software Project**

- 2.1 Project Development Techniques,
- 2.2 Project Management Skills,
- 2.3 Process Overview, Process Models,
- 2.4 Process planning,
- 2.5 Standard Processes, Customized Processes,
- 2.6 Requirements Change Management,
- 2.7 CMM Models, KPA's Project Management,
- 2.8 SPM life cycle.
- 2.9 Project Estimation Techniques, Empirical Estimation Techniques
- 2.10 COCOMO Heuristic Estimation Techniques

**Unit-3: Effort Estimation & Scheduling**

- 3.1 Software requirement specifications,
- 3.2 Project planning,
- 3.3 Scheduling fundamentals, Effort Estimation models,
- 3.4 Estimation scheduling,
- 3.5 Effort Estimation approaches: PERT and CPM Scheduling.

**PART-B**

**Unit-4: Risk and recovery management**

- 4.1 Concept of Risks & Risk Management,
- 4.2 Risk Assessment & Control,
- 4.3 Risk Management models,
- 4.4 Configuration Management Process
- 4.5 Recovery management techniques

### Unit-5: Project Tracking and Controls

- 5.1 Schedule Management,
- 5.2 Milestone list, Project Crashing and fast tracking,
- 5.3 Crash process & Network analysis,
- 5.4 Project Planning and Project Size Estimation Metrics

### Unit-6: Quality Control, Project Review & Closer

- 6.1 Formal technical reviews and reports, Formal approaches to software quality assurance,
- 6.2 Defect prevention planning,
- 6.3 Quality Control tools: Process flow chart, Perato chart, Run chart,
- 6.4 Critical Change Management,
- 6.5 Defect analysis and prevention,
- 6.6 Project Closer analysis and Reports.

**BCS-DS-482: MOBILE APPLICATION DEVELOPMENT LAB**

Periods/week	Credits	Max. Marks	: 100
P :4	2.0	Continuous Evaluation	: 50
Duration of Exam: 2 Hrs		End Sem Examination	: 50

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-482.1. Understand enterprise scale requirements of mobile applications.
- BCS-DS-482.2. Recognize the operation of the application, application lifecycle, intents, and Activities.
- BCS-DS-482.3. Summarize UI - components, layouts, event handling.
- BCS-DS-482.4. Illustrate custom UI elements, positioning, experiment with broadcast receivers, services, working API's for data handling
- BCS-DS-482.5. Integrate and Support Live Locations and Menu.
- BCS-DS-482.6. Designing and Deploying Hybrid application.

**List of Practicals:**

- Exercise 1 - Create a Basic Application using android and ios
- Exercise 2 - Working with Forms
- Exercise 3 - Working with Intents
- Exercise 4 - Apply Style and Theme in an App
- Exercise 5 - Introduction to Scrollable Views, Tabs and Pages
- Exercise 6 - Asynchronous Network Access
- Exercise 7 -XCTest, Memory Management and Instruments, and Final Project Support
- Exercise 8 - Create an App that does payment process via a Context Menu
- Exercise 9 - Create an App that does currency converter operations using an options menu
- Exercise 10 - Create an App that provides your current location on the map
- Exercise 11 - Create an App that fragments the screen horizontally.
- Exercise 12 - Create an App that accesses the Bluetooth and camera of your phone.
- Exercise 13- Create an App that records and plays audio.
- Exercise 14- Create an App displays the progress of task

**BCS-DS-472: Web Development - II**

Periods/week	Credits	Max. Marks	: 100
P :2	1.0	Continuous Evaluation	: 50
Duration of Exam: 2 Hrs		End Sem Examination	: 50

**Pre-Requisite: Knowledge of HTML, CSS, JavaScript, bootstrap, angular JS**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-472.1. Create basic and advanced web applications with Node js, React.js and Native Js
- BCS-DS-472.2. Identify and implement various techniques in C
- BCS-DS-472.3. Understand and implement various formats related to data handling.
- BCS-DS-472.4. Differentiate and implementation between server side scripting and client side scripting techniques
- BCS-DS-472.5. Understand and implement MVC framework
- BCS-DS-472.6. Develop the solution for the real world problem

**PART –A**

**Unit-1:** Node.js introduction and environment setup, rept terminal, NPM, callback concepts, event loop, event emitter, buffers, streams, file system, global objects, utility modules, web module, express framework, RESTful application, scaling application, packaging.

**Unit-2:** Introduction to React.js, History of front end libraries, Motivation for using React, Original DOM vs Virtual DOM, Environment Setup, JSX,

**Unit-3:** Components, component lifecycle, State, Props and props types, Props Validation, Forms, Events, Refs, Keys, Router, Flux Concepts, Animation

**PART –B**

**Unit-4:** ReactNative overview, app, state, props, styling, firebox, ListView, Text Input, ScrollView, Images, HTTP, Buttons, Animations, Debugging, Router, Running IOS, Running Android

**Unit-5:** React Native View, Web View, Modal, ActivityIndicator, Picker, StatusBar, Switch, Text, Alert, GeoLocation, AsyncStorage.

**Unit-6:** Grunt, CSS minifier, Less, Sass

 Any Text editor  
 Internet Connection/ Javascript libraries

**Note:** The faculty members are required to make sure that all the students perform at least one experiment related to the topics mentioned. In addition to this the faculty teaching the course, is required to make students identify a project during the initial lectures, and let students implement the concepts learned, as the course progresses. The evaluation should be only on the basis of, how complex the objectives were set and how much percentage of the same have been implemented in the final project, in the efficient manner.

**BCS-DS-473: Programming using R**

Periods/week	Credits	Max. Marks	: 100
P :2	1.0	Continuous Evaluation	: 50
Duration of Exam: 2 Hrs		End Sem Examination	: 50

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-473.1. Understand the fundamental syntax of R through readings, practice exercises, demonstrations, and writing R code.
- BCS-DS-473.2. Perform appropriate statistical tests using R
- BCS-DS-473.3. Analyze surveys, experiments and other data sets and present findings using the appropriate R packages.
- BCS-DS-473.4. Execute and examine various operation performed on various types of data sets.
- BCS-DS-473.5. Visualizing data using R with different type of graphs and charts.
- BCS-DS-473.6. Design and develop the solution for the real analytical problem.

**List of Practical's:**

- Practical 1. Basics of R, R data types and objects, reading and writing data
- Practical 2: learn the Control structures, functions, scoping rules
- Practical 3: Loop functions, date and time.
- Practical 4. Vectors, data frames, list, matrices and writing functions
- Practical 5: Importing data. (csv, xls, txt etc)
- Practical 6: Mean, Median, Mode using vector
- Practical 7: Plotting with ggplot2-
- Practical 8: Data Analysis in R Studio. Regression analysis, correlation analysis
- Practical 9: Graphs, plots , bar chart, box plot, pie chart, dot plots, scatter plots
- Practical 10: A data science project –more advances
- Practical 11: Write a R program to sort a given data frame by multiple column(s)
- Practical 12: Create the following vectors in R.
  - a = (5, 10, 15, 20, ..., 160)
  - b = (87, 86, 85, ..., 56)Use vector arithmetic to multiply these vectors and call the result d. Select subsets of d to identify the following.
  - What are the 19th, 20th, and 21st elements of d?
  - What are all of the elements of d which are less than 2000?
  - How many elements of d are greater than 6000? Return TRUE or FALSE.
  - Find the elements of a given vector that are not in another given vector.
  - To test whether the value of the element of a given vector greater than 10 or not.
- Practical 13. Write a R program to find row and column index of maximum and minimum value in a given matrix.
- Practical 14. Write a R program to create a list containing a vector, a matrix and a list and give names to the elements in the list. Access the first and second element of the list
- Practical 15: Using radiology datasets, use R to compute the following statistics of data sets:
  - (a) sum
  - (b) median
  - (c) standard deviation
- Practical 16: From the radiology data, examine the histograms and box plots of clinic visits and radiology visits. (Note: these will be two separate box plots, not a single side-by-side box plot as above.
- Practical 17. Use R to create the following two matrices and do the indicated matrix multiplication.

$$\begin{bmatrix} 7 & 9 & 12 \\ 2 & 4 & 13 \end{bmatrix} \times \begin{bmatrix} 1 & 7 & 12 & 19 \\ 2 & 8 & 13 & 20 \\ 3 & 9 & 14 & 21 \end{bmatrix}$$

Practical 18: The dataset related to RADIOLOGY .contains hospital information for 31 months: visits to radiology, patient-days, and clinic visits. Save this file and use read. Table to import it into R.

What are the means and standard deviations of the four data variables (excluding month)?

Write a R program to call the (built-in) dataset air quality. Check whether it is a data frame or not?

Order the entire data frame by the first and second column

Practical 19: From the radiology data, construct a scatter plot of clinic visits (x) versus radiology visits (y). Perform the simple linear regression of radiology visits on clinic visits and add the regression line to the plot. Briefly comment on the fit.

**BCS-DS-478: XML based lab**

Periods/week Credits  
P :4 2.0  
Duration of Exam: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Pre-Requisite: Basic Knowledge of computers**

**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-478.1. Understand the basic concept of XML language.
- BCS-DS-478.2. Demonstrate the XML document using the ER diagrams
- BCS-DS-478.3. Apply Queries in different scenarios.
- BCS-DS-478.4. Create External DTD and Schemas.
- BCS-DS-478.5. Design stylesheets.

**List of Practicals:**

1. Write a program to create well formed XML.
2. Write a program to generate an XML document using the ER Diagram.
3. Write a program to write a XPATH query for the given Scenarios.
4. Write a program to Create an External DTD and Schema for the particular specification.
5. Write a program to apply Stylesheet to XML.
6. Write a program to write XSL Transformations and link the XML files to them to produce particular output when the XML files are opened in a browser
7. Write a program in XML using Schema
8. Write a program in XML using CSS with DTD.
9. Write a program in XML using CSS with border and table property
10. Write a program in XML using CSS with XSLT
11. Write a program in XML using CSS using different colour properties
12. Write a program in XML using CSS using different text transformation properties

**Software required/Weblinks:**

(Deemed to be University under section 3 of the UGC Act 1956)

**BCS-DS-432: SOFTWARE ENGINEERING AND DEVELOPMENT PROCESSES**

Periods/week Credits

L: 3 T: 0 3.0

Duration of Examination: 3 Hrs

Max. Marks : 200

Continuous Evaluation : 100

End Term Examination :100

**Pre-Requisites:** Object Oriented Programming (BCS-DS-302)

**Course Type:** Program Elective

**Course Outcomes:** The students will be able to-

BCS-DS-432.1. Understand and Apply the use of models for designing S/W model.

BCS-DS-432.2. Classify UML as a tool to design and evaluate the S/W model.

BCS-DS-432.3. Justify the various techniques used for Model Refinement.

BCS-DS-432.4. Develop the S/W project design using the various types of diagrams used to depict the scenarios.

**PART-A**

**Unit-1: Introduction**

- 1.1. Emergence of software engineering, Software product, development of software,
- 1.2. Software life cycle models,
- 1.3. Software characteristics, Applications of software,
- 1.4. Software Project management,
- 1.5. Review of the Traditional Methodologies, Advantages of Object Oriented Methodologies over Traditional Methodologies,
- 1.6. Classes, Objects, Encapsulation, Association, Aggregation, Inheritance, Polymorphism, States and Transitions,

**Visual Modelling using Unified Modelling Language (UML)**

- 1.7 Introduction to Modelling, Object Oriented Modelling concepts,
- 1.8 Introduction to Unified Modelling Language (UML), History of UML, Overview of UML,
- 1.9 Capabilities, Usage of UML, Introduction to Rational Rose, Rational Rose CASE tool, Capabilities of Rational Rose Case Tool,

**Unit-2: Introduction to Object Oriented Software Development Process**

- 2.1 Introduction to OOSD processes. Development stage, Elaboration Stage, Construction Stage, Transition Stage,
- 2.2. Creating Use Case Diagrams: Actors and Use Cases, Use Case Relationships,
- 2.3. Types of Relationships,
- 2.4. Use Case Diagrams: Diagrams in Rational Rose,
- 2.5. Activity Diagrams: Activities, Transitions, Decision Points, Swimlanes,

**Unit-3: Modelling Classes**

- 3.1. Identifying Classes and Packages,
- 3.2. Drawing Class Diagram: State, Behaviour, Identity of Objects, Stereotypes and Classes,
- 3.3. Creating and Documenting Classes in Rational Rose, Packages, Drawing Class Diagram,
- 3.4. Specifying Relationships: Defining Relationships, Association and Aggregation Relationships, Naming Relationships, Role Names, Multiplicity Indicators, Reflexive Relationships,
- 3.5. Package Relationships, Inheritance, Finding Relationships, Creating Relationships in Rational Rose,

**PART-B**

**Unit-4: Modelling Object Interactions**

- 4.1. Documenting Scenarios using Interaction Diagrams,
- 4.2. Types of Interaction Diagrams,
- 4.3. Adding Behaviour and Structure, Representing Behaviour and Structure,
- 4.4. Creating Attributes & Operations and documenting them, Displaying attributes and operations,
- 4.5. Association Classes,
- 4.6. Analysing Object Behaviour: Modelling Dynamic Behaviour, States,

### Unit-5: Model Refinement

- 5.1. Revisiting the Model, Making the Model Homogeneous,
- 5.2. Combining Classes, Splitting Classes, Eliminating Classes,
- 5.3. Consistency Checking, Scenario Walk-through, Event Tracing, Documentation Review,
- 5.4. Designing the System Architecture: The need for Architecture, View of Architecture, Logical view, Component View, Process View, Deployment View, Use Case view,

### Unit-6: The Iteration Planning Process

- 6.1. Benefits, Goals, Design the User Interface,
- 6.2. Adding Design Classes,
- 6.3. The Emergence of Patterns, Designing Relationships,
- 6.4. Designing Attributes and Operations, Designing for Inheritance,
- 6.5. Coding, Testing, and Documenting the Iteration.

### Text Books / Reference Books:

1. UML User Guide : Grady Booch, James Rumbaugh, Ivar Jacobson, 1st Edition, 2000, Addison Wesley.

MRTIIR

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)

**BCS-DS-483: SOFTWARE ENGINEERING AND DEVELOPMENT PROCESSES LAB**

Periods/week	Credits	Max. Marks	: 100
P: 2	1.0	Internal	: 50
Duration of Examination: 2 Hrs		External	: 50

**Co-Requisite:** Software Engineering And Development Processes (BCS-DS-432)

**Course Type:** Program Elective

**Course Outcomes:** The students will be able to

- BCS-DS-483.1. Explain how a system interacts with its environment.
- BCS-DS-483.2. Apply the process of object-oriented analysis and design to software development.
- BCS-DS-483.3. Test various UML using the appropriate notation.
- BCS-DS-483.4. Validate the Rational Rose Software for the construction of UML models and expressing the appropriate notation associated with each model.

Teacher(s) are expected to provide at least four Case Studies to the students. The Students are expected to go through the Case Studies, provided to them, thoroughly in the practical classes and prepare design documentation using Relational Rose tool. Two examples of Case Studies are shown below:

**Case Study-I: University Course Registration System:**

Students request a course catalogue at the start of each semester, which contains a list of the semester's course options. To assist students in making educated judgments, information about each course, such as professors, departments, and so on, will be included. Students can choose from four semester-long courses offered by the system.

In addition, each student will indicate two alternate options in the event that the course they are interested in is full or cancelled. A course offering must have a maximum of 10 students and a minimum of three students. The system communicates the information to the billing system when the registration procedure is completed so that the student can be billed for the course during the semester.

The professor should be able to access the system to indicate which courses they will be teaching and to see which students are signed up for the course.

Students are given a certain amount of time to adjust their schedules. During this time, students are permitted to use the system to add, drop, or change courses.

**Case Study-II: ATM installation:**

The ATM for any bank has to be installed at the pre-determined location and loaded with the system software and case, etc. The maintenance department is in charge of dealing with issues such as machine maintenance, troubleshooting, and error correction, among other things. Every day, the department uses the identical procedure to load the cash machine.

To access the machine, the account holder must have the ATM Card and the right PIN/Password. The ATM should confirm each customer's entry, check the available balance in the account, and only allow cash withdrawals within the defined range. The system also includes features such as dropping a check, printing a balance-amount-slip, and billing the account holder.

**List of Practicals:**

1. Explore Rational Rose tool of IBM and high light its features and functionalities.
2. (a) Design Case Study and prepare Software Requirement Specifications.  
  
(b) Using **Rational Rose** make Object Oriented Design and UML Diagrams keeping in view your Software Requirement Specifications document.

Using the Case Study provided, perform the following practical:

3. Identify and create the actors for Case Study - I.
4. Provided with the use case of Student Registration and Course Information maintenance. Identify and create 4 more such use cases from Case Study - I.

5. Create the flow of events for any two use cases identified from Case Study- I.
6. Taking Case Study -I as reference, create extend & include relationship between any four use cases identified earlier.
7. Create the main use case Diagram for the Case Study -I.
8. Identify & create the communicate associational for any six entities in Case Study -I.
9. Create the activity Diagram for any two use cases in Case Study -I.
10. Identify and Create the actors for Case Study -II.
11. Identify and create the objects, classes & Packages for Case Study -II.
12. Create a sequence diagram for any two three objects identified in Case Study -II.
13. Identify and create the communicate association for any five entities in Case Study -II.
14. Identify & create the aggregation relationship between any four classes identified in Case Study -II.
15. Create & document the attributes for any four classes in Case Study- II.

**Text Books / Reference Books:**

**BCS-DS-623: Object Oriented Modeling & Design**

Periods/week	Credits	Max. Marks	: 200
L: 3	T: 0	3.0	Continuous Evaluation : 100
Duration of Examination: 3 Hrs		End Sem Examination	: 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-623.1 Demonstrate the ability to apply the knowledge of object-oriented concepts for solving system modeling and design problems.
- BCS-DS-623.2 Design and implement object-oriented models using UML appropriate notations
- BCS-DS-623.3 Ability to apply the concepts of object-oriented methodologies to design efficient software from the problem statement.
- BCS-DS-623.4 Implementing object-oriented designs or models.
- BCS-DS-623.5 Understand the concept of different patterns for constructing software architectures through object-oriented models.
- BCS-DS-623.6 Understand the problems, communicating with application experts, modeling enterprises, preparing documentation, and designing programs by using object-oriented models.

**PART- A**

**Unit-1: Introduction to Object Oriented Modeling**

- 1.1 Object-Orientation in software development, usefulness of OO development
- 1.2 Modeling as Design Technique, principles of modeling
- 1.3 Class Modeling: Object and class concepts; Link and associations concepts; Generalization and inheritance; A sample class model;
- 1.4 Navigation of class models, Links and association, inheritance, generalizations, aggregation, abstract classes, meta data, Reification, Constraints, Derived data

**Unit-2: State and Interaction Modeling**

- 2.1 Events, States, Transitions and Conditions
- 2.2 State diagrams, State diagram behavior
- 2.3 Interaction Modeling: Activity models
- 2.4 Relationship of Object, Functional and Dynamic Models,
- 2.5 Object Oriented Software life cycle,

**Unit-3: Unified Modeling Language and Structural Modeling**

- 3.1 Conceptual model of UML, building blocks of UML, Actors and use cases
- 3.2 Use of UML in Object Oriented Software development,
- 3.3 Classes, relationships, class diagram
- 3.4 Link and Association concepts -Links and Associations, Multiplicity, Association and Names, Ordering, Association Classes, Qualified Association

**PART- B**

**Unit-4: Behavioral Modeling**

- 4.1 Use case Diagram: use cases, Actors, Communication lines, Use case relationships
- 4.2 Sequence Diagrams: Objects/ Participants, Time, events, Activation Bars, signals, message arrows, synchronous and asynchronous messages, return message, create and destroy message
- 4.3 Events and signals, state machines,
- 4.4 Process and threads, time and space, state chart diagrams

**Unit-5: Architectural Modeling**

- 5.1 Architectural Modelling Concepts
- 5.2 Building Blocks for Components diagrams;
- 5.3 Modelling techniques for component diagrams

#### 5.4 Deployment diagrams

### Unit 6: Object Mapping with Databases

- 6.1 Relational Database Schema for Object Modes
- 6.2 Object Classes to Database Tables
- 6.3 Mapping Associations to Tables
- 6.4 Mapping Generalizations to Tables
- 6.5 Interfacing to Database
- 6.6 Object Mapping with Databases:an Example

#### Text Books / Reference Books:

2. Bruegge, B. and Dutoit, A.H., 2009. Object--Oriented Software Engineering. Using UML, Patterns, and Java. Learning, Pearson Education India.
3. Booch, G., 2006. Object oriented analysis & design with application. Pearson Education India.
4. Booch, G., 2005. The unified modeling language user guide. Pearson Education India.

**Instructions for paper setting:** Seven questions are to be set in total. First question will be conceptual covering entire syllabus and will be compulsory to attempt. Three questions will be set from each Part A and Part B (one from each unit) Student needs to attempt two questions out of three from each part. Each question will be of 20 marks.

#### Distribution of Continuous Evaluation:

Sessional- I	30%
Sessional- II	30%
Assignment/Tutorial	20%
Class Work/ Performance	10%
Attendance	10%

#### Evaluation Tools:

Assignment/Tutorials  
 Sessional tests  
 Surprise questions during lectures/Class Performance  
 End Semester Examination

#### COURSE ARTICULATION MATRIX:

**BCS-DS-672: Object Oriented Modeling & Design Lab**

Periods/week	Credits	Max. Marks	: 100
P: 2	1.0	Continuous Evaluation	: 50
Duration of Examination: 2 Hrs		End Sem Examination	: 50

**Co-Requisite: Object Oriented Modeling & Design(BCS-DS-623)**

**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-672.1. Select the basic elements of modeling such as Things, Relationships and Diagrams depending on the views of UML Architecture and SDLC
- BCS-DS-672.2. Apply basic and Advanced Structural Modeling Concepts for designing real time applications
- BCS-DS-672.3. Design Class and Object Diagrams that represent Static Aspects of a Software System.
- BCS-DS-672.4. Analyze Dynamic Aspects of a Software System using Use Case, Interaction and Activity Diagrams
- BCS-DS-672.5. Apply techniques of State Chart Diagrams and Implementation Diagrams to model behavioral aspects and Runtime environment of Software Systems.
- BCS-DS-672.6. Implement Use case and activity diagram to illustrate the analysis and design concepts.

**List of Practicals:**

1. Design ATM System Using Structural & Behavioral UML Diagram.
2. Develop Object Model (say) for Processing Examination Data.
3. Design the OOM for Processing issue-function of a Library and develop Object Model and Functional Model. Write codes and test these models with given data.
4. Design use case diagram for Passport Automation System.
5. Develop OOM for Information System of an Organization. Create Object Model, Functional Model giving a few activities.
6. Develop OOM for various modules for ATM Banking System.
7. Design class diagram for Book bank management system.
8. Develop OOM for simple animation of objects and test it with various types of animation activities.
9. Design sequence diagram for Hospital management System.
10. Design University Result Management System Using Structural & Behavioral UML Diagram.

**BCS-DS-433: Dev Ops**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Term Examination : 100

**Pre-Requisite: Knowledge of software engineering**  
**Course Type: Program Electives**

**Course Outcomes: The students will be able to-**

- BCS-DS-433.1:Enumerate the principles of continuous development and deployment
- BCS-DS-433.2:Understand automation of configuration management, and IT service agility
- BCS-DS-433.3:Describe DevOps methodologies and their key concepts
- BCS-DS-433.4: Use version control systems, integration and monitoring tools

**PART-A****Unit 1 : Introduction to SDLC**

Introduction to Software engineering, Phases of Software Development life cycle. Waterfall method, Values and principles of agile software development, Agile Vs Waterfall Method, Iterative Agile Software Development, Developers vs IT Operations conflict

**Unit 2: Fundamentals of DevOps**

Understanding DevOps movement, DevOps Lifecycle, Continuous Integration, Configuration Management, Continuous Delivery/ Continuous Deployment, Continuous Monitoring, Continuous Feedback, Benefits of CI/CD, Metrics to track CICD practices

**Unit 3: Tools and Technologies**

Version control: Git, SVN, Build: Maven, Integration: Jenkins, Configuration Management: Chef, Container: Docker, Monitoring: Zenoss, Nagios

**PART-B****Unit 4: Integration with Jenkins**

Jenkins – Introduction, Jenkins installation with plugins, Java, Maven/Ant, configuration in Jenkins, Create and configure build job for Java application with Maven, Dashboard view plugin – overview and usage, Email notifications based on build status

**Unit 5: Building the Code and Configuring Build Pipeline**

Built-in Delivery Pipelines of Jenkins, Build Pipeline Configuration for End to End Automation to manage lifecycle of continuous integration, Deploying a WAR file from Jenkins to Local Tomcat Server Provisioning and Configuration Management, Virtual Machines and Containers,

**BCS-DS-434: MICROSERVICES ARCHITECTURE & IMPLEMENTATION**

**Periods/week Credits**  
**L :3 T: 0 3.0**  
**Duration of Exam: 3 Hrs**

**Max. Marks : 200**  
**Continuous Evaluation : 100**  
**End Term Examination : 100**

**Pre-Requisite: Knowledge of microservices**  
**Course Type: Program Electives**

**Course Outcomes: The students will be able to-**

BCS-DS-434.1: Design web applications  
BCS-DS-434.2: Describe importance of Microservices  
BCS-DS-434.3: Understand basic concepts of Docker and Kubernetes  
BCS-DS-434.4: Deploy applications on docker and Access the Kubernetes

**PART-A**

**UNIT 1: Basic Introduction to HTML**

Introduction, Elements, Tags, Text, Formatting , Attributes , Font , Text Links, Comments, Lists , Images, Tables, Bgcolor, Radio, Password and CSS : Introduction, Box Model(Border, Outline, Margin,Padding), Styling(Backgrounds ,Text , Fonts, Links ,Lists, Tables). Client Server Architecture, JavaScript Basics, Nature of JavaScript language, Understand JavaScript primitive types

**UNIT 2: JavaScript Objects**

Java Script Array, Date and Error Objects types, Understand Java Script Array Objects, Understand Java Script Date Objects, Understand Java Script Error Objects Java Script Variables and Control Statements: - JavaScript Variables and different Control Statements, understand how to define JavaScript Variables, Work Java Script If statements, Work Java Script switch statements, Work Java Script for and while loop statements JavaScript Functions: -introduces JavaScript Functions, declare a JavaScript function, creating custom objects with functions, adding functions to prototypes, Self, executing functions. Client-Side Java Script: -JavaScript is used with HTML and the Document Object Model i.e DOM, Understand Scripts in HTML documents, Describe the document object model (DOM) hierarchy, Overview of the DOM specification levels, Describe the window and document objects, Accessing document elements

**UNIT 3: Server side nodejs**

Key features of NodeJS, Installation and Configuration, NodeJS Command Line, Sample Project using Node Express command prompt, Nodeclipse plugin, Sample Project using Nodeclipse, Performing CRUD Operations, Key features of MongoDB, Connection Pooling using NodeJS Mongo driver

**PART-B**

**UNIT 4: Docker architecture:**

Virtual machines versus containers, about containers, Docker: A shipping container for code, Benefits of using containers, Docker basic concepts, Docker shared and layered file systems technology.

**UNIT 5 :**

Container ecosystem, Kubernetes, Container, orchestration, Kubernetes architecture, Master Node Components, Worker Node Components, Kubernetes Building Blocks, Images, Immutability, Pod, Config Maps & Secrets, Deploying Applications on Kubernetes, Pod Health Checking, Kubectl Commands, Cloud Application Component Architecture, Benefits of using Kubernetes with IBM Containers, About Microservices ,monolithic application, microservice security, api management and gateways, the future of microservices, microservices governance.

# **SEMESTER – V**

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-501: Design & Analysis of Algorithms**

Periods/week	Credits	Max. Marks	: 200	
L :3	T: 1	4.0	Continuous Evaluation	: 100
Duration of Exam: 3 Hrs		End Sem Examination	: 100	

**Pre-Requisite: Data Structures & Algorithms (BCS-DS-301)**  
**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-501.1. Remember and relate algorithms and their complexity.
- BCS-DS-501.2. Understand various problem-solving algorithms.
- BCS-DS-501.3. Apply and examine different algorithmic methods on real life problems.
- BCS-DS-501.4. Analyze graph and network concepts.
- BCS-DS-501.5. Evaluate a series and NP completeness of a problem.
- BCS-DS-501.6. Create and assemble advanced features of algorithms and the improvement of computational efficiency.

**PART- A**

**Unit 1: Algorithm and its performance analysis**

- 1.1 Introduction: Characteristics of algorithm.
- 1.2 Analysis of algorithm: Asymptotic analysis of complexity bounds – best, average and worst-case behavior; Performance measurements of Algorithm, Time and space trade-offs.
- 1.3 Analysis of recursive algorithms through recurrence relations: Substitution method, Recursion tree method and Masters' theorem.

**Unit 2: Fundamental Algorithmic Strategies (Part-I)**

- 2.1 Brute-Force method.
- 2.2 Divide and Conquer (Strassen's matrix multiplication, finding maximum and minimum, Convex hull).
- 2.3 Greedy problem (Knapsack problem, Huffman algorithm, Single source shortest path, Minimum cost spanning trees, Task scheduling algorithm).
- 2.4 Dynamic Programming (All pairs shortest path, Single source shortest path, Optimal BST, 0/1 Knapsack, Travelling salesman problem, Matrix chain multiplication, Longest common subsequence).

**Unit 3: Fundamental Algorithmic Strategies (Part-II)**

- 3.1 Branch and Bound method (0/1 Knapsack problem, Travelling salesman problem).
- 3.2 Backtracking method (N-queens problem, Sum of subsets, Graph coloring, Hamiltonian cycle, Knapsack problem).
- 3.3 Heuristics –characteristics and their application domains.

**PART - B**

**Unit 4: Graph Theory**

- 4.1 Graph and Tree Algorithms: Traversal algorithms: Depth First Search (DFS) and Breadth First Search (BFS).
- 4.2 Shortest path algorithms, Transitive closure, Minimum Spanning Tree, Floyd-Warshall algorithm.4.3 Topological sorting, Network Flow Algorithm.

**Unit5: String matching and NP completeness**

- 5.1 String Matching algorithms: Naive string-matching algorithm, Rabin-karp algorithm, String matching with finite automata, Knuth-Morris-pratt algorithm.
- 5.2 Tractable and Intractable Problems: Computability of Algorithms, Computability classes – P, NP, NP-complete and NP-hard.
- 5.3 Cook's theorem, Standard NP-complete problems and Reduction techniques.

**Unit6:Advanced Topics**

- 6.1 Approximation algorithms, Randomized algorithms.

## 6.2 Class of problems beyond NP – P SPACE.

**BCS-DS-502: Formal Language & Automata Theory**

Periods/week	Credits	Max. Marks	: 200	
L :3	T: 1	4.0	Continuous Evaluation	: 100
Duration of Exam: 3 Hrs		End Sem Examination	: 100	

**Pre-Requisite: Basic Knowledge of computers**

**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-502.1. Recognize and manipulate the different concepts of formal languages such as formal proofs, (non-)deterministic automata, regular expressions, regular languages, context-free grammars, context-free languages, Turing machines.
- BCS-DS-502.2. Understand about the finite automata and conversion between deterministic and non-deterministic finite automata.
- BCS-DS-502.3. Prove and examine the properties of regular languages and automata with rigorously formal mathematical methods.
- BCS-DS-502.4. Analyze and design PDA for corresponding context-free grammars accepting or generating a certain language.
- BCS-DS-502.5. Evaluate and construct a TM for certain language.
- BCS-DS-502.6. Specify the computability and tractability of various class of problems.

**PART-A**

**Unit-1: Introduction to Formal languages**

- 1.1 Overview: Alphabets, Strings & Languages, basic Definition of Grammar
- 1.2 Chomsky Classification of Languages: Regular, context free, unrestricted, Context sensitive grammar and corresponding languages
- 1.3 Derivation & Languages generated by a Grammar
- 1.4 Relation between languages of classes.

**Unit-2 Automata theory**

- 2.1 Finite Automata, representation of FA,
- 2.2 Deterministic finite Automata (DFA) & Nondeterministic finite Automata (NFA),
- 2.3 Subset Algorithm to convert NFA to DFA , Minimization of Finite Automata.
- 2.4 Finite State Machine with output- Moore machine and Melay Machine,
- 2.5 Conversion of Moore machine to Melay Machine & Vice-Versa

**Unit-3: Regular languages**

- 3.1 Regular Expressions
- 3.2 Equivalence of Finite Automata and Regular Expressions.
- 3.3 Regular expressions, identity rules. Arden's theorem state and prove
- 3.4 Inter conversion of regular expression and FA.
- 3.5 The Pumping Lemma for Regular Sets, Applications of the pumping lemma
- 3.6 Closure properties of regular sets.

**PART -B**

**Unit-4: Context Free languages and push down Automata**

- 4.1 Properties of context free grammar, definition, Context free
- 4.2 Ambiguity in context free grammar, Derivation tree, application of Context free Grammars
- 4.3 Simplification of Context Free grammar Reduced forms Removal of useless Symbols and unit production
- 4.4 Chomsky Normal Form (CNF) and Greibach Normal Form (GNF)
- 4.5 Pumping lemma for CFG.
- 4.6 Introduction to Push down Stack Machine Deterministic PDA, Non Deterministic PDA
- 4.7 Acceptance of CFL, Acceptance by final state and acceptance by empty state.
- 4.8 Equivalence of CFL and PDA, interconversion

**Unit 5: Unrestricted language and Turing Machine**

- 5.1 Unrestricted languages, Church–Turing thesis
- 5.2 Turing Machine, definition, model
- 5.3 Design of TM
- 5.4 Variations of Turing Machines, Universal Turing Machine, Post Machine

**Unit-6: Computability and Intractability**

- 6.1 Halting problem of Turing Machine
- 6.2 Problem of Decidability and Undesirability , Examples of Undecidable problem
- 6.3 Intractable Problems: The Classes P and NP, An NP-Complete Problem.
- 6.4 Post-Correspondence Problem.
- 6.5 Properties of Recursion and Recursively Enumerable Languages;
- 6.5 Rice’s theorem

**Text Books / Reference Books:**

**BCS-DS-503: Artificial Intelligence**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-503.1. List the basic problems solved using Artificial Intelligence techniques.
- BCS-DS-503.2. Explain artificial intelligence techniques and their application areas.
- BCS-DS-503.3. Practice various methods of knowledge representation and reasoning.
- BCS-DS-503.4. Examine different artificial techniques and learning systems.
- BCS-DS-503.5. Judge the concepts of knowledge acquisition in perspective of expert system and intelligent agents.
- BCS-DS-503.6. Create a basic expert system.

**PART-A**

**Unit-1: Introduction to AI and its Languages**

- 1.1 Foundation and history of AI,
- 1.2 AI programming languages,
- 1.3 Introduction to AI languages: Elements of LISP and PROLOG Languages.
- 1.4 AI problems and techniques, formulation of problem,
- 1.5 Problem characteristics. Production System and Production System characteristics,

**Unit-2: AI Search Techniques**

- 2.1. Heuristic Search Techniques: Generate and Test,
- 2.2. Hill Climbing, Steepest Hill Climbing,
- 2.3. Best First Search, A\*,
- 2.4. Problem Reduction, AO\*,
- 2.5. Constraint Satisfaction,
- 2.6. Means-Ends Analysis.
- 2.7. Optimization and search such as stochastic annealing and genetic algorithm.

**Unit-3: Knowledge Representation**

- 3.1 Knowledge-Representation, KR Approaches and Issues,
- 3.2 Procedural and Declarative knowledge,
- 3.3 Predicate Logic: Representation and resolution,
- 3.4 Logic programming, Forward and Backward Reasoning,
- 3.5 Slot and Filler structures: Semantic Nets,
- 3.6 Frames,
- 3.7 Conceptual Dependency and
- 3.8 Scripts.

**PART-B**

**Unit-4: Reasoning**

- 4.1 Limitations of Monotonic Systems,
- 4.2 Basic Concepts of Non-Monotonic Reasoning Systems,
- 4.3 Default Reasoning, Probability Based Reasoning, Bayes Theorem,
- 4.4 Certainty factors and Dempster-Shafer Theory of Evidential reasoning
- 4.5 Fuzzy Based Reasoning Systems.

**Unit-5: Expert Systems and Intelligent Agents**

- 5.1 Definition and Characteristics of Expert Systems,
- 5.2 Rule Based Systems Architecture, Knowledge Acquisition Concepts, Inference Engine,
- 5.3 Intelligent Agents: Definition, Structure of Agents, Types of Agents,
- 5.4 Intelligent System.

## Unit-6: Applications

- 6.1 Application to Game: Game tree,
- 6.2 Min-max search procedure,
- 6.3 Alpha beta pruning.
- 6.4 Natural Language Processing: Introduction, syntactic, semantic, discourse and pragmatic processing,
- 6.5 Robotics.

**BCS-DS-551: Design & Analysis of Algorithms Lab**

Periods/week	Credits	Max. Marks	: 100
P :2	1.0	Continuous Evaluation	: 50
Duration of Exam: 2 Hrs		End Sem Examination	: 50

**Pre-Requisite: Data Structures & Algorithms Lab (BCS-DS-351)**  
**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-551.1. Understand the programs, their working and code accordingly.
- BCS-DS-551.2. Analyze the programs based on time complexity.
- BCS-DS-551.3. Select algorithms on the basis of optimality.
- BCS-DS-551.4. Learn different methods of solving similar problems.
- BCS-DS-551.5. Solve any problem using different approaches.
- BCS-DS-551.6. Learn how to correlate different techniques.

**List of Practical's:**

1. WAP to sort a set of numbers into ascending/ Descending order using different sorting algorithms and calculate the time complexity by step-count method. Take the input-set from a table and repeat the operation several times 10,20,30,40 times and plot a graph.  
Examine the best case, worst-case and average case by taking suitable input data.
2. WAP for string matching by (i) Naive-string matching method and (ii) Rabin-Karp algorithm and compare number of operations done in these methods.
3. WAP for string matching using finite Automata method and Knuth-Morris-Pratt Algorithms.
4. WAP to find a number in an array by binary search method.
5. WAP to sort a set of numbers using (i) Merge sort and (ii) Quick-sort using divide and conquer method.
6. WAP for multiplications of two Matrices using Strassen's Multiplication Algorithms.
7. WAP to solve Knapsack problem using Greedy Algorithm.
8. WAP to solve Job Sequencing Problem with deadlines using Greedy algorithm.
9. Implement Graph on two-dimensional array and use Greedy method to obtain minimum-cost spanning tree of the graph.
10. WAP for Matrix-Chain Multiplication using Dynamic programming.
11. WAP to find the Largest Common Subsequence of two sets using Dynamic programming.
12. WAP for optimal binary search of an element in a array using Dynamic programming.
13. WAP for 0/1 Knapsack problem using Dynamic programming.
14. WAP for solution space for 8 Queen Problem and solve the problem using Back-Tracking method.
15. WAP for Sum of subsets problem of a given set using back tracking method.

**Note:** At least 5 more exercises to be given by the teacher concerned.

**BCS-DS-552: Artificial Intelligence Lab**

Periods/week Credits  
P :2 1.0  
Duration of Exam: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Co-Requisite: Artificial Intelligence (BCS-DS-503)**  
**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-552.1. Apply various techniques for solving problems using prolog programming Language.
- BCS-DS-552.2. Implement the elementary searching algorithms.
- BCS-DS-552.3. Examine and implement the different sorting algorithms.
- BCS-DS-552.4. Simulate the various graph traversing algorithm.
- BCS-DS-552.5. Design different problems such as monkey banana problem and tower of Hanoi using PROLOG.
- BCS-DS-552.6. Practice different production rules in water jug problem using PROLOG.

**Study of PROLOG**

- 1. Write a program to calculate the factorial of a number.
- 2. WAP to show binding of compound objects.
- 3. WAP to append the elements in a list.
- 4. WAP to find the length of a list.
- 5. WAP to find the element of a list given the specified position.
- 6. WAP to reverse the list.
- 7. WAP to find the intersection and union of two sets.
- 8. Write a program to create login window.

**Problems of AI**

- 9. Write a program to solve 8 queens problem.
- 10. Solve any problem using depth first search.
- 11. Solve any problem using best first search.
- 12. Solve 8-puzzle problem using best first search
- 13. Solve water jug problem giving all the production rules.
- 14. Solve Monkey banana problem.
- 15. Solve Tower of Hanoi.
- 16. WAP to sort the elements in a list using quick sort.
- 17. WAP to sort the elements in a list using merge sort.

**Proj-CS-500: SUMMER INTERNSHIP –II**

Periods/week	Credits	Max. Marks	: 100
4 weeks Minimum	2.0	Continuous Evaluation	: 100
Duration of Exam: 2 Hrs			

**Pre-Requisite: Basic Knowledge of computers**

**Course Type: Projects**

**Course Outcomes:** Students will be able to-

- Proj-CS-500.1. Actually face challenges of real field work.
- Proj-CS-500.2. Apply their learning skills to solve real life problem.
- Proj-CS-500.3. Show the research capability.
- Proj-CS-500.4. Enhance their Innovative skills.
- Proj-CS-500.5. Develop solutions.
- Proj-CS-500.6. Build technology for new areas.

Every student will have to undergo Industrial Training for 6 weeks in the relevant field of Engineering in which he/she is enrolled for B.Tech programme after 4<sup>th</sup> semester. Respective Head of Department will approve the Industry/Organization for training. During this course of time he/she will be regularly monitored and evaluated. After successful completion of the training, the student will have to submit the training report, deliver a seminar about the work/project undertaken during the training and will have to appear for viva. The evaluation of the industrial training shall be made as per following:

**Continuous Evaluation during training:**

- |   |   |           |
|---|---|-----------|
| 1. Evaluation by the Supervisor in the Industry       | : | 25 marks  |
| 2. Evaluation by Faculty Mentor during training visit | : | 10 marks  |
| 3. Internal seminar/ Presentation                     | : | 15 marks  |
| Total Marks   | : | <b>50</b> |

**End Term Evaluation after training:**

- |                         |   |           |
|-------------------------|---|-----------|
| 1. Project Report       | : | 10 marks  |
| 2. Seminar/Presentation | : | 20 marks  |
| 3. Viva                 | : | 20 marks  |
| Total marks             | : | <b>50</b> |

# MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES

(Deemed to be University under section 3 of the UGC Act 1956)

## DTI -500: Design, Thinking and Innovation -III

Periods/week Credits  
L:0 T:2 P:0 2

Max. Marks : 50  
Continuous Assessment : 50

**Pre-requisites: Design, Thinking and Innovation -II**

**Course Type: HSMC**

### Course outcomes

The students will be able to:

DTI – 500.1 Understand the Plagiarism / Feasibility tools

DTI – 500.2 Document the outcome as Research Paper / Patent / Product / Start-up /copyright

#### Activity 1:

1.1 Compilation / Documentation of the outcome (Research Paper / Patent / Product / Start-up /copyright).

1.2 Plagiarism / Feasibility check.

1.3 Identification of the suitable Journal / Patenting Agencies / Angel Investors.

1.4 Submission to the identified Journal / Patenting Agencies / Angel Investors.

### Course Articulation Matrix:

CO Statement (DTI-500)	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2
DTI-500.1	-	3	-	-	-	-	-	3	-	-	-	1	-	-
DTI -500.2	-	3	2	3	2	2	2	3	3	3	2	2	3	3

**'3' (Tick) or 'More' Substantial/High Correlation, '2' Moderate/Medium Correlation, '1' Slightly/Low Correlation, 'Blank' No Correlation**

**Evaluation Criteria:** The following evaluation parameters shall be considered for internal assessment by both research coordinators and faculty coordinator or research mentors:-

S. No.	Parameters	Description	(Marks)
1.	<b>Attendance</b>	<ul style="list-style-type: none"><li>Percentage of classes attended by the students</li></ul>	<b>5</b>
2.	<b>Continuous Performance</b>	<ul style="list-style-type: none"><li>Judge individual student's participation in the Activities</li><li>Time bound completion of Activities</li></ul>	<b>15</b>
3.	<b>Accomplishment of the Outcome</b>	<ul style="list-style-type: none"><li>Quality of the content and results</li><li>Acceptance of the outcome (Research Paper/ Patent/ Product/ Copyright)</li><li>Report submission / Presentation</li></ul>	<b>30</b>

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BHM-520: Entrepreneurship and Startups**

Periods/week Credits  
L: 2 T: 0 2  
Duration of Examination: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Term Examination : 100

**Pre-requisite: NIL**

**Course Type: Humanities & Social Science**

**Course Outcomes:** The course will enable the student to-

BHM-520.1. Acquire Entrepreneurial spirit and resourcefulness.

BHM-520.2. Understand the concept and process of entrepreneurship-its contribution and role in the growth and development of individuals and the nation.

BHM-520.3. Strengthen the skills of creation and management of entrepreneurial venture.

**Unit1: Introduction to Entrepreneurship and Start-Ups (6 Lectures)**

Definition and Traits of an entrepreneur, Intrapreneurship, Motivation, types of Business Structures, Similarities/differences between entrepreneurs and managers.

**Unit2: Business Ideas and their implementation (6 Lectures)**

Discovering ideas and visualizing the business, Activity map, Business Plan

**Unit3: Ideation Start-up and Management (7 Lectures)**

Market Analysis- Identifying the target market, Competition evaluation and Strategy development, Marketing and accounting, Risk analysis, Company's Organization Structure, Recruitment and management of talent, financial organization and management

**Unit4: Financing, Protection of Ideas and Exit strategies (7 Lectures)**

Financing methods available for start-ups in India, Communication of Ideas to potential investors- Investor Pitch, Patenting and Licenses

**Text Books/ Reference books/Web references:**

1. Steve Blank and Bob Dorf, 2020, The Startup Owner's Manual: The Step-by-Step Guide for Building a Great Company, Wiley.

**Distribution of Continuous Evaluation:**

Sessional- I	30%
Sessional- II	30%
Assignment/Tutorial	20%
Class Work/ Quiz	20%

**Evaluation Tools:**

Assignment/Tutorials  
Sessional tests  
Surprise questions during lectures/Class Performance  
Term end examination

Assignments, Sessional and End Semester Examination paper will consist of various difficulty levels to accommodate the different capabilities of students. Assessment should cover all course outcomes and upper limit for lower order skills will be 40% (for knowledge-oriented questions). However, weightage for different cognitive levels in the question papers can vary.

**Instructions for paper setting:** The paper setter must ensure the coverage of entire syllabus while setting the question papers and mention the learning outcomes across each section to be measured by the examination. Weightage of the sections may vary as per the number of respective lecture hours mentioned in the syllabus. Action verbs should be used from Bloom's Taxonomy while designing question papers.

**NAAC 'A' Grade University**

**BHM-MC-008: Quantitative Aptitude and Personality Development-II**

Periods/week Credits  
P :2 0  
Duration of Exam: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Pre-Requisite: Basic Knowledge of English, maths and reasoning**  
**Course Type: HSMC**

**Course Outcomes:** Students will be able to-

- BHM-MC-008.1. Analyze various forms of data.
- BHM-MC-008.2. Solve complex problems based on arithmetic reasoning.
- BHM-MC-008.3. Apply short tricks on complex problems of number system.
- BHM-MC-008.4. Enhance and expand word knowledge by fostering word consciousness.
- BHM-MC-008.5. Construct simple and complex sentences accurately.
- BHM-MC-008.6. Develop reading skills & build verbal reasoning skills.

**PART – A**

**Unit 1: Number System II**

- 1.1 Factors and Multiples
- 1.2 Unit Digits & Cyclicity
- 1.3 Remainders
- 1.4 Factorials
- 1.5 Logarithm

**Unit 2: Arithmetic III**

- 2.1 Interest
  - 2.1.1 Simple Interest
  - 2.1.2 Compound Interest
  - 2.1.3 Relation between SI & CI
- 2.2 Time, Speed & Distance
  - 2.2.1 Basics Formulas & Proportionality
  - 2.2.2 Average & Relative Speed
  - 2.2.3 Trains and Boats & Streams
  - 2.2.4 Circular Motion and Clocks
- 2.3 Data Interpretation
  - 2.3.1 Table and Bar graph
  - 2.3.2 Line and Pie Charts
  - 2.3.1 Mixed Charts and Caselets

**Unit 3: Verbal Reasoning III**

- 3.1 Calendar
- 3.2 Cubes and Dices
- 3.3 Data Sufficiency

**PART – B**

**Unit 4: Advanced Vocabulary**

- 4.1 Synonym & Antonym
- 4.2 One Word Substitution
- 4.3 Ordering of Words
- 4.4 Idioms and Phrases
- 4.5 Vocabulary, COW, Punctuation

**Unit 5: Sentence Construction & Syntax**

Batch 2021-25 CSE

- 5.1 Sentence Improvement
- 5.2 Spotting Errors
- 5.3 Ordering of Sentences
- 5.4 Change of Voice/ Direct & Indirect speech
- 5.5 Completing Statements/Sentences

**Unit 6: Reading Comprehension & Reasoning**

- 6.1 Strategic Reading, Eliminating Poor Reading Habits
- 6.2 Techniques to increase speed reading, comprehension and recall
- 6.3 Solving Sample RC Passages
- 6.4 Closet Test
- 6.5 Para Jumbles

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-521: COMPUTER GRAPHICS**

Periods/week Credits  
L: 3 T: 0 3.0  
Duration of Examination: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-521.1. Describe the basic concept of Computer Graphics, circle Drawing Methods and concept of polygon filling algorithms.
- BCS-DS-521.2. Relate the concept of 2-Dimensional primitives, Techniques, viewing pipeline, windows, viewports and Clipping algorithms.
- BCS-DS-521.3. Apply 3-Dimensional Graphic & transformation concepts with their matrix representation, 3-D Viewing and projection.
- BCS-DS-521.4. Examine curve representation methods, Bezier, B-Spline Curves, Hermite Interpolation method and parametric representation of surface.
- BCS-DS-521.5. Validate the concept of hidden surface, the Z- buffer algorithm, scanline algorithm and Area Subdivision algorithm.
- BCS-DS-521.6. Formulate the concept of Image, image filtering, image processing, its geometric transformation and image manipulation models.

**PART-A**

**Unit-1: Introduction to Computer Graphics**

- 1.1 Basic concepts of Computer Graphics,
- 1.2 Computer Graphics Hardware and software,
- 1.3 Two-dimensional Graphics Primitives: Points, Lines and circles; Line drawing algorithms: DDA, Bresenham's,
- 1.4 Circle drawing algorithms: Circle drawing using polar coordinates, Bresenham's circle drawing, midpoint circle drawing algorithm,

**Unit-2: Two Dimensional Transformation**

- 2.1 Polygon filling algorithms: Scanline algorithm, boundary fill algorithm, flood fill algorithm,
- 2.2 Two-Dimensional transformations: translation, scaling,
- 2.3 Rotation, reflection,
- 2.4 Composite transformations,
- 2.5 Matrix representation of 2-D transformations,

**Unit-3: Viewing and Clipping**

- 3.1 The 2-D viewing pipeline, windows, viewports, window to view port mapping,
- 3.2 Clipping: point, line, polygon,
- 3.3 Clipping line algorithms: 4 bit code algorithm, Sutherland-Cohen algorithm, parametric line
- 3.4 clipping algorithm (Cyrus Beck),
- 3.5 Polygon clipping algorithm: Sutherland-Hodgeman polygon clipping algorithm,

**PART-B**

**Unit-4: Three Dimensional Transformations and Projections**

- 4.1. Three-Dimensional graphics concepts, Three-Dimensional transformations: translation, scaling,
- 4.2. Rotation, reflection, composite transformation,
- 4.3. Matrix representation of 3-D Transformations,
- 4.4. Three-D Viewing: Projections,
- 4.5. Types of projections,

4.6. Mathematical formulation of planner geometric projections,

**Unit-5: Representing Curves and Surfaces**

- 5.1. Curve representation, Interpolation method to represent a curve,
- 5.2. Parametric representation of curves: Bezier curves, B-Spline curves and their properties,
- 5.3. Representation of curves using Hermite Interpolation Method,
- 5.4. Parametric representation of surfaces using Bezier and B-Spline curves,

**Unit-6: Hidden Surface Removal & Image Manipulation**

- 6.1. Concept of hidden surface, detection of hidden surfaces and their removal,
- 6.2. The Z-buffer algorithm, Scanline algorithm, area sub-division algorithm,
- 6.3. Concept of Image, Image Filtering, Image processing, geometric transformation of images,
- 6.4. Image manipulation: Illumination models,
- 6.5. Shading models for polygons,
- 6.6. Shadows, transparency.

**Text Books / Reference Books:**

**BCS-DS-571: COMPUTER GRAPHICS LAB**

Periods/week	Credits	Max. Marks	: 100
P: 2	1.0	Continuous Evaluation	: 50
Duration of Examination: 2 Hrs		End Sem Examination	: 50

**Co-Requisite: Computer Graphics (BCS-DS-521)**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-571.1. Define the basic concept of Computer Graphics, circle Drawing Methods, concept of polygon filling algorithms.
- BCS-DS-571.2. Generalize the concept of 2-D primitives, transformation Techniques, viewing pipeline, windows, viewports and Clipping algorithms.
- BCS-DS-571.3. Apply 3-D Graphic, transformation concepts, Viewing, projection, its types and mathematical formulation.
- BCS-DS-571.4. Analyze Bezier Curves, B-Spline Curves, representation of curve using Hemite Interpolation method and parametric representation of surface using Bezier and B- Spline Curve.
- BCS-DS-571.5. Synthesize concept of hidden surface, Z- buffer algorithm, scanline and Area Subdivision algorithm.
- BCS-DS-571.6. Validate image filtering, image processing, and its geometric transformation and image manipulation models.

**List of Programs:**

1. Write a program for 2D line drawing as Raster Graphics Display.
2. Write a program for circle drawing as Raster Graphics Display.
3. Write a program for polygon filling as Raster Graphics Display.
4. Write a program for line clipping.
5. Write a program for polygon clipping.
6. Write a program for displaying 3D objects as 2D display using perspective transformation.
7. Write a program for rotation of a 3D object about arbitrary axis.
8. Write a program for Hidden surface removal from a 3D object.
9. Write a program to draw circle and roll it along X axis and Y- axis by removing the previous circle. Also draw a pie-chart for a given dataset.
10. Write a program to draw a 2-Dimensional curve  $y=2x+4x$ ,  $0 \leq x \leq 2$ , and rotate the curve about x-axis and y- axis.
11. Write a program to draw a cylinder the axis along z-axis and then its projection on the plan  $z=ax+by$ , for different values of a and b. (Hint: first create a cylinder then color of cylinder for  $z \geq ax+by$ , to background color).
12. Write a program to draw equilateral triangles and then combine these to draw a regular hexagon and fill up the triangles with different colours.
13. Write a program to interpolate the curve for the following data using cubic (i) Bezier curve (ii) B-Spline functions:

X	1	2	3	4	5	6
Y	10	100	400	1500	4000	9000

14. Write a program to develop the bar chart and growth curves for the following sale data of items A, B and C.

Year	2004	2005	2006	2007	2008
A	500	550	600	700	750
B	700	725	750	800	850
C	600	580	540	500	580

15. Write a program to draw a chessboard with two colours and put (figures such as circle, triangles, and rectangles) in place of objects-of-chess at different positions.

**NAAC 'A' Grade University**

**BCS-DS-474: JAVA Programming**

Periods/week	Credits	Max. Marks	: 100
P :2	1.0	Continuous Evaluation	: 50
Duration of Exam: 2 Hrs		End Sem Examination	: 50

**Pre-Requisite: Object Oriented Programming (BCS-DS-302A)**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-474.1. Read, analyze and explain intermediate level Java programs.
- BCS-DS-474.2. Increase and demonstrate the efficiency, in terms of lines-of-code of O-O programming and respond to requests for exception handling when using someone else's code.
- BCS-DS-474.3. Understand the concepts of threads, multithreading and multitasking.
- BCS-DS-474.4. Use the concept of Abstract Methods, Interfaces and packages to amplify and further demonstrate O-O inheritance and polymorphism.
- BCS-DS-474.5. Create applets, place GUI components onto a computer screen and to respond to events.
- BCS-DS-474.6. Create files and read from computer files using Java.

**List of Practicals:**

1. Write a program to create an interface 'add' and implement it in a 'math' class.
2. Write a program in java to create "multiply" package and use in a different package.
3. Write a program for creating a user defined Exception named as "My Exception"
4. Write a program for implementing try-catch-finally mechanism
5. Write a program to show the life cycle of an applet
6. Write a program to create an interface for ice cream parlour.
7. Write a program to connect the database using JDBC.
8. Write a program to select all the employee with letter "n" using prepared statement
9. Write a program to use scrollable & updatable result set.
10. Write a program to commit the transactions
11. Write a program to create a smiley face using graphics class.
12. Write a program to display an image in an applet.
13. Write a program to set the font metrics of the text.
14. Write a program to synchronize a block performing multithreading.
15. Write a program to give priority to the threads.
16. Write a program to access a file randomly.
17. Write a program to copy the data of one file into another.
18. Write a program to concatenate the data of two files.
19. Write a program to create an AWT GUI application (called AWTCounter) having one label named as 'counter', one text field and one button named as 'count'. Each time the "Count" button is clicked, the counter value shall increase by 1 and the text box should display the updated value.
20. Write a program to get the key typed using key listener.
21. Write a program to display mouse events using mouse listener.
22. Write a program to create a menu with a name as 'File' containing the menu items as 'new', 'save', 'open'.
23. Write a program to create choice box in a frame and items to the choice box.
24. Write a program to create horizontal and vertical scrollbar.
25. Write a program to connect to remote object using remote method invocation.

**NAAC 'A' Grade University**

**BCS-DS-572: Dot Net**

Periods/week	Credits	Max. Marks	: 100
P: 2	1.0	Continuous Evaluation	: 50
Duration of Examination: 2 Hrs		End Sem Examination	: 50

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-572.1 Understand the Role of Visual Studio Integrated Development Environment for developing applications under the .Net Framework.
- BCS-DS-572.2. Execute the programs with basic Object Oriented Programming Concepts in C# like Class, Object, Data Abstraction, Encapsulation, Polymorphism and Multiple Inheritance through Interfaces.
- BCS-DS-572.3. Implement various Console applications to create- Arrays, Strings, .Net Collections, Property, Indexers, Delegates, and implementing Exception Handling.
- BCS-DS-572.4. Analyze the basic components for developing Windows based GUI applications, such as designing window forms, using controls, menus and be able to develop Windows application under the .Net Framework.
- BCS-DS-572.5. Evaluate the role and features of ADO.NET as a connectivity provider between application and the database.
- BCS-DS-572.6. Create simple ASP.NET Web based GUI applications.

**List of Practicals:**

1. Implement a console application that takes two numbers as input, perform various arithmetic computations (+, -, \*, x, /) on operands and displays the result of operations.
2. Implement a console application to display various patterns: like- Triangles and hut of numbers or characters etc.
3. Write a program that takes a decimal number as input and displays its equivalent in binary form.
4. Write a program to display no. of days in a month, today's and yesterday's system date and time using built-in class.
5. Implement a console application to show, how Automatic Fall through is prohibited or permitted in C#, using switch case.
6. Input 1-d array elements. Implement a console application to find the length of an array using "property" and perform sorting and reversing operations on array elements, using built-in methods of Array class.
7. Display menu for various matrix operations: Addition, Subtraction, Multiplication and transpose. Input two matrices. Write a console application to perform user selected operation.
8. Implement a console application to perform different operations on immutable string objects like copying, concatenating, comparing, inserting a substring, extracting a substring etc. using built-in methods of String class.
9. Implement a console application to perform insert and append operations on mutable string objects.
10. Define a class named-overloading, write a console application to find area of a cube, cylinder and box (using method overloading).
11. Write a program to implement multiple inheritance in c# (using interfaces).
12. Create an Interface named- "Area", write a console application for multiple implementation of an interface through classes- Square, Circle and Rectangle.
13. Implement a console application to invoke multiple methods at runtime (using delegates).
14. Implement a console application to create a property and show how property can control access to fields.
15. Define a class named- fruit. Write a console application to index an "object" of class "fruit" as an array containing fruits names (apple, mango, grapes etc. ) as elements (using indexers).
16. Write a program for throwing and handling exception using user defined exception class.

17. Write a program for exception handling with a try, multiple catch and a finally block using system defined exception classes.
18. Implement a console application to create a Stack and Queue collections and display elements (using foreach loop) after performing various operations on the respective collection.
19. Write a console application to create a Hashtable and ArrayList collections and display elements (using foreach loop) after performing various operations on the respective collection.
20. Design a windows based GUI application to create a calculator using windows forms. Use windows controls to input & display the result values.
21. Design a windows based GUI application for creating a "Login Form". Also execute event handler on clicking "submit" button at runtime.
22. Develop a windows based SDI application that allows user to make a selection, to calculate factorial of a number and to check for prime number. Design three windows forms, first form presents a choice for selecting a particular operation. The Second form calculates factorial of a number inputted by a user at run time and third form checks, whether a user entered number is prime or not.
23. Develop an ADO.Net based GUI application to retrieve data using Data Reader object from an existing table employee on the SQL server. Design the appropriate GUI to display records in the data grid.
24. Develop an ADO.Net based GUI application for Payroll management to, insert, delete, and update records in the SQL server's tables. Use SQL Command Builder Object.
25. Develop an ASP.Net GUI application that allows user to login on first web page, use appropriate controls to enter their personal information such as name, contact details, academic and college information on second web page and display the entered information on third web page, upon button click- event handling on second web page at run time.
26. Create Students table on SQL server. Design ASP.Net web pages to display student's records of a class. Display fixed number of records on a page and allow the user to navigate to next and previous pages.

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**

(Deemed to be University under section 3 of the UGC Act 1956)

**NAAC 'A' Grade University**

**BCS-DS-573: Visual Basics**

Periods/week Credits  
P: 2 1.0  
Duration of Examination: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-573.1. Interact with the different controls of .Net window applications using visual basic.
- BCS-DS-573.2. Design Single and Multiple Document interface.
- BCS-DS-573.3. Understand data components.
- BCS-DS-573.4. Implement Window based interactive applications.
- BCS-DS-573.5. Construct components based on VB.NET.

**List of Practical:**

1. Design a form such that: in event load, when project runs, the form back color property changed (chose any color).
2. Design a form with three option buttons " red ", " green " and " blue " such that when we click on options the color of the form colored by red, green and blue respectively.
3. Design a form with one text box and three check boxes such that when click on boxes the following is done: change typing to bold, italic, underline.
4. Write a Programme to use Input Box.
5. write a program to move the text (excellent) from textbox to message box and change the color of the text after click on command button (display).
6. Declare x as a constant (P), then compute the area of a circle. Put suitable design.
7. Design a form with menu and a label with a specific title. The menu contains one item color with sub menu items: red, green, blue and exit, to color the label in red, green, blue then exit from the program. Sol: put label1 with any caption for example (hello)
8. write a program to enter the marks of a student then print (pass) if he successful.
9. Write a program to enter two numbers and compute multiplication and division operations using option button with display the phrase (illegal division operation) when the denominator is zero.
10. Design the digital watch using Timer Control.
11. Write a program to find smallest number using array.
12. Write a Program using a list box and combo box.
13. Write a Program to design Menu based application.
14. Write a Program to design SDI and MDI application.
15. Design a Questionnaire or Registration form by using various form controls.
16. Connect with the data base and show database updation operation with the help of suitable GUI
17. Create an Acgtive X control.
18. Miscellaneous experiment
19. Miscellaneous experiment
20. Miscellaneous experiment

Software Required  
VB.NET

**BCS-DS-575: Go Language**

Periods/week Credits  
P: 2 1.0  
Duration of Examination: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-575.1. Formulate the algorithms for simple problems in GO Language
- BCS-DS-575.2. Accurate syntax errors as reported by the compilers as well as at run time
- BCS-DS-575.3. Define the iterative and recursive approach
- BCS-DS-575.4. Understand the various Data structures using Go Language
- BCS-DS-575.5. Deploy the Go programming techniques such as pointers, structure and file handling
- BCS-DS-575.6. Design the solutions for the real world problems

**List of Practicals:**

1. Write a program to display your personnel details.
2. Write a program to Generate Multiplication Table using for loop.
3. Write a program to calculate sum of n natural numbers
4. Write a program to swap two numbers without using temporary variables.
5. Write a program to find factorial of a number.
6. Write a program to perform various string functions.
7. Write a program to calculate average of n number using array.
8. Write a program to perform reverse sort function on array.
9. Write a program to perform operation with pointers.
10. Write a program to generate Fibonacci series using recursion.
11. Write a program to access structure members.
12. Write a program to implement bubble sorting.
13. Write a program to implement insertion sorting.
14. Write a program to implement binary search using recursion.
15. Write a program to perform various file operations.

**BCS-DS-576: SWIFT**

Periods/week	Credits	Max. Marks	: 100
P: 2	1.0	Continuous Evaluation	: 50
Duration of Examination: 2 Hrs		End Sem Examination	: 50

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-576.1. Remember the concept of variables, arrays, string, functions etc.
- BCS-DS-576.2. Understand the loops used in swift programming.
- BCS-DS-576.3. Apply the concepts learned in application areas.
- BCS-DS-576.4. Analyze programming best practices in SWIFT
- BCS-DS-576.5. Evaluate app functionality into properly designed components.
- BCS-DS-576.6. Create an IOS app from concept to working programs

**List of Practicals:**

1. Introduction to Swift Programming interface.
2. Write a Swift program to compute and return the absolute difference of n and 51, if n is over 51 return double the absolute difference.
3. Write a Swift program that accept two integer values and return true if one of them is 20 or if their sum is 20.
4. Write a Swift program to add "Is" to the front of a given string. However, if the string already begins with "Is", return the given string.
5. Write a Swift program to test if two given arrays of integers have the same first and last element. Both arrays length must be 1 or more.
6. Write a Swift program to compute the sum of all the elements of a given array of integers and length 4.
7. Write a Swift program to find the larger value of a given array of integers and set all the other elements with that value. Return the changed array.
8. Write a Swift program to draw a HTML string as bold or italic text.
9. Write a Swift program to insert a given string to another given string where the second string will be in the middle of the first string.
10. Write a Swift program to create a new string without the first and last character of a given string. The string length must be at least 2.
11. Write a Swift program that accept two strings of different length and return a string of the form short+long+short. Two given string's length may be 0.
12. Write a Swift program to develop a calculator.
13. Write a Swift program to develop a scientific calculator.
14. Create an application using mobile camera.
15. Develop an application to send a mail on iphone using default configured mail
16. Write a Swift program to read the contents of a file and using default speech to text engine and convert into speech.

**BCS-DS-577: Kotlin**

Periods/week	Credits	Max. Marks	: 100
P: 2	1.0	Continuous Evaluation	: 50
Duration of Examination: 2 Hrs		End Sem Examination	: 50

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-577.1. Recognize the operation of the application, application lifecycle, intents, and activities.
- BCS-DS-577.2. Summarize UI - components, layouts, event handling.
- BCS-DS-577.3. Illustrate custom UI elements and positioning.
- BCS-DS-577.4. Experiment with broadcast receivers, services, Kotlin APIs for data storage, retrieval, user preferences, files, and databases.
- BCS-DS-577.5. Support Live Locations and Menu.
- BCS-DS-577.6. Design and deploy his/ her Kotlin application.

**List of Practical:**

- Exercise 1 - Create a Basic Kotlin Application
- Exercise 2 - Working with Layouts
- Exercise 3 - Kotlin App-Working with Navigation
- Exercise 4 – Work with Kotlin Jetpack’s library and manage complex lifecycle situation
- Exercise 5 - Create an Kotlin App Guess the Word
- Exercise 6 - Create an Kotlin App that does distance conversion operations using an options menu
- Exercise 7 - Create an Kotlin App that provides distance from your current location to nearest mall on the map
- Exercise 8 - Create an Kotlin App that fragments the screen horizontally.
- Exercise 9 - Create an Kotlin App that accesses the Bluetooth and camera of your phone.
- Exercise 10- Create an Kotlin App that records and plays audio.
- Exercise 11- Create an Kotlin App displays the progress of task
- Exercise 12- Create an Kotlin Notification App that displays notification about the messages received.

**BCS-DS-522A: SOFTWARE DEVELOPMENT PROCESSES**

Periods/week Credits  
L: 3 T: 0 3.0  
Duration of Examination: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination :100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-522A.1. Relate the significance of modeling in S/W design USING object-oriented methodologies and the need of iterative S/W design
- BCS-DS-522A.2. Comprehend the various techniques used for Model Refinement
- BCS-DS-522A.3. Learn and compare the various methodologies used for S/W development.
- BCS-DS-522A.4. Examine UML as a tool to design and evaluate the various S/w models. Understand the issues for implementing object-oriented designs or models
- BCS-DS-522A.5. Apply the object-oriented approach and use classes, objects, polymorphism etc for project development AND Design and implement object-oriented models using UML appropriate notations
- BCS-DS-522A.6. Integrate planning processes used in industry.

**PART-A**

**Unit-1: Introduction**

- 1.1 Review of the Traditional Methodologies
- 1.2 Advantages of Object Oriented Methodologies over Traditional Methodologies
- 1.3 Classes, Objects, Encapsulation, Association, Aggregation, Inheritance, Polymorphism, States and Transitions.
- 1.4 Navigation of class models, Links and association, inheritance, generalizations, aggregation, abstract classes, meta data, Reification, Constraints, Derived data

**Visual Modelling using Unified Modelling Language (UML)**

- 1.5 Introduction to Modelling. Object Oriented Modelling concepts
- 1.6 Introduction to Unified Modelling Language (UML): History of UML
- 1.7 Overview of UML: Capabilities, Usage of UML. Introduction to Rational Rose
- 1.8 Rational Rose CASE tool: Capabilities of Rational Rose Case Tool.

**Unit-2: Introduction to Object Oriented Software Development Process**

- 2.1 Introduction to OOSD processes. Development stage: Elaboration Stage, Construction Stage, Transition Stage.
- 2.2 Creating Use Case Diagrams: Actors and Use Cases, Use Case Relationships,
- 2.3 Types of Relationships,
- 2.4 Use Case Diagrams: Diagrams in Rational Rose
- 2.5 Activity Diagrams: Activities, Transitions, Decision Points, Swimlanes
- 2.6 State diagrams, State diagram behavior, Interaction Modeling:Activity models
- 2.7 Relationship of Object, Functional and Dynamic Models

**Unit-3: Modelling Classes**

- 3.1 Identifying Classes,
- 3.2 Packages and Drawing Class Diagram
- 3.3 State, Behaviour, Identity of Objects, Stereotypes and Classes,
- 3.4 Creating and Documenting Classes in Rational Rose, Packages, Drawing Class Diagram.
- 3.5 Specifying Relationships: Defining Relationships, Association and Aggregation Relationships,
- 3.6 Naming Relationships, Role Names, Multiplicity Indicators, Reflexive Relationships,
- 3.7 Package Relationships, Inheritance, Finding Relationships, Creating Relationships in Rational Rose.

## PART -B

### Unit-4: Modelling Object Interactions

- 4.1 Documenting Scenarios using Interaction Diagrams,
- 4.2 Types of Interaction Diagrams,
- 4.3 Adding Behaviour and Structure: Representing Behaviour and Structure,
- 4.4 Creating Attributes & Operations and documenting them, Displaying attributes and operations, 4.5 4.5 Association Classes,
- 4.6 Analysing Object Behaviour: Modelling Dynamic Behaviour, States.

### Unit-5: Model Refinement and iteration planning process

- 5.1 Revisiting the Model; Making the Model Homogeneous,
- 5.2 Combining Classes, Splitting Classes, Eliminating Classes,
- 5.3 Consistency Checking, Scenario Walk-through, Event Tracing, Documentation Review,
- 5.4 Designing the System Architecture : The need for Architecture, View of Architecture, Logical view, Component View, Process View, Deployment View, Use Case view.
- 5.5 Benefits, Goals, Design the User Interface,
- 5.6 Adding Design Classes, The Emergence of Patterns, Designing Relationships,

### Unit-6: The Iteration Planning Process

- 6.1 Benefits, Goals, Design the User Interface,
- 6.2 Adding Design Classes,
- 6.3 The Emergence of Patterns, Designing Relationships,
- 6.4 Designing Attributes and Operations, Designing for Inheritance,
- 6.5 Coding, Testing, and Documenting the Iteration.

(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-578A: SOFTWARE DEVELOPMENT PROCESSES LAB**

Periods/week	Credits	Max. Marks	: 100
P: 2	1.0	Continuous Evaluation	: 50
Duration of Examination: 2 Hrs		End Sem Examination	: 50

**Co-Requisite: Software Development Processes (BCS-DS-522A)**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-578A.1. Realize the Software development process and their applications
- BCS-DS-578A.2. Understand user interfaces with the use of rational rose
- BCS-DS-578A.3. Examine the various diagrams and their relationships
- BCS-DS-578A.4. Appraise real- time systems, object and class relationships
- BCS-DS-578A.5. Integrate the collaborate objects through implementation
- BCS-DS-578A.6. Plan various case studies with real- time scenarios

Teacher(s) is expected to provide at least four Case Studies to the students. The Students are expected to go through the Case Studies, provided to them, thoroughly in the practical class and prepare design documentation using Relational Rose tool. The following are two sample Case Studies.

**Case Study-I: University Course Registration System:**

At the beginning of each semester, students request a course catalog containing a list of course offerings for the semester. Information about each course, such as professor, Department, etc. will be included to help students make informed decisions. The system allows students to select four courses offering for the semester. In addition to this, each student will indicate two alternative choices in case a course sought offering becomes filled or cancelled. A course offering has to have not more than 10 or less than 3 students. After the registration process is complete, the system sends the information to the billing system so that the student can be billed for the course in the semester.

The professor should be able to access the system to indicate which courses they will be teaching and to see which students are signed up for the course.

A stipulated time period is allowed for the students to change their schedule. Students are allowed to access the system during this time to add/drop/change a course.

**Case Study-II: ATM Machine:**

The ATM machine for any bank has to be installed at the pre-determined location and loaded with the system software and case etc. The maintenance department is assigned to deal with the modalities regarding the timely maintenance of the machine, trouble shooting, error-correcting, etc. Also the department employs the same mechanism to load the machine with cash every day.

The account holder should be in possession of the ATM Card with correct PIN/Password to access the machine. The ATM machine should validate the entry of each customer using the machine; should check the available balance in the A/c and then only the cash withdrawal should be allowed within the specified range. The system also provides the facilities such as dropping a cheque, taking out balance-amount-slip and its charging should be made payable to the account holder

**List of Practical's:**

1. Design ATM System Using Structural & Behavioral UML Diagram.
2. Develop Object Model (say) for Processing Examination Data.
3. Design the OOM for Processing issue-function of a Library and develop Object Model and Functional Model. Write codes and test these models with given data.
4. Design use case diagram for Passport Automation System.
5. using the Case Study provided, perform the following practicals.
  - Identify and create the actors for Case Study - I.
  - Provided with the use case of Student Registration and Course Information maintenance. Identify and create 4 more such use cases from Case Study - I.

- Create the flow of events for any two use cases identified from Case Study- I.
12. Taking Case Study -I as reference, create extend & include relationship between any four use cases identified earlier.
  13. Create the main use case Diagram for the Case Study -I.
  14. Create the activity Diagram for any two use cases in Case Study -I.
  15. Identify and create the objects, classes & Packages for Case Study -II.
  16. Create a sequence diagram for any two three objects identified in Case Study -II.
  17. Identify and create the communicate association for any five entities in Case Study -II.
  18. . Develop OOM for Information System of an Organization. Create Object Model, Functional Model giving a few activities.
13. Develop OOM for various modules for ATM Banking System.
  14. Design class diagram for Book bank management system.
  15. Design sequence diagram for Hospital management System.
  16. Design University Result Management System Using Structural & Behavioral UML Diagram

Periods/week	Credits	Max. Marks	: 200
L: 3	T: 0	3.0	Continuous Evaluation : 100
Duration of Examination: 3 Hrs		End Sem Examination	: 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-523.1. Describe the concepts and need of Information system.
- BCS-DS-523.2. Classify the information and methods of information collection.
- BCS-DS-523.3. Apply the architecture of data models as per the different modules of information system.
- BCS-DS-523.4. Demonstrate the decision support system.
- BCS-DS-523.5. Evaluate the strategic policies for the organization.
- BCS-DS-523.6. Develop security policies and manage risk in Information system.

**PART –A**

**Unit-1: Introduction to Management Information System (MIS)**

- 1.1. Concept of Information system, Emergence of MIS, Basic Components of MIS,
- 1.2. Organizational-sectors using MIS: Service sector, Production sector, Business sector; their functional
- 1.3. models related to MIS;
- 1.4. Organizing Software support for MIS;
- 1.5. Need of Automated MIS, Organising Computer Setup and Computer Hardware & Software;
- 1.6. Role of DBMS, Data Warehouse and Data Mining in MIS.

**Unit-2: MIS System-Design**

- 2.1. Information Concepts,
- 2.2. Information as quality product; Classification of information; Methods of data and information collection, General model of information processing.
- 2.3. MIS Software and MIS Team. Design of MIS as a System. Design of Modules, Layouts and inputs/outputs, Customization of MIS software for the organization.

**Unit-3: Development of MIS**

- 3.1. Long range plan for MIS, Classification of Information requirements at various levels in the organization.
- 3.2. Architecture of MIS, Detail Design of MIS; System Controls, types of controls; incorporating Management views into the system.
- 3.3. Development, implementation and testing of MIS. Staff training and functional manuals, scheduling of activities, Reporting System and reporting specifications.

**PART –B**

**Unit-4: MIS as Decision Support System and Strategy Planning**

- 4.1. Role of MIS in Decision making;
- 4.2. Concept of decision support system (DSS): DSS as deterministic system,
- 4.3. DSS models and their working.
- 4.4. Strategic management of organization, Strategic planning and tools of planning, Transforming strategies into MIS activities.

**Unit-5: MIS for Service Sector and Business Environment**

- 5.1. Identification of work domain of service sector,
- 5.2. Objective of MIS in service sector creating MIS as distinctive service, various activities of service sector into MIS; Developing procedures, manuals and documents.
- 5.3. Overview of applications of MIS to Electronic Business System, Enterprise Business System and Supply Chain Management System.

## Unit-6: Security and Ethical Challenges

- 6.1. Security considerations; Security, ethical and societal challenges of IT;
- 6.2. Privacy issues; Security of Management of Information Systems.

**BCS-DS-524: Knowledge Based Systems**

Periods/week Credits  
L: 3 T: 0 3.0  
Duration of Examination: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-524.1. Discuss the typical approaches used in AI problem Solving.
- BCS-DS-524.2. Compare and contrast various Knowledge representation systems.
- BCS-DS-524.3. Understand and apply the mechanism of reasoning and inference in real life problems.
- BCS-DS-524.4. Apply the concepts of genetic algorithm and neural network in problem solving.
- BCS-DS-524.5. Discover various application areas and understand the concept.
- BCS-DS-524.6. Solve and address practical problems in multiple domains.

**PART- A**

**Unit-1: Introduction and Problem Solving**

- 1.1 Introduction to AI,
- 1.2 Introduction to Knowledge Based Systems
- 1.3 Problem definition, Formulation
- 1.4 Problem solving Agents
- 1.5 State Space search, Search based Problem solving
- 1.6 Knowledge based problem solving

**Unit-2: knowledge Representation and Reasoning**

- 2.1 Propositional and Predicate Logic
- 2.2 Production Rules
- 2.3 Semantic Net, Frames,
- 2.4 Fuzzy Logic, statistical techniques for determining probability methodologies for developing KBS
- 2.5 The KBS development life cycle, Knowledge acquisition/elicitation,
- 2.6 Management of KBS projects,

**Unit-3: Planning and Learning**

- 3.1 Planning and Understanding,
- 3.2 Reasoning, Analogical Reasoning,
- 3.3 case based Reasoning, common sense reasoning,
- 3.4 Learning, Learning-by-example, learning-by-doing,
- 3.5 Explanation based Learning,
- 3.6 Inference.

**PART –B**

**Unit-4: Neural Networks and Genetic algorithm**

- 4.1 Neural Networks, Architecture
- 4.2 Hopfield Network, Multi-layer perception,
- 4.3 Feed forward, Back propagation,
- 4.4 Genetic Algorithms: Concepts, population, chromosomes, operators,
- 4.5 Schemata, coding.

**Unit-5: Machine Learning**

- 5.1 Clustering,
- 5.2 Rough sets and Decision Tree,
- 5.3 Monte Carlo based Feature Selection
- 5.4 Statistical validity and significance of Models
- 5.5 Advanced Network Models.

**Unit-6: Applications**

- 6.1 Natural Language Processing,

- 6.2 Machine Vision and Robotics,
- 6.3 Data Mining and Intelligent Business Support
- 6.4 Internet based application

**BCS-DS-525: SYSTEM ANALYSIS AND DESIGN**

Periods/week	Credits	Max. Marks	: 200
L: 3	T: 0	3.0	Continuous Evaluation : 100
Duration of Examination: 3 Hrs		End Sem Examination	: 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-525.1. Relate characteristics of system and system development life cycle.
- BCS-DS-525.2. Describe the importance of system planning.
- BCS-DS-525.3. Perform object oriented analysis of system.
- BCS-DS-525.4. Examine modular, structured design and system performance.
- BCS-DS-525.5. Design system testing and its techniques.
- BCS-DS-525.6. Interpret system audit , security and various types of threats associated with the system.

**PART- A**

**Unit-1: Introduction**

- 1.1. Introduction to System definition and Characteristics of system
- 1.2. Elements of system
- 1.3. Types Of system
- 1.4. System Development Life Cycle
- 1.5. Basis For planning In system analysis
- 1.6. Role and need of systems analyst ,
- 1.7. System Planning and Initial Investigation

**Unit-2: System Planning**

- 2.1. Data and fact gathering techniques: Interviews, Group communication, Presentations, Site visits.
- 2.2. Feasibility study and its importance
- 2.3. Types of feasibility reports
- 2.4. System Selection plan and proposal Prototyping
- 2.5. Cost-Benefit and analysis: Tools and techniques

**Unit-3: Systems Design and modeling**

- 3.1. System Design Objective
- 3.2. Logical and physical design
- 3.3. Design methodologies
- 3.4. Data flow diagrams
- 3.5. Common diagramming conventions and guidelines using DFD and ERD diagrams.
- 3.6. Data Modeling and systems analysis
- 3.7. Classification of forms: Input/output forms design, User-interface design, Graphical interfaces.
- 3.8. Introduction to Object Oriented Analysis and design life cycle
- 3.9. Object modeling: Class Diagrams,
- 3.10. Dynamic modeling: state diagram, sequence diagramming.

**PART-B**

**Unit-4: Modular and structured design**

- 4.1. Module specifications,
- 4.2. Module coupling and cohesion,
- 4.3. Top-down and bottom-up design,
- 4.4. System Implementation and Maintenance,
- 4.5. Planning considerations,
- 4.6. Conversion methods, producers and controls,
- 4.7. System acceptance Criteria,
- 4.8. System evaluation and performance,
- 4.9. Testing and validation,
- 4.10. Systems qualify Control and assurance,

4.11. Maintenance activities and issues.

**Unit-5: System Testing**

- 5.1. Introduction and Objectives Of testing
- 5.2. Test Plan
- 5.3. Testing Techniques
- 5.4. Types of System Tests
- 5.5. Quality Assurance Goals in System Life Cycle

**Unit-6: System Audit and Security**

- 6.1. Computer system as an expensive resource
- 6.2. Data and Strong media Procedures and norms for utilization of computer equipment,
- 6.3. Audit of computer system usage,
- 6.4. Audit trails,
- 6.5. Types of threats to computer system and control measures
- 6.6. Disaster recovery
- 6.7. Contingency planning.

**BCS-DS-531: Data Warehouse**

Periods/week Credits  
L: 3 T: 0 3.0  
Duration of Examination: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Database Management Systems (BCS-DS-404)**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-531.1. Rephrase the concept of Data Warehouse, multidimensional data model, Data cubes .
- BCS-DS-531.2. Examine data cubes, data warehouse backend tools, utilities and data preprocessing.
- BCS-DS-531.3. Contrast the difference between DBMS and Data Warehouse
- BCS-DS-531.4. Analyze the schemas for Multidimensional Database like stars, snowflakes and fact constellation
- BCS-DS-531.5. Design three-tier Data Warehouse architecture and the types of OLAP Servers
- BCS-DS-531.6. Validate spatial databases, multimedia databases along with time series and sequence data.

**PART-A**

**UNIT 1: Introduction to Data Warehousing**

- 1.1 Key Characteristics of a Data Warehouse, Historical and Transactional data
- 1.2 OLTP Systems; Differences between OLTP Systems and Data Warehouse:
- 1.3 Characteristics of Data Warehouse; Functionality of Data Warehouse: Advantages and Applications of Data Warehouse; Advantages,
- 1.4 Applications: Top- Down and Bottom-Up Development Methodology: Tools for Data warehouse development: Data Warehouse Types.

**Unit 2: Planning and Requirements**

- 2.1 Introduction: Planning Data Warehouse and Key Issues: Planning and Project ,
- 2.2 Management in constructing Datawarehouse,
- 2.3 Data Warehouse Project; Data Warehouse development Life Cycle, Kimball Lifecycle Diagram,
- 2.4 Requirements Gathering Approaches: Team organization, Roles, and Responsibilities.

**Unit 3: Data Warehouse Architecture and OLAP**

- 3.1 Introductions, Components of Data warehouse Architecture;
- 3.2 Technical Architectures; Data warehouse architectures: Data warehouse architecture,
- 3.2 Tool selection: Federated Data Warehouse Architecture,
- 3.4 Distributed and Virtual Data Warehouses,
- 3.5 Types of OLAP Servers, Initializing class objects with constructors,
- 3.6 ROLAP versus MOLAP versus HOLAP
- 3.7 Distributed and Virtual Data Warehouses,
- 3.8 Data Warehouse Manager.

**PART-B**

**Unit 4: Dimensional Modeling**

- 4.1 Introduction: E-R Modeling,
- 4,2 Dimensional Modeling: E-R Modeling VS Dimensional Modeling:
- 4.3 Data Warehouse Schemas; Star Schema, Inside Dimensional Table, Inside Fact Table, Fact Less Fact Table,
- 4.4 Granularity, Star Schema Keys: Snowflake Schema: Fact Constellation Schema.

**Unit 5: Extract, Transform and Load**

- 5.1 Introduction: ETL Overview or Introduction to ETL: ETL requirements and steps,
- 5.2 Data Extraction; Extraction Methods, Logical Extraction Methods,

5.3 Physical Extraction Methods: Data Transformation; Basic Tasks in Transformation,  
 5.4 Major Data Transformation Types: Data loading; Data Loading Techniques: ETL Tools.

**Unit 6: Meta-Data Management in Data Warehouse**

6.1 Introductions to Metadata: Categorizing Meta data: Meta data management in practice,  
 6.2 Meta data requirements gathering, Meta data classification,  
 6.3 Meta data collection strategies: Meta Data Management in Oracle and SAS,  
 6.4 Tools for Meta data management.

**Text Books / Reference Books:**

**BCS-DS-507: UI/UX**

Periods/week	Credits	Max. Marks	: 100
P: 4	2.0	Continuous Evaluation	: 50
Duration of Examination: 2 Hrs		End Sem Examination	: 50

**Pre-Requisite: Basic knowledge of Graphics and Gaming**  
**Course Type: Program Core**

**Course Outcomes:** Students will be able to-

- BCS-DS-507.1: Discuss the appropriateness of potential user interface and experience design methods such as diary studies, storyboarding, experience design, etc.
- BCS-DS-507.2: Describe the issues and challenges to achieving a human-centered design process, especially with regard to user experience design
- BCS-DS-507.3: Develop an appreciation for the use of storytelling as a means of designing and evaluating user experience
- BCS-DS-507.4: Use, adapt and extend design standards, guidelines, and patterns focusing on user experience
- BCS-DS-507.5: Employ selected design methods at a basic level of competence: diary studies, mood boards, storyboarding, sketching, video scenarios, and experience prototyping
- BCS-DS-507.6: Create storyboards, video scenarios, and experience prototypes for a small system and plan and perform a real world deployment study of a user experience

**List of Experiments:**

- i. Understanding the fundamentals and principles of UI/UX design.
- ii. To study visual elements of user interface design
- iii. Web design: Strategy and Information architecture.
- iv. Knowledge of tools and process used in UI/UX design,
- v. Real-life design problems through visual design tools and introduction to 6D.

MRTIIRS

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)

**BCS-DS-533: J2EE Programming**

Periods/week Credits  
L: 3 T: 0 3.0  
Duration of Examination: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Term Examination : 100

**Pre-Requisites:** NIL

**Course Type:** Program Electives

**Course Outcomes:** The students will be able to-

- BCS-DS-533.1. Comprehend the importance of extension JDBC package in Enterprise Java applications.
- BCS-DS-533.2. Use the Java Persistence Architecture API for ORM activities (JPA).
- BCS-DS-533.3. Categorize the process of designing, implementing and deploying J2EE Applications.
- BCS-DS-533.4. Examine Web Service components using EJB in a Java EE application.

**PART-A**

**Unit-1: Database Connectivity Using JDBC**

- 1.1 JDBC Overview, Types of Drivers,
- 1.2 JDBC Configuration,
- 1.3 Connection Management,
- 1.4 Connection Statements, Result Sets, Rowsets, Metadata,
- 1.5 JNDI, Introduction to LDAP, Accessing LDAP information,

**Unit-2: Java Servlets**

- 2.1 Web Application Basics, Architecture and challenges of Web Application,
- 2.2 Introduction to Servlets, HTTP Servlet Basics,
- 2.3 Servlet Lifecycle, Making Session and cookies in servlet,
- 2.4 Developing and Deploying Servlets,
- 2.5 Exploring Deployment , Descriptor,
- 2.6 Servlet with JDBC, Servlet Methods,
- 2.7 Handling Request and Response (Handling HTTP Request and Response (GET/POST Request)),
- 2.8 Using Cookies, Session Tracking,

**Unit-3: Java Server Pages**

- 3.1 Advantage of JSP technology (Comparison with ASP/ Servlet),  
JSP Architecture, JSP Access Model,
- 3.2 JSP Syntax Basic (Directions, Declarations, Expression, Scriptlets, Comments),
- 3.3 JSP Implicit Object, Object Scope,
- 3.4 Synchronization Issue, Exception Handling,
- 3.5 Session Management ,Error Handling with JSP,
- 3.6 JSP and Beans,
- 3.7 JSP with JDBC,

**PART-B**

**Unit-4: RMI and XML**

- 4.1 RMI concept, RMI Architecture: Stubs and Skeletons,
- 4.2 RMI Packages, Designing and Implementing RMI application,
- 4.3 XML Introduction, XML Structure,
- 4.4 XML Document Type Definitions (DTD),
- 4.5 XML Schemas and Parsers,
- 4.6 Implementing XML application,

**Unit-5: Enterprise Java Beans**

Batch 2021-25 CSE

Page 201

- 5.1 Introduction to EJB Component Technology, EJB Architecture,
- 5.2 Session Beans and Entity Beans: Features of Session Beans,
- 5.3 Lifecycle of Stateful Session Beans,
- 5.4 Features of Entity Beans; Its Lifecycle,
- 5.5 Container-managed Transactions & Bean-managed Transactions,
- 5.6 Implementing a container-manged Entity Bean,

#### Unit-6:AJax

- 6.1 HTML,
- 6.2 JavaScript,
- 6.3 CSS,
- 6.4 XMLHttpRequest,
- 6.5 MSXMLDOM,
- 6.6 AJAX Examples.

**BCS-DS-583: J2EE PROGRAMMING LAB**

Periods/week	Credits	Max. Marks	: 100
P: 2	1.0	Continuous Evaluation	: 50
Duration of Examination: 2 Hrs		End Term Examination	: 50

**Co-Requisite:** J2EE Programming (BCS-DS-533)

**Course Type:** Program Electives

**Course Outcomes:** The students will be able to-

- BCS-DS-583.1 Comprehend the importance of extension JDBC package in Enterprise Java applications.
- BCS-DS-583.2 Use the Java Persistence Architecture API for ORM activities (JPA).
- BCS-DS-583.3 Categorize the process of designing, implementing and deploying J2EE applications
- BCS-DS-583.4 Examine Web Service components using EJB in a Java EE application

**List of Practicals:**

1. Write a JAVA program to insert data into STUDENT database and retrieve information based on particular queries.
2. Write a JAVA Servlet Program to implement a dynamic HTML using Servlet(username and password should be accepted using HTML and displayed using Servlet).
3. Write a JAVA Servlet Program to Download a file and display it on the screen(A link has to be provided in HTML, when the link is clicked corresponding file has to be displayed on Screen).
4. Write a JAVA Servlet Program to implement RequestDispatcher object (useinclude() and forward() methods).
5. Write a JAVA Servlet Program to implement and demonstrate get() and Postmethods(Using HTTP Servlet Class).
6. Write a JAVA Servlet Program to implement sendRedirect() method(usingHTTP Servlet Class).
7. Write a JAVA Servlet Program to implement sessions (Using HTTP SessionInterface).
8. a. Write a JAVA JSP Program to print 10 even and 10 odd number.b. Write a JAVA JSP Program to implement verification of a particular userlogin and display a welcome page.
9. Write a JAVA JSP Program to get student information through a HTML andcreate a JAVA Bean Class, populate Bean and display the same informationthrough another JSP.
10. Write a JAVA JSP Program which uses <jsp:plugin> tag to run a applet.
11. Write a JAVA JSP Program which implements nested tags and also usesTagSupport Class.
12. An EJB application that demonstrates Session Bean.
13. An EJB application that demonstrates Entity Bean.
14. An EJB application that demonstrates MDB.

**BCS-DS-534: Real Time System**

Periods/week Credits  
L: 3 T: 0 3.0  
Duration of Examination: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Term Examination : 100

**Pre-Requisite: Operating Systems (BCS-DS-403)**

**Course Type:** Program Elective

**Course Outcomes:** The students will be able to-

1. Understand the fundamentals of Real-time systems, concepts of computer control, operating system,
2. Classify the suitable computer hardware requirements for real-time applications.
3. Develop the software languages to meet Real-time applications.
4. Apply suitable methodologies to design and develop Real-Time Systems.

**PART- A**

**Unit-1: Introduction to Real-Time Systems:** Historical background, Elements of a Computer Control System, RTS- Definition, Classification of Real-time Systems, Time Constraints, Classification of Programs.  
**Concepts of Computer Control:** Introduction, Sequence Control, Loop Control, Supervisory Control, Centralized Computer Control, Hierarchical Systems.

**Unit-2: Computer Hardware Requirements for Real-Time Applications:** Introduction, General Purpose Computer, Single Chip Microcomputers and Microcontrollers, Specialized Processors, Process-Related Interfaces, Data Transfer Techniques, Communications, Standard Interface.

**Unit-3: Design of RTS**

General Introduction: Introduction, Specification Document, Preliminary Design, Single Program Approach, Foreground/Background System. RTS Development Methodologies: Introduction, Yourdon Methodology, Ward and Mellor Method, Hatley and Pirbhai Method.

**PART –B**

**Unit-4: Languages for Real-Time Applications:** Introduction, Syntax Layout and Readability, Declaration and Initialization of Variables and Constants, Modularity and Variables, Compilation of Modular Programs, Data types, Control Structures, Exception Handling, Low-level facilities, Co-routines, Interrupts and Device Handling, Concurrency, Real-Time Support, Overview of Real-Time Languages.

**Unit-5: Computer Hardware Requirements for Real-Time Applications:** Introduction, General Purpose Computer, Single Chip Microcomputers and Microcontrollers, Specialized Processors, Process-Related Interfaces, Data Transfer Techniques, Communications, Standard Interface.

**Unit-6: RTS Development Methodologies:** Introduction, Yourdon Methodology, Ward and Mellor Method, Hatley and Pirbhai Method.

**Text Books / Reference Books:**

1. Real-Time Systems: C.M. Krishna, Kang G. Shin, 1997, McGraw -Hill International Editions.
2. Real-Time Systems Design and Analysis: Phillip. A. Laplante, 2005, second edition, PHI,.
3. Embedded Systems: Raj Kamal, Tata McGraw Hill, third edition, 2005, India,.

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Term Examination : 100

**Pre-Requisite: Basic Knowledge of Database**  
**Course Type: Program Electives**

**Course Outcomes: The students will be able to**

**BCS-DS-535.1: Differentiate between a relational and a non-relational (NoSQL) database**

**BCS-DS-535.2: Implement CRUD operations (create, read, update and delete) on data in NoSQL environment**

**BCS-DS-535.3: Understand the basic storage architecture and distributed file systems**

**BCS-DS-535.4: Design applications using NoSQL databases**

**PART-A**

**UNIT 1: Introduction to NoSQL**

Introduction to NoSQL database, NoSQL database requirements, NoSQL vs traditional databases, Sorted Ordered Column-Oriented Stores, Key/Value Stores, Document and Graph Databases

**UNIT 2: Interacting with NoSQL**

Working With Language Bindings. Language Bindings for NoSQL Data Stores, Performing Crud Operations, Creating Records, Accessing Data, Updating and Deleting Data.

**UNIT 3: NoSQL Storage Architecture**

Working With Column-Oriented Databases, Hbase Distributed Storage Architecture, Document Store Internals, Understanding Key/Value Stores in Memcached and Redis, Consistency in Non-Relational Databases.

**PART-B**

**UNIT 4: NoSQL Stores**

Similarities Between Sql And MongoDB Query Features, Accessing Data From Column-Oriented Databases Like Hbase, Querying Redis Data Stores, Changing Document Databases, Schema Evolution in Column-Oriented Databases, Hbase Data Import and Export, Data Evolution in Key/Value Stores.

**UNIT 5: Indexing and Ordering Data Sets**

Essential Concepts Behind a Database Index, Indexing and Ordering in MongoDB, Creating and Using Indexes in MongoDB, Indexing And Ordering In Couchdb, Indexing In Apache Cassandra.

**UNIT 6: Transaction Management**

RDBMS and ACID, Distributed ACID Systems, Consistency Implementations in NoSQL Products

**Text Books:**

**BCS-DS-584: NoSQL Databases Lab**

Periods/week Credits  
P: 2 1.0  
Duration of Exam: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Term Examination : 50

**Co-Requisite:** NoSQL Databases (BCS-DS-535)

**Course Type:** Program Electives

**Course Outcomes: The students will be able to-**

BCS-DS-584.1: Setup NoSQL databases environment

BCS-DS-584.2: Implement CRUD operations (create, read, update and delete) on data in NoSQL environment

BCS-DS-584.3: Develop applications using nosql databases

**List of Experiments**

The experiments are divided into tools: MongoDB and Cassandra.

Lab 1. Installation and set up of MongoDB client and server

Lab 2. Create a database and collection using MongoDB environment. For example a document collection meant for analyzing Restaurant records can have fields like restaurant\_id, restaurant\_name, customer\_name, locality, date, cuisine, grade, comments. etc.

Create database using INSERT, UPDATE, UPSERTS, DELETE and INDEX.

Practice writing simple MongoDB queries such as displaying all the records, display selected records with conditions

Lab 3. Experiment with MongoDB comparison and logical query operators - \$gt, \$gte, \$lt, \$lte, \$in, #nin, \$ne, \$and, \$or, \$not

Lab 4. Practice exercise on element, array based and evaluation query operators -\$exists, \$type, \$mod, \$regex

Lab 5. Exercise on MongoDB shell commands and user management

Lab 6. Installation and configuration of Cassandra. Find out two use cases where Cassandra is preferred over MongoDB

Lab 7. Create database in Casandra using – Create, Alter and Drop. Add records using Inset, Update, Delete and Truncate.

Lab 8. Exercise based on Cassandra Query Language i.e. selecting records, select records with specific conditions

Lab 9 and 10. Mini-project

**Note:** At least 5 more exercises to be given by the teacher concerned.

**BCS-DS-585: Introduction to Enterprise Web Applications LAB**

Periods/week Credits  
L :0 T: 0 P :2 2.0  
Duration of Exam: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: HTML, Core Java**

**Course Outcomes:** The students will be able to-

- BCS-DS-585.1: identify the client tier technologies to create interactive web user interfaces.
- BCS-DS-585.2: express the enterprise business data in an application server and manage using JDBC APIs.
- BCS-DS-585.3: prepare the dynamic request and response using internet functionalities with Servlets and Java Server Pages.
- BCS-DS-585.4: model the business logic for the application services using Enterprise Java Bean technologies.
- BCS-DS-585.4: develop object relational model for accessing enterprise application business data using Java Persistence APIs.
- BCS-DS-585.6: relate the work flow and implementation of real time enterprise application.

**List of Practicals:**

1. Design a simple website using HTML, CSS, JavaScript.
2. Demonstrate database interaction using JDBC.
3. Create an enterprise application using Java Servlet.
4. Develop an enterprise application using Java Server Pages.
5. Implement Session Tracking using Java Servlet and Java Server Pages
6. Demonstrate business logic using Session Bean.
7. Implementation of object to relational using Java Persistence API
8. Develop an enterprise application using Message Driven Bean
9. Demonstrate a Mail Application using Java Mail API.
10. Simulate a simple web service application.

**Software required/Weblinks:**

JDK, Tomcat, Neatbeans/Eclipse

**Note:** At least 5 more exercises to be given by the teacher concerned.

(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**HM-506 : French-1**

Periods/week Credits  
L: 2 T: 0 2.0  
Duration of Examination: 1.5 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Pre-Requisite:** Basic knowledge of grammatical structure, syntax, and vocabulary of English and/or Hindi.

**Course Type:** Humanities and Social Sciences

**Course Outcomes:** Students will be able to-

- HM-506.1. Exchange greetings and do introductions using formal and informal expressions. They can understand and use interrogative and answer simple questions.
- HM-506.2. Learn Basic vocabulary that can be used to discuss everyday life and daily routines, using simple sentences and familiar vocabulary. Express their likes and dislikes. Also will have understanding of simple conversations about familiar topics (e.g., greeting, weather and daily activities,) with repetition when needed.
- HM-506.3. Identify key details in a short, highly-contextualized audio text dealing with a familiar topic, relying on repetition and extra linguistic support when needed. Describe themselves, other people, familiar places and objects in short discourse using simple sentences and basic vocabulary.
- HM-506.4. Describe themselves, other people, familiar places and objects in short discourse using simple sentences and basic vocabulary. Provide basic information about familiar situations and topics of interest.
- HM-506.5. Express or/and justify opinions using equivalents of different verbs. Differentiate certain patterns of behavior in the cultures of the French-speaking world and the student's native culture.
- HM-506.6. Describe various places, location, themselves using simple sentences and vocabulary.

**PART-A**

**Unit 1- Saluer et épeler l'alphabet**

- 1.1 Les Salutations & forms of politeness
- 1.2 Alphabets

**Unit 2- Usage de Vous et de Tu**

- 2.1 Taking leave expressions
- 2.2 Les pronoms sujets
- 2.3 Basic Questions

**Unit 3- Présentez-vous**

- 3.1 Les verbes ER
- 3.2 Self introduction
- 3.3 Décrivez votre ami(e)

**PART-B**

**Unit 4- Identifier un nombre, compter**

- 4.1 Les noms
- 4.2 Verbes Avoir, Etre, Aller & Faire
- 4.3 Les nombres

**Unit 5- Demander/ donner l'explications**

- 5.1 Les articles définie et indéfini
- 5.2 Les mois de l'année
- 5.3 Les jours de la semaine

## Unit 6- Parler des saisons et demander l'heure

6.1 Time

6.2 Weather

6.3 Unseen Passage

### Text Books/Reference Books/ Suggested Readings:

1. Alter Ego Level One Textbook: Annie Berthet, Catherine Hugot, Veronique M Kizirian, 2006, Hachette Publications.
2. Apprenons Le Francais II & III: Mahitha Ranjit, 2014, Saraswati Publications.

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**HM-507 : German-1**

Periods/week Credits  
L: 2 T: 0 2.0  
Duration of Examination: 1.5 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Pre-Requisite:** Basic knowledge of grammatical structure, syntax, and vocabulary of English and/or Hindi.

**Course Type:** Humanities and Social Sciences

**Course Outcomes:** Students will be able to-

- HM-507.1. Exchange greetings and introductions using formal and informal expressions. They will be able to ask and answer simple questions.
- HM-507.2. Discuss everyday life and daily routines, using simple sentences and familiar vocabulary.
- HM-507.3. Identify key details in short, highly-contextualized audio text dealing with a familiar topic, relying on repetition and extra linguistic support when needed.
- HM-507.4. Discuss likes and dislikes, understand simple conversations about familiar topics (e.g., greetings, weather and daily activities,) with repetition when needed
- HM-507.5. Differentiate certain patterns of behavior in the cultures of the German- speaking world and the student's native culture.
- HM-507.6. Describe various places, location, themselves using simple sentences and vocabulary.

**PART-A**

**Unit-1: Begrüßungen**

- 1.1 Salutations/Greetings
- 1.2 Introduction

**Unit-2: sich vorstellen und Zahlen**

- 2.1 Introduction
- 2.2 Alphabets
- 2.3 Numbers 1-20

**Unit-3: Berufe/ Pronomen**

- 3.1 Personal pronouns
- 3.2 Hobbies and professions

**PART-B**

**Unit-4: Café**

- 4.1 Café related vocabulary and dialogues
- 4.2 Revision personal pronouns

**Unit-5: Café dialog**

- 5.1 Café related vocabulary and dialogues
- 5.2 Common verbs and their conjugations

**Unit-6: Zeit und Monate**

- 6.1 Time
- 6.2 Days
- 6.3 Months

**Text Books/Reference Books:**

1. Studio D A1: Hermann Funk, 2011, Cornelson Publication.
2. Tangaram Aktuell A1: Kursbuch & Arbeitsbuch, 2011, Hueber.
3. Netzwerk: Stefanie Dengler, Paul Rusch, 2011, Klett.

**HM-508 : Spanish-1**

Periods/week Credits  
L: 2 T: 0 2.0  
Duration of Examination: 1.5 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Pre-Requisite:** Basic knowledge of grammatical structure, syntax, and vocabulary of English and/or Hindi.

**Course Type:** Humanities and Social Sciences

**Course Outcomes:** Students will be able to-

- HM-508.1. Exchange greetings and introductions using formal and informal expressions and students will be able to ask and answer simple questions.
- HM-508.2. Discuss everyday life and daily routines, using simple sentences and familiar vocabulary and students will be able to discuss likes and dislikes understand simple conversations about familiar topics.
- HM-508.3. Identify key details in a short, highly-contextualized audio text dealing with a familiar topic, relying on repetition and extra linguistic support when needed and students will be able to offer basic descriptions of self, other people, familiar places and objects in short discourse using simple sentences and basic vocabulary.
- HM-508.4. Provide basic information about familiar situations and topics of interest and students will be able to express or/and justify opinions using equivalents of different verbs.
- HM-508.5. Differentiate certain patterns of behavior in the cultures of the Spanish-speaking world and student's native culture.
- HM-508.6. Describe various places, location, themselves using simple sentences and vocabulary.

**PART-A**

**Unit 1: Introduction to Spanish and SER**

- 1.1 Presentation on Spanish language
- 1.2 Greetings and goodbyes
- 1.3 Spanish letters
- 1.4 Introduction of Verbo SER

**Unit 2: Verb Ser, Nationality, Profession and Counting**

- 2.1 Uses of Verbo SER
- 2.2 Adjectives related to Verbo SER.
- 2.3 Introduction of Nationality
- 2.4 Professions and vocabulary related to professions.
- 2.5 Counting till number 20.

**PART-B**

**Unit 3: Articles, Interrogative and Estar**

- 3.1 Introduction of Articles and Indefinite articles
- 3.2 Interrogatives
- 3.3 Introduction of Verbo Estar

**Unit 4: Estar, Preposition, Tener and Self Introduction**

- 4.1 Uses of Verbo ESTAR and adjectives related to it
- 4.2 Prepositions related to the positioning of an object
- 4.3 Tener & its uses
- 4.4 Self – introduction

**Unit 5 : Day, Month and Regular AR verb**

- 5.1 Days
- 5.2 Months
- 5.3 Introduction to regular –AR verbs

**Text Books/Reference Books:**

# **SEMESTER – VI**

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**PROJ-CS-600: Project-I**

Periods/week Credits  
P: 2 1.0  
Duration of Examination: 2 Hrs

Max. Marks : 50  
Continuous Evaluation : 50

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Projects**

**Course Outcomes:** Students will be able to-

- PROJ-CS-600.1. Conceptualize real world situations related to systems development decisions, Originating from source requirements and goals.
- PROJ-CS-600.2. Identify various computing tools.
- PROJ-CS-600.3. Identify their area of interest and do extensive literature survey on the same.
- PROJ-CS-600.4. Design models as a solution for particular problems.
- PROJ-CS-600.5. Implement basic solutions in various platforms
- PROJ-CS-600.6. Prepare a summarized report in the form of synopsis.

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BHM-MC-009: Quantitative Aptitude and Personality Development-III**

Periods/week	Credits	Max. Marks	: 100
P :2	0	Continuous Evaluation	: 50
Duration of Exam: 2 Hrs		End Sem Examination	: 50

**Pre-Requisite: Basic Knowledge of maths and reasoning**

**Course Type: HSMC**

**Course Outcomes:** Students will be able to-

- BHM-MC-009.1. Recognize problem based on Modern Mathematics and Algebra
- BHM-MC-009.2. Solve basic to moderate level problems based on Mensuration and Geometry.
- BHM-MC-009.3. Calculate solution to logical reasoning.
- BHM-MC-009.4. Get proficient with resume building and will be able to draft effective cover letters.
- BHM-MC-009.5. Participate effectively and confidently in a Group Discussion
- BHM-MC-009.6. Manage interviews effectively.

**PART – A**

**Unit 1: Modern Mathematics and Algebra**

**1.1 Permutation and Combination**

- 1.1.1 Principal of counting and Basic formulas
- 1.1.2 Arrangements, Selection and Selection + Arrangement.
- 1.1.3 Linear/Circular arrangements, Digits and Alphabetic Problems and Applications.

**1.2 Probability**

- 1.2.1 Events and Sample Space, Basic Formulas.
- 1.2.2 Problems on Coins, Cards and Dices.
- 1.2.3 Conditional Probability, Bayes' Theorem and their Applications.

**1.3 Algebra**

- 1.3.1 Linear & Quadratic equations
- 1.3.2 Mathematical inequalities
- 1.3.4 Maximum & Minimum Values
- 1.3.3 Integral Solutions

**Unit 2: Geometry and Mensuration**

**2.1 Geometry**

- 2.1.1 Basic geometry & Theorems, Lines & Angles
- 2.1.2 Polygons, Triangle and Quadrilaterals
- 2.1.3 Circles

**2.2 Mensuration I- Areas**

- 2.2.1 Different types of Triangles and their area and perimeter.
- 2.2.2 Different types of Quadrilateral and their area and perimeter.
- 2.2.3 Circumference and Area of Circle, Area of Sector and length of Sector.
- 2.2.4 Mixed Figures and their Applications.

**2.3 Mensuration II- Surface Areas and Volumes**

- 2.3.1 Problems on Cubes & Cuboids, Cone, Cylinder and Sphere.
- 2.3.2 Prism and Pyramid.
- 2.3.3 Mixed Figures and their Applications.

**Unit 3: Logical Reasoning**

- 3.1 Linear Arrangement
- 3.2 Circular Arrangement
- 3.3 Puzzles

**Part - B**

**Unit 4: Professional Writing**

- 4.1. Profiling on Social Sites: LinkedIn, Facebook, Instagram

- 4.2. Cover Letter/Emails
- 4.3. Resume Writing

**Unit 5: Group Discussions**

- 5.1. Do's and Dont's of a Group Discussion
- 5.2. Roles played in a Group Discussion
- 5.3. Tips for Cracking a Group Discussion

**Unit 6: Managing Interviews**

- 6.1. Developing the employability mindset
- 6.2. Preparing for Self -Introduction
- 6.3. Researching the employer
- 6.4. Portfolio Management
- 6.5. Answering Questions in an Interview

**Text Books/Reference Books:**

- 1. Arun Sharma, 2017 Teach Your Self Quantitative Aptitude, 1<sup>st</sup> Edition, McGraw Hills Education.
- 2. R S Aggarwal,2017, A Modern Approach to Logical Reasoning, S Chand & Company Pvt Ltd.
- 3. Yana Parker & Beth Brown, The Damn Good resume Guide
- 4. Ceri Roderick & Stephan Lucks, Interview Answers

**Instructions for paper setting:** Fifty MCQ will be set in total. Twenty five MCQ will be set from Part A and twenty five MCQ will be set from Part B. All questions will be compulsory. Each question will be of 1 mark. There will be no negative marking. Calculator will not be allowed.

**Distribution of Continuous Evaluation:**

Sessional- I	30%
Sessional- II	30%
Assignment/Tutorial	20%
Class Work/ Performance	10%
Attendance	10%

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-602: Machine Learning**

Periods/week Credits  
L: 3 T: 1 4.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Nil**

**Course Type: Program Elective**

**Course Outcomes:** Students will be able to-

- BCS-DS-602.1. Outline the techniques, mathematical concepts, and algorithms used in machine learning.
- BCS-DS-602.2. Describe the basic concepts of statistics, artificial intelligence, information theory and probability theory relevant to machine learning.
- BCS-DS-602.3. Understand Supervised learning techniques for regression and classification in machine learning
- BCS-DS-602.4. Apply the appropriate machine learning technique using unsupervised techniques for pattern recognition, optimization and decision problems
- BCS-DS-602.5. Design the algorithms and techniques to solve problems using Artificial Neural Networks.
- BCS-DS-602.6. Analyze the complexities of various problems in different domains.

**PART- A**

**Unit-1: Introduction Basic Concepts**

- 1.1 Probability Theory
- 1.2 Probability densities
- 1.3 Types of Variables: Quantitative & Qualitative
- 1.4 Measures of Central Tendency
- 1.5 Measures of Spread: Range, Variance, Standard deviation
- 1.6 Population parameters and Sample Statistics
- 1.7 Bayesian probabilities and Bayes Theorem
- 1.8 Gaussian distribution

**Unit-2: Machine Learning**

- 2.1 Introduction to Machine Learning Concepts
- 2.2 Types of Machine Learning Algorithms
- 2.3 Dimensionality Reduction Techniques: (PCA -Principal components analysis)
- 2.4 Feature Extraction
- 2.5 Feature Selection

**Unit-3: Supervised Learning**

- 3.1 Introduction to supervised learning setup
- 3.2 Regression and Classification
- 3.3 Linear Regression
- 3.4 Logistic Regression
- 3.5 Naive Bayes Classifier Algorithm
- 3.6 Support vector machines
- 3.7 Ensemble methods: Bagging, Boosting
- 3.8 Evaluating and debugging learning algorithms

**PART- B**

**Unit-4: Unsupervised Learning**

- 4.1 Introduction to Unsupervised learning
- 4.2 Clustering techniques
- 4.3 Common distance measures
- 4.4K-means algorithm
- 4.5Hierarchical agglomeration
- 4.6 Cross Validation and Resampling Methods

#### 4.7 Assessing the performance of an algorithm

### Unit 5: Artificial Neural Network

- 5.1 Introduction to Neural Networks
- 5.2 Neural Network representation
- 5.3 Gradient Descent
- 5.4 Perceptron, Multilayer perceptron
- 5.5 Backpropagation algorithm
- 5.6 Feed-forward Network Networks
- 5.7 Network Training – Parameter optimization

### Unit 6: Deep Learning

- 6.1 Inductive Learning
- 6.2 Graph-Based Learning
- 6.3 SVM (Support Vector Machine) and Kernel Methods
- 6.4 Generative Methods
- 6.5 Human Cognitive Learning

(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-652: Machine Learning Lab**

Periods/week	Credits	Max. Marks	: 100
P: 2	1.0	Continuous Evaluation	: 50
Duration of Examination: 2 Hrs		End Sem Examination	: 50

**Co-Requisite:** Machine Learning (BCS-DS-602)

**Course Type: Program Elective**

**Course Outcomes:** Students will be able to-

- BCS-DS-652.1. Understand the implementation procedures for the machine learning algorithms.
- BCS-DS-652.2. Design Java/Python programs for various Learning algorithms.
- BCS-DS-652.3. Apply appropriate data sets to the Machine Learning algorithms.
- BCS-DS-652.4. Identify Machine Learning algorithms to solve real world problems.
- BCS-DS-652.5. Formulate clustering algorithm for solving the problem.
- BCS-DS-652.6. Implement the pre-processing operations on given dataset.

**List of Practicals:**

1. Write a program to import the datasets of Real-time/Offline applications.
2. Perform various operations on the dataset using Numpy module for numerical computation.
3. Perform dataset handling operations using Pandas.
4. Implement different preprocessing operations on the given dataset.
5. Write a program to demonstrate the working of Linear Regression. Use an appropriate dataset and evaluate the results.
6. Write a program to demonstrate the working of Logistic Regression. Use an appropriate dataset and evaluate the results.
7. Write a program to implement the naïve Bayesian classifier for a sample training data set stored as a .CSV file. Compute the accuracy of the classifier, considering few test data sets.
8. Write a program to demonstrate the working of the decision tree based ID3 algorithm. Use an appropriate data set for building the decision tree and apply this knowledge to classify a new sample.
9. Write a program to implement k-Nearest Neighbor algorithm to classify the iris data set. Print both correct and wrong predictions. Java/Python ML library classes can be used for this problem.
10. Write a program to Implement K-means clustering. Use appropriate dataset and evaluate the algorithm.

**BCS-DS-603: Internet of Things (IOT)**

Periods/week Credits  
L: 3 T: 1 4.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Elective**

**Course Outcomes:** Student will be able to-

- BCS-DS-603.1. Describe concepts and technologies of IoT communication.
- BCS-DS-603.2. Map out the processes for IoT solutions and data management in IoT.
- BCS-DS-603.3. Identify different infrastructure components including sensors, embedded hardware, gateways and network systems for IoT applications.
- BCS-DS-603.4. Differentiate between the levels of the IoT stack and be familiar with the key technologies and protocols employed at each layer of the stack.
- BCS-DS-603.5. Illustrate security requirements and privacy risks in IoT communication.
- BCS-DS-603.6. Apply the knowledge and skills acquired during the course to build and test a complete, working IoT system involving prototyping, programming and data analysis.

**PART- A**

**Unit-1: Introduction to IoT**

- 1.1 Introduction to IoT Communications
- 1.2 IoT categories: Industrial and Consumer
- 1.3 IoT components and implementation: Functional blocks
- 1.4 Layered architecture of IoT
- 1.5 Machine to Machine Communication, IoT vs M2M
- 1.6 IoT Enabling Technologies

**Unit-2: IoT Communication**

- 2.1 IoT Network Configurations: Node, PAN, LAN, WAN, Gateway, Proxy
- 2.2 IoT Communication: IoT Protocol Stack
- 2.3 IoT Communication Models
- 2.4 Connectivity technologies: IEEE802.15.4, ZigBee, 6LOWPAN, Bluetooth, Z-wave, RFID
- 2.5 MQTT, CoAP, XMPP, AMQP

**Unit-3: IoT Systems and Networks**

- 3.1 Study of RF Wireless Sensors
- 3.2 Wireless Sensor Networks
- 3.3 Components of a sensor node
- 3.4 Challenges in Wireless sensor networks, Node Cooperation
- 3.5 WSN Coverage
- 3.6 Network Devices

**PART-B**

**Unit-4: Elements of IoT Application Development**

- 4.1 Component based IoT Reference Model
- 4.2 Hardware Components- Computing (Arduino, Raspberry Pi), Sensing, Actuation.
- 4.3 Software Components- Programming API's (using Python/Arduino) for Communication
- 4.4 IoT Platforms: Capabilities and Examples
- 4.5 Device Data Storage on Cloud: Sensor Cloud Architecture and Applications
- 4.6 Fog Computing: Requirement and Architecture

**Unit-5: IoT Security Frameworks**

Batch 2021-25 CSE

- 5.1 Challenges in IoT Implementation
- 5.2 IoT Security Threats
- 5.3 Security Requirements of IoT Communications
- 5.4 Principles of Secure IoT Communication
- 5.5 IoT Security Framework

**Unit-6: IoT Applications/ Case Studies**

- 6.1 Home Automation
- 6.2 Asset Management
- 6.3 Tagging and Tracking for Healthcare applications
- 6.4 Connected Vehicles
- 6.5 Smart Irrigation
- 6.6 Smart Cities

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-653: Internet Of Things (IOT) lab**

Periods/week	Credits	Max. Marks	: 100
P: 2	1.0	Continuous Evaluation	: 50
Duration of Examination: 2 Hrs		End Sem Examination	: 50

**Co-Requisite:** Internet Of Things (IOT) (BCS-DS-603)

**Course Type: Program Elective**

**Course Outcomes:** Students will be able to-

- BCS-DS-653.1. Identify different infrastructure components including sensors, embedded hardware, gateways and network systems for specified IoT application.
- BCS-DS-653.2. Set up an embedded/microcomputer system and enable to write IoT application on it.
- BCS-DS-653.3. Integrate microcontroller/microcomputer system with sensors to acquire data in real time.
- BCS-DS-653.4. Establish a secure and consistent communication from microcontroller/microcomputer system to the cloud.
- BCS-DS-653.5. Design an application to create communication with multiple sensors to store data locally and make it available on the Internet for subsequent comparison with cloud data.
- BCS-DS-653.6. Apply the knowledge and skills acquired during the course to design IoT based solutions for real world problems.

**List of Experiments**

1. Familiarization with Arduino board and perform necessary software installation.
2. To interface LED with Arduino and write a program to blink LED at defined delay.
3. To interface Push button/Digital sensor (IR/LDR) with Arduino and write a program to turn ON LED when push button is pressed or at sensor detection.
4. Working with A/D conversion and sensor integration.
5. To interface Bluetooth with Arduino/Raspberry Pi and write a program to turn LED ON/OFF when 'A'/'B' is received from smartphone using Bluetooth.
6. Creating own Android App using MIT App Inventor, controlling Arduino connected devices and sending data to ThingSpeak cloud.
7. Introduction to Raspberry-Pi: Setup and Procedure.
8. Controlling GPIO Pins of Raspberry-Pi to blink interfaced LED.
9. Sending sensor data to ThingSpeak cloud via R-Pi.
10. To interface DHT11 sensor with Arduino/Raspberry Pi and write a program to upload temperature and humidity readings to ThingSpeak cloud.
11. Write a program on Arduino/Raspberry Pi to publish temperature data to MQTT broker.
12. Write a program on Arduino/Raspberry Pi to subscribe to MQTT broker for temperature data and print it.
13. Study of other equivalent SBC boards for IoT applications.

**BCS-DS-621: Software Testing And Quality Assurance**

Periods/week	Credits	Max. Marks	: 200
L: 3	T: 0	3.0	Continuous Evaluation : 100
Duration of Examination: 3 Hrs		End Sem Examination	: 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Student will be able to-

- BCS-DS-621.1. List various software testing problems.
- BCS-DS-621.2. Apply various test strategies, plans, design test cases, prioritize.
- BCS-DS-621.3. Estimate incidents and risks within a project.
- BCS-DS-621.4. Test efficient delivery of software solutions and implement improvements in the SDP.
- BCS-DS-621.5. Judge alternative standards, models and techniques aimed at achieving quality assurance in a variety of software development environments.
- BCS-DS-621.6. Plan research, consolidate and present large amounts of information related to appropriate quality assurance techniques.

**PART- A**

**Unit-1: Introduction to Software Testing**

- 1.1. Introduction, Basics of Software Testing, Testing Principles and Goals,
- 1.2. Testing Life Cycle, Phases of Testing, Limitations of Testing,
- 1.3. Concepts of failure, fault, bug, defect, error, incident, Defect Life Cycle, Defect Report,
- 1.4. Test Plan, Importance of Testing in software production cycle, testing principles,
- 1.5. Verification, validation, unit testing, integration testing system, system testing, regression
- 1.6. testing, alpha, beta and acceptance testing , functional testing, performance testing,
- 1.7. recovery testing,

**Unit-2: Black Box Approach**

- 2.1. Introduction, Need of black box testing, Black box testing Concept,
- 2.2. Requirement Analysis, Test case design criteria, Testing Methods, requirement based testing,
- 2.3. Positive & negative testing, Boundary value analysis,
- 2.4. Equivalence Partitioning class, state based or graph based, cause effect graph based,
- 2.5. Error guessing, documentation testing & domain testing, design of test cases, Case studies of
- 2.6. Black-Box testing,

**Unit-3: White Box Approach**

- 3.1. Introduction, Need of white box testing, Testing types, Test adequacy criteria,
- 3.2. Static testing by humans, Structure, logic coverage criteria, Basis path testing,
- 3.3. Graph metrics, Loop Testing, Data flow testing, Mutation Testing,
- 3.4. Design of test cases, Testing of Object oriented systems,
- 3.5. Challenges in White box testing, Case-study of White-Box testing,

**PART-B**

**Unit-4: Test Management and Test Metrics**

- 4.1. Test organization, Structure of testing, Measurement tools,
- 4.2. Testing metrics: Type of metrics, Project, Progress, Productivity, Metric plan, Goal Question metric model, Measurement in small and large systems,
- 4.3. Other Software Testing: GUI testing, Validation testing, Regression testing,
- 4.4. Scenario testing, Specification based testing, Ad hoc testing, Sanity testing,
- 4.5. Smoke testing, Random Testing, Advances in Software Testing Methods, object oriented Testing,

**Unit-5: Quality Concepts & Software Quality Assurance**

- 5.1. Quality concepts: Quality, Quality control, Quality Assurance, cost of quality,

- 5.2. Methods of Quality Management, Quality factors, Quality metrics,
- 5.3. Software quality assurance, SQA activities, software reviews, inspections, audits, Software Reliability,
- 5.4. Quality Attributes: Correctness, Reliability, Usability, Integrity, Portability, Maintainability, Interoperability,
- 5.5. Software Quality assurance framework, software quality assurance plan,

### Unit-6: Quality Standards

- 6.1. Quality standards, ISO 9000 and others ISO standards,
- 6.2. CMM, CMMI, PCCM,
- 6.3. 3-Sigma, 6-Sigma,
- 6.4. TQM, SQA Model.

**BCS-DS-622A: Advance Data Base Management Systems**

Periods/week	Credits	Max. Marks	: 200	
L: 3	T: 0	3.0	Continuous Evaluation	: 100
Duration of Examination: 3 Hrs			End Sem Examination	: 100

**Pre-Requisite: Database Management Systems (BCS-DS-404)**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-622A.1. Demonstrate the basic elements of a relational database management and no-sql databases.
- BCS-DS-622A.2. Identify the data models for relevant problems.
- BCS-DS-622A.3. Design entity relationship and convert entity relationship diagrams into RDBMS and formulate SQL queries on the respect data into RDBMS and formulate SQL queries on the data.
- BCS-DS-622A.4. Demonstrate their understanding of key notions of query evaluation and optimization techniques for various databases.
- BCS-DS-622A.5. Extend normalization for the development of application software's with relational database management and no-sql databases.

**PART-A**

**Unit-1: Database Design and Implementation: Relational Database Design**

- 1.1 Features of good database design
- 1.2 Enhanced ER tools
- 1.3 Subclasses, Super class, and Inheritance
- 1.4 Specialization and Generalization
- 1.5 Constraints and Characteristics of Specialization and Generalization
- 1.6 Converting EER diagram to tables
- 1.7 Functional dependency theory and normalization
- 1.8 Multi value dependency and 4NF
- 1.9 Join Dependency and 5NF
- 1.10 Inclusion Dependencies and Template Dependency
- 1.11 PJNF/DKNF
- 1.12 Modeling temporal data

**Unit-2: Advanced SQL**

- 2.1 Assertion and views
- 2.2 Cursors, triggers and stored procedures
- 2.3 Embedded SQL, dynamic SQL, SQLJ,
- 2.4 Advanced Features of SQL
- 2.5 Examples of above in Oracle

**Unit-3: DBMS Advanced Features and Distributed Database: Query Processing and Evaluation**

- 3.1 Measures of Query Cost
- 3.2 Selection Operation,
- 3.3 Sorting
- 3.4 Join Operation&other Operations
- 3.5 Evaluation of Expression
- 3.6 Transformation of Relational Expressions
- 3.7 Role of Relational Algebra and Relational Calculus in query optimization
- 3.8 Estimating Statistics of Expression
- 3.9 Choice of Evaluation Plans

- 3.10 Views and query processing
- 3.11 Storage and query optimization

**PART-B**

**Unit 4: PostgreSQL**

- 4.1 Important features and brief architecture
- 4.2 User Interfaces
- 4.3 SQL Variations and Extensions
- 4.4 Transaction Management
- 4.5 Storage and Indexing
- 4.6 Query Processing and evaluation and optimization

**Unit 5: Object Oriented Database**

- 5.1 Limitations of Relational databases
- 5.2 The need of Object oriented databases
- 5.3 Complex Data Types
- 5.4 Structured Types and Inheritance in SQL
- 5.5 Table Inheritance
- 5.6 Data types (arrays, multi-set etc) and structure in Object oriented databases using SQL
- 5.7 Object-Identity and Reference Types in SQL
- 5.8 ODL and OQL
- 5.9 Implementing O-R Features
- 5.10 Persistent Programming Languages
- 5.11 Object-Oriented versus Object-Relational
- 5.12 An Example of Object oriented and object relational database implementation

**Unit-6: MongoDB**

- 6.1 Document-oriented NoSQL database
- 6.2 MongoDB Architecture
- 6.3 CRUD, Schema Design
- 6.4 Data Modelling
- 6.5 Indexing using real-life case studies.

Periods/week	Credits	Max. Marks	: 100
P: 2	1.0	Continuous Evaluation	: 50
Duration of Examination: 2 Hrs		End Sem Examination	: 50

**Co-Requisite: Database Management Systems Lab (BCS-DS-452)**

**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-671A.1. Apply the basic concepts of Database Systems and Applications.
- BCS-DS-671A.2. Use the basics of SQL and construct queries using SQL in database creation and interaction.
- BCS-DS-671A.3. Design a commercial relational database system (Oracle, MySQL) by writing SQL using the system.
- BCS-DS-671A.4. Analyze and Select storage and recovery techniques of database system.
- BCS-DS-671A.5. Design a no sql database system.

**List of Practicals:**

- 1) Design a Database and create required tables. For e.g. Bank, College Database
- 2) Apply the constraints like Primary Key, Foreign key, NOT NULL to the tables.
- 3) Write a sql statement for implementing ALTER,UPDATE and DELETE
- 4) Write the queries to implement the joins
- 5) Write the query for implementing the following functions: MAX(),MIN(),AVG(),COUNT()
- 6) Write the query to implement the concept of Intergrity constrains
- 7) Write the query to create the views
- 8) Perform the queries for triggers
- 9) Perform the following operation for demonstrating the insertion,updatation and deletion using the referential integrity constraints
- 10) Write the query for creating the users and their role.
- 11) Design and Develop MongoDB Queries using CRUD operations. (Use CRUD operations, SAVE method, logical operators)
- 12) Implement aggregation and indexing with suitable example using MongoDB.

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-624: Compiler Design**

Periods/week Credits  
L: 3 T: 0 3.0  
Duration of Examination: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-624.1. Describe the different phases of the compilation process
- BCS-DS-624.2. Apply the formal attributed grammars for specifying the syntax and semantics of programming languages.
- BCS-DS-624.3. Design scanner and parser using LEX tool & YACC tool.
- BCS-DS-624.4. Identify different language translators.
- BCS-DS-624.5. Interpret new code optimization techniques to improve the performance of a program in terms of speed & space.
- BCS-DS-624.6. Employ the knowledge of patterns, tokens & regular expressions for solving a problem in the field of data mining.

**PART- A**

**Unit-1: Concept of Programming language**

- 1.1 Syntactic and semantic rules of a Programming language, Characteristics of a good programming language,
- 1.2 Specification & implementation of elementary data types,
- 1.3 Declarations, type checking & type conversions.
- 1.4 Implicit & explicit sequence controls
- 1.5 sequence control within expressions,
- 1.6 sequence control within statement,
- 1.7 Subprogram sequence control: simple call return,
- 1.8 recursive subprograms,
- 1.9 Names & referencing environment, static & dynamic scope,
- 1.10 Local data & local referencing environment,
- 1.11 Shared data: dynamic & static scope.
- 1.12 Parameter & parameter transmission schemes.

**Unit-2: Lexical Analysis**

- 2.1 structure of compiler and its different phases,
- 2.2 Compiler construction tools, Role of lexical analyzer
- 2.3 design and Implementation of lexical analyzer,
- 2.4 Regular expressions, Specification and recognition of tokens.
- 2.5 A language specifying lexical analyzer: LEX, Finite automata,
- 2.6 conversion from regular expression to finite automata, and vice versa,
- 2.7 minimizing number of states of DFA, input buffering,

**Unit-3: Syntax Analysis**

- 3.1. Context free grammars,
- 3.2. Role of parsers, definition of parsing,
- 3.3. Types of parsing. Parsing Technique: Top down parsing,
- 3.4. Predictive parsing
- 3.5. Operator precedence parsing,
- 3.6. Top down parsers, LR parsers, SLR
- 3.7. LALR and Canonical LR parser

**PART- B**

**Unit-4: Syntax Directed Translations**

- 4.1 Syntax directed definition, construction of syntax trees,
- 4.2 syntax directed translation scheme,

- 4.3 implementation of syntax directed translation.
- 4.4 three address code: quadruples, triples and indirect triples,

**Unit-5: Symbol Table & Error Detection and Recovery**

- 5.1 Symbol tables and its contents.
- 5.2 Data structures for symbol tables; trees, arrays,
- 5.3 linked lists, hash tables.
- 5.4 Errors, lexical phase error.
- 5.5 syntactic phase error, semantic error,
- 5.6 error recovery techniques,

**Unit-6: Code Optimization & Code Generation**

- 6.1 Code generation, forms of object code,
- 6.2 machine dependent code, optimization of intermediate codes,
- 6.3 register allocation for temporary and user defined variables,
- 6.4 code optimization.

**BCS-DS-673: Compiler Design Lab**

Periods/week Credits  
P: 2 1.0  
Duration of Examination: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Co-Requisite: Compiler Design (BCS-DS-624)**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-673.1. Recognize and effectively explain the working of Lexical Analyzer.
- BCS-DS-673.2. Understand the parsing techniques and their importance.
- BCS-DS-673.3. Develop program to solve complex problems in compiler.
- BCS-DS-673.4. Apply various data structures for storage allocation.
- BCS-DS-673.5. Learn the new code optimization techniques and apply it to improve the performance of a program in terms of speed & space.
- BCS-DS-673.6. Use new tools and technologies used for designing a compiler.

**List of Practicals:**

1. Design a lexical analyzer for given language and the lexical analyzer should ignore redundant spaces, tabs and new lines. It should also ignore comments. Although the syntax specification states that identifiers can be arbitrarily long, you may restrict the length to some reasonable value. Simulate the same in C language.
2. Write a C program to identify whether a given line is a comment or not.
3. Write a C program to recognize strings under 'a', 'a\*b+', 'abb'.
4. Write a C program to test whether a given identifier is valid or not.
5. Write a C program to simulate lexical analyzer for validating operators.
6. Write a C program for construction of LL(1) parsing.
7. Write a C program to implement LALR parsing.
8. Write a C program to implement Program semantic rules to calculate the expression that takes an expression with digits, + and \* and computes the value.
9. Implementation of symbol table.
10. Implement any one storage allocation strategies (Heap, Stack, Static).
11. Implementation of simple code optimization techniques (constant folding. etc.)

**BCS-DS-676: Web Development Framework**

Periods/week	Credits	Max. Marks	: 100
P: 2	1.0	Continuous Evaluation	: 50
Duration of Examination: 2 Hrs		End Sem Examination	: 50

**Pre-Requisite: Basic Knowledge of computers**

**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-676.1. Understand the content management systems to create and host modern websites.
- BCS-DS-676.2. Use open source content management systems (CMS) on the web today, including WordPress, Drupal, and Joomla.
- BCS-DS-676.3. Learn to use a Drupal site as a user with varying rights, optionally, install a Drupal site.
- BCS-DS-676.4. Analyze the benefits of working with a server-side database and the power it brings to creating and managing websites.
- BCS-DS-676.5 Create and deploy websites using CMS, including creating and editing content, adding functionality, and creating custom templates and themes.
- BCS-DS-676.6 Learn ongoing maintenance considerations with CMS websites.

**Note:** The faculty members are required to make sure that all the students perform at least one experiment related to the topics mentioned. In addition to this the faculty teaching the course, is required to make students identify a project during the initial lectures, and let students implement the concepts learned, as the course progresses. The evaluation should be only on the basis of, how complex the objectives were set and how much percentage of the same have been implemented in the final project, in the efficient manner.

**PART-A**

**Unit-1: Introduction**

- 1.1 What is CMS? Types of CMS, CMS Architecture.
- 1.2 CMS Technologies: LAMP stack, Web server (Apache), Database (MySQL).
- 1.3 Scripting languages- HTML, CSS, JavaScript, and PHP.
- 1.4 Website strategy and planning, site mapping, content planning.

**Unit-2: Wordpress**

- 2.1 Case Study: Wordpress – Architecture, Modules.
- 2.2 Themes, Installation and Configuration.
- 2.3 Modifying WordPress CSS and HTML parameters.
- 2.4 Plug-ins and themes Best Practices.

**Unit-3: Drupal**

- 3.1 Case Study: Drupal Terminology, Architecture Installation and Configuration Modules.
- 3.2 Themes Data Abstraction Layer, Content Types – CCK, Views Best Practices
- 3.3 Adjust the default image settings, or create your own image styles.
- 3.4 Apply the image styles to content types that use image fields.

**PART-B**

**Unit-4: Joomla**

- 4.1 Installing Joomla, Exploring the Admin Interface, Content creation using the CAM model
- 4.2 Content customization: images, video, audio, tags, formats, etc.
- 4.3 Adding and displaying menus, Linking menus to articles and other features, Finding and adding Joomla extensions
- 4.4 Adding and setting up 2 "big" extensions (choose blog, calendar, image gallery, Paypal-based shopping cart, or portfolio. Other extensions on approval).

**Unit-5: Django**

- 5.1 Introduction to Django, Installation, Overview.

- 5.2 Virtual Environment, Overview & Creating App
- 5.3 Views: URL Mapping/ URL Dispatcher, Regular expressions, Error/Exception handling, Decorators.
- 5.4 Templates: Django Template language, Filters: Models, Fields: Queries [with Filters] Migrations  
Forms: Validations, Fields & Widgets Authentication & Administration.

**Unit-6: Laravel**

- 6.1 Introduction, Laravel Features, LARAVEL INSTALLATION.
- 6.2 APPLICATION STRUCTURE of Laravel: Root Directory App Directory.
- 6.3 CONFIGURATION: Basic Configuration Environmental Configuration, Database Configuration, Naming the Application, Maintenance Mode.

**BCS-DS-632: Data Mining**

Periods/week Credits  
L: 3 T: 0 3.0  
Duration of Examination: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Database Management Systems (BCS-DS-404)**

**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-632.1. Identify appropriate data mining algorithms to solve real world problems.
- BCS-DS-632.2. Compare and evaluate different data mining techniques like classification, prediction, clustering and association rule mining.
- BCS-DS-632.3. Describe complex data types with respect to spatial and web mining.
- BCS-DS-632.4. Develop skills to write queries using DMQL
- BCS-DS-632.5. Develop skill in selecting the appropriate data mining algorithm for solving practical problems.

**PART-A**

**Unit 1: Data Mining & Business Intelligence:**

- 1.1 Introduction: Scope of Data Mining: What is Data Mining;
- 1.2 How does Data Mining Works, Predictive Modeling;
- 1.3 Data Mining and Data Warehousing: Architecture for Data Mining;
- 1.4 Profitable Applications: Data Mining Tools,
- 1.5 Business Intelligence, Business Intelligence tools,
- 1.6 Business Intelligence Infrastructure, Business Intelligence Applications,
- 1.7 BI versus Data Warehouse, BI versus Data Mining, Future of BI.

**Unit 2: Data Preprocessing:**

- 2.1 Introduction, Data Preprocessing Overview,
- 2.2 Data Cleaning, Data Integration and Transformation,
- 2.3 Data Reduction, Discretization
- 2.4 Concept Hierarchy Generation.

**Unit 3: Data Mining Techniques- An Overview:**

- 3.1 Introduction, Data Mining,
- 3.2 Data Mining Versus Database Management System,
- 3.3 Data Mining Techniques-
- 3.4 Association rules, Classification, Regression,
- 3.5 Clustering, Neural networks.

**PART-B**

**Unit 4: Clustering:**

- 4.1 Introduction, Clustering,
- 4.2 Cluster Analysis,
- 4.3 Clustering Methods- K means, Hierarchical clustering,
- 4.4 Agglomerative clustering, Divisive clustering,
- 4.5 Clustering and segmentation software, evaluating clusters.

**Unit 5: Web Mining:**

- 5.1 Introduction, Terminologies,
- 5.2 Categories of Web Mining – Web Content Mining,
- 5.3 Web Structure Mining,
- 5.4 Web Usage Mining,
- 5.5 Applications of Web Mining, and Agent based and Data base approaches,
- 5.6 Web mining Software.

**Unit 6: Applications of Data mining:**

- 6.1 Introduction, Business Applications Using Data Mining
- 6.2 Risk management and targeted marketing,
- 6.3 Customer profiles and feature construction,
- 6.4 Medical applications (diabetic screening),
- 6.5 Scientific Applications using Data Mining, Other Applications.

(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-682: Data mining Lab using WEKA**

Periods/week	Credits	Max. Marks	: 100
P: 2	1.0	Continuous Evaluation	: 50
Duration of Examination: 2 Hrs		End Sem Examination	: 50

**Co-Requisite: Data Mining (BCS-DS-632)**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-682.1. Relate the concept of loading, preprocessing, and analysis of large data sets.
- BCS-DS-682.2. Describe the concept of various classification models and also draw a connection between these models.
- BCS-DS-682.3. Implement various clustering techniques and also draw a connection between these techniques.
- BCS-DS-682.4. Able to apply and explore the ideas and find association among data .
- BCS-DS-682.5. Design and analyze new models to solve various real world problems.
- BCS-DS-682.6. Plan and generate alternate solution to the existing framework and also study and analyze the results through data visualization.

**Program 1:** Use Boston House Price Dataset i.e. *housing.arff*. Apply all preprocessing algorithms and create a version of the initial data set in which the categorical data are converted into numerical data.

**Program 2:** Use all the above algorithms to classify weather data from the "weather.arff" file. Perform initial preprocessing and create a version of the initial dataset in which all numeric attributes should be converted to categorical data.

**Program 3:** Use k-means algorithm to bank data from the "bank.arff" file. Perform initial preprocessing and create a version of the initial data set in which the ID field should be removed and the "children" attribute should be converted to categorical data.

**Program 4:** Use Apriori algorithm to generate association rules for Iris data from the "iris.arff" file. Perform preprocessing and convert categorical data into numeric attributes and analyze results.

**Program 5:** Use "vote.arff" file for the processing of various attribute selection algorithm and evaluation of various performance measures.

**Program 6:** Use "diabetes.arff" file to evaluate various performance parameters for any three classifiers. Then generate and display the comparison graph for all the above performance parameters through various charts or graphs.

**Program 7:** Design and create an ensemble model using more than one classification algorithms (Bagging and Boosting)

**Program 8:** Design and create an ensemble model using more than two classification algorithms (Boosting).

**Program 9:** Design a Project for the Analysis and Identification handwritten digits using neural network model behavior.

**Program 10:** Design a Project for the Analysis and Prediction of student's behavior using suitable algorithms.

**BCS-DS-633: Agile Software Development Approaches**

Periods/week Credits  
L: 3 T: 0 3.0  
Duration of Examination: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Term Examination : 100

**Pre-Requisite: Nil**

**Course Type:** Program Elective

**Course Outcomes:** The students will be able to-

1. Select the most appropriate way to improve results for a specific circumstance or need
2. Apply a thorough understanding of Agile principles and specific practices
3. Analyze existing problems with the team, development process and wider organization
4. Evaluate likely successes and formulate plans to manage likely risks or problems

**PART- A**

**Unit-1: Agile Software Development**

Basics and Fundamentals of Agile Process Methods, Values of Agile, Principles of Agile, stakeholders, Challenges

**Unit-2: Lean Approach**

Waste Management, Kaizen and Kanban, add process and products add value. Roles related to the lifecycle, differences between Agile and traditional plans, differences between Agile plans at different lifecycle phases. Testing plan links between testing, roles and key techniques, principles, understand as a means of assessing the initial status of a project/ How Agile helps to build quality

**Unit-3: Agile and Scrum Principles**

Agile Manifesto, Twelve Practices of XP, Scrum Practices, Applying Scrum. Need of scrum, working of scrum, advanced Scrum Applications, Scrum and the Organization, scrum values

**PART –B**

**Unit-4: Agile Product Management**

Communication, Planning, Estimation Managing the Agile approach Monitoring progress, Targeting and motivating the team, Managing business involvement, Escalating issue. Quality, Risk, Metrics and Measurements, Managing the Agile approach Monitoring progress, Targeting and motivating the team, Managing business involvement and Escalating issue

**Unit-5: Agile Requirements**

User Stories, Backlog Management. Agile Architecture: FeatureDriven Development. Agile Risk Management: Risk and Quality Assurance, Agile Tools

**Unit-6: Agile Testing and Review**

Agile Testing Techniques, Test-Driven Development, User Acceptance Test, Agile Metrics and Measurements, The Agile approach to estimating and project variables, Agile Measurement, Agile Control: the 7 control parameters. Agile approach to Risk, The Agile approach to Configuration Management, The AternPrinciples,AternPhilosophy,The rationale for using Atern, Refactoring, Continuous integration, Automated Build Tools

**BCS-DS-634: Middleware Frameworks and ORM**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Term Examination : 100

**Pre-Requisite: Knowledge of Advance Java Programming**  
**Course Type: Program Electives**

**Course Outcomes: The students will be able to-**

- BCS-DS-634.1: Understand the core architecture of Spring Framework.
- BCS-DS-634.2: Implement Aspect Oriented programming and third party integration with Spring Framework
- BCS-DS-634.3: Understand the basics of Object Relational Mapping
- BCS-DS-634.4 : Design the Server Side Web Applications using Spring Framework

**PART-A**

**Unit 1 Introduction to Spring**

Introduction to Spring Framework, Overview of Spring framework ,Dependency Injection (DI), Spring Architecture, Spring Container, IoC, DI

**Unit 2 AOP**

OverviewAdvice Types, Pointcuts, Ordering Aspects, JoinPoint

**Unit 3 Spring MVC**

Overview, MVC Flow Understand, Setup Spring in Maven, Hello World in Spring,RequestParam, Path Params,Login / Register / Profile View and edit, Using JSTL, Page Redirect, Session Handling, Validations (Predefine and Custom),Error Handling

**PART-B**

**Unit 4 Spring Integration**

Spring integration with JDBC, Spring integration with Logger, Spring Integration with Mail, Spring integration with JPA,

**Unit 5 Hibernate Basics**

Hibernate Basics, Introduction to ORM framework, Hibernate Architecture Overview, Features of Hibernate, Life Cycle of Hibernate. ORM Basics, Hibernate vs JDBC, Setup with Maven, CRUD Operations

**Unit 6**

Spring Beans, Overview of Spring Boot Installation and System Requirements, Creating a Spring Application using Spring Boot, REST services & Swagger- Introduction to web services, Introduction to REST, Introduction to Swagger, Benefits of Swagger, Swagger Tools

**Text Books:**

1. Pro Spring 5: An In-Depth Guide to the Spring Framework and Its Tools by Chris Schaefer, Clarence Ho, and Rob Harrop, Apress, ISBN: 9781484228081

**HM-606 : French-2**

Periods/week	Credits	Max. Marks	: 100
L: 2	T: 0	2.0	Continuous Evaluation : 50
Duration of Examination: 1.5 Hrs		End Sem Examination	: 50

**Pre-Requisites:** Basic knowledge of grammatical structure, syntax, and vocabulary of French

**Course Type:** Humanities and Social Sciences

**Course Outcomes:** Students will be able to-

- HM-606.1. Exchange greetings and do introductions using formal and informal expressions. Understand and use interrogative and answer simple questions.
- HM-606.2. Learn basic vocabulary that can be used to discuss everyday life and daily routines, using simple sentences and familiar vocabulary. Express their likes and dislikes. Also will have understanding of simple conversations about familiar topics (e.g., greetings, weather and daily activities,) with repetition when needed.
- HM-606.3. Identify key details in a short, highly-contextualized audio text dealing with a familiar topic, relying on repetition and extra linguistic support when needed. Describe themselves, other people, familiar places and objects in short discourse using simple sentences and basic vocabulary.
- HM-606.4. Describe themselves, other people, familiar places and objects in short discourse using simple sentences and basic vocabulary. Provide basic information about familiar situations and topics of interest.
- HM-606.5. Express or/and justify opinions using equivalents of different verbs. Differentiate certain patterns of behavior in the cultures of the French-speaking world and the student's native culture.
- HM-606.6. Describe various places, location, themselves using simple sentences and vocabulary.

**PART – A**

**Unit 1- Se présenter (1)**

- 1.1 Les pluriels
- 1.2 Adjectives to describe a person

**Unit 2- Se présenter (2)**

- 2.1 Professions
- 2.2 Short essay on family & friend
- 2.3 Comprehension

**Unit 3- Parler de ses habitudes quotidiennes**

- 3.1 Les verbes pronominaux
- 3.2 Décrivez votre journée

**PART – B**

**Unit 4- Nommez et localiser des lieux dans la ville**

- 4.1 Prepositions
- 4.2 Asking & telling the way

**Unit 5- Informations simples sur le climat, la météo**

- 5.1 Les saisons
- 5.2 Les expressions de la saison
- 5.3 Comprehension

**Unit 6- Demander/ indiquer les horaires et les couleurs**

- 6.1 Timings
- 6.2 Colours

**Text Books/Reference Books/ Suggested Readings:**

**HM-607: GERMAN – 2**

Periods/week    Credits  
L: 2    T: 0    2.0  
Duration of Examination: 1.5 Hrs

Max. Marks                    : 100  
Continuous Evaluation    : 50  
End Sem Examination      : 50

**Pre-Requisites:** Students are expected to have basic knowledge of German grammar. They should know regular verbs and conjugations. They should be able to introduce themselves and make small sentences in German language.

**Course Type:** Humanities and Social Sciences

**Course Outcomes:** Students will be able to-

- HM-607.1. Discuss about various directions, countries and languages they speak.
- HM-607.2. Write short essays on family and friends. They will have knowledge of tenses.
- HM-607.3. Identify classroom vocabulary in the German language.
- HM-607.4. Speak ordinal and cardinal numbers and they will also learn months, days in German.
- HM-607.5. Express or/and justify opinions using equivalents of different verbs.
- HM-607.6. Describe themselves, other people, familiar places and objects in short discourse using simple sentences and basic vocabulary.

**PART – A**

**Unit 1: Ordinal und Kardinal Zahlen,**

- 1.1 Ordinal & Cardinal numbers
- 1.2 Months, days, Feiertage and dates

**Unit 2: sein und haben**

- 2.1 Verbs: to be and to have
- 2.2 helping verbs practice worksheets
- 2.3 Vocabulary (Family) short essay on family, friends etc.

**PART – B**

**Unit 3: Gegenstände im Kursraum**

- 3.1 Vocabulary (classroom)
- 3.2 Definite and indefinite articles

**Unit 4: Länder, Sprachen**

- 4.1 Countries, languages, directions
- 4.2 Past of the verb 'to be'

**Text Books/Reference Books:**

**HM-608: SPANISH – 2**

Periods/week    Credits  
L: 2    T: 0    2.0  
Duration of Examination: 1.5 Hrs

Max. Marks                    : 100  
Continuous Evaluation    : 50  
End Sem Examination     : 50

**Pre-Requisites:** Students are expected to have basic knowledge of Spanish Grammar. They should be able to understand Spanish language along with basic skills for communication. Students are also expected to have basic knowledge of Spanish Culture.

**Course Type:** Humanities and Social Sciences

**Course Outcomes:** Students will be able to-

HM-608.1. Know about various color names in Spanish along with various vocabularies related to cloths and wardrobe.

HM-608.2. Differentiate between Ser and Estar verbs along with uses.

HM-608.3. Understand adjectives along with telling time.

HM-608.4. Learn Count till 1000

HM-608.5. Acquire knowledge of regular –ER and –IR verbs along with its various uses.

HM-608.6. Assess knowledge of vocabulary related to family and marital status.

**PART – A**

**Unit 1 : Color and Clothing**

1.1 Introduction of colors

1.2 Vocabulary related to clothes and wardrobe

**Unit 2 : Ser, Estar and Haber**

2.1 Difference between the use of Verbo SER and ESTAR and their use with the similar adjective.

2.2 Introduction of Verbo HABER

**PART – B**

**Unit 3 : Adjective, Counting and Time**

3.1 Demonstrative adjectives

3.2 Counting till 1000

3.3 Time

**Unit 4 : Verb ER and IR and Family**

4.1 Introduction and Usage of –ER Verbs

4.2 Introduction and Usage of –IR Verbs

4.3 Vocabulary related to the family and marital status

# **SEMESTER – VII**

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**PROJ-CS-700: Project Phase - II/Industrial Project**

Periods/week Credits  
P :10 5.0  
Duration of Examination: 2 Hrs

Max. Marks : 300  
Continuous Evaluation : 200  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Projects**

**Course Outcomes:** Students will be able to-

- PROJ-CS-700.1. Identifies real world problems related to systems development decisions, originating from source requirements and goals.
- PROJ-CS-700.2. Design models as a solution for particular problems.
- PROJ-CS-700.3. Employ his/her skills in emerging areas.
- PROJ-CS-700.4. Manage work in team or group.
- PROJ-CS-700.5. Apply his/her learning in testing techniques
- PROJ-CS-700.6. Implement skilled solutions in various platforms.

The project is guided by a faculty. The projects are to be individual or in group. The work plan is finalized prior to the semester.

**PROJ-CS-710: Summer Internship-III**

Periods/week Credits  
L : 2 T: 0 2.0  
Duration of Exam:

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Summer Internship-II**

**Course Type: Core**

**Course Outcomes:** The students will be able to-

- Proj-CS-710.1. Actually face challenges of real field work.
- Proj-CS-710.2. Apply their learning skills to solve real life problem.
- Proj-CS-710.3. Show the research capability.
- Proj-CS-710.4. Enhance their Innovative skills.
- Proj-CS-710.5. Develop solutions.
- Proj-CS-710.6. Build technology for new areas.

Every student will have to undergo summer internship for 10 weeks in the relevant field of Engineering in which he/she is enrolled for B.Tech programme after 6<sup>th</sup> semester. Respective Head of Department will approve the Industry/Organization for internship. During this course of time he/she will be regularly monitored and evaluated. After successful completion of the internship, the student will have to submit the internship report, deliver a seminar about the work/project undertaken during the internship and will have to appear for viva. The evaluation of the summer internship shall be made as per following:

**Continuous Evaluation during training:**

- 1. Evaluation by the Supervisor in the Industry : 50 marks
- 2. Evaluation by Faculty Mentor during training visit : 20 marks
- 3. Internal seminar/ Presentation : 30 marks
- Total Marks : **100**

**End Term Evaluation after training:**

- 1. Project Report : 20 marks
- 2. Seminar/Presentation : 40 marks
- 3. Viva : 40 marks
- Total marks : **100**

**Total Credits : 2**

**COURSE ARTICULATION MATRIX :**

**BCS-DS-721: SIMULATION and MODELLING**

Periods/week Credits  
L: 3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-721.1. Describe the role of important elements of discrete event simulation and modeling paradigm.
- BCS-DS-721.2. Demonstrate real world situations related to systems development decisions, originating from source requirements and goals.
- BCS-DS-721.3. Interpret the model to resolve critical issues in a real world environment.
- BCS-DS-721.4. Develop simulation software to construct system model solutions.
- BCS-DS-721.5. Apply goal-driven system models solutions for particular problems.

**PART- A**

**Unit-1: Introduction to Simulation**

- 1.1 History of simulation, desirable software features, General purpose simulation package,
- 1.2 Simulation, Advantages, Disadvantages, Areas of application,
- 1.3 System environment, components of a system,
- 1.4 Simulation Examples: Simulation of Queuing systems,
- 1.5 Simulation of Inventory System, Other simulation examples.

**Unit-2: General Principles**

- 2.1. Concepts in discrete - event simulation, event scheduling/ Time advance algorithm,
- 2.2. simulation using event scheduling,
- 2.3. Random Numbers: Properties, Generations methods, Tests for Random number,
- 2.4. Frequency test, Runs test, Autocorrelation test.

**Unit-3: Random Variate Generation**

- 3.1. Inverse Transform Technique- Exponential,
- 3.2. Uniform, Weibull, Triangular distributions,
- 3.3. Direct transformation for Normal and log normal Distributions,
- 3.4. convolution methods- Erlang distribution, Acceptance Rejection Technique,
- 3.5. Optimisation Via Simulation: Meaning, difficulty,
- 3.6. Robust Heuristics, Random Search.

**PART –B**

**Unit-4: Analysis of Simulation Data**

- 4.1 Input Modelling: Data collection, Identification and distribution with data,
- 4.2 Parameter estimation, Goodness of fit tests,
- 4.3 Selection of input models without data, Multivariate and time series analysis,
- 4.4 Verification and Validation of Model – Model Building, Verification,
- 4.5 Calibration and Validation of Models.

**Unit-5: Output Analysis**

- 5.1. Types of Simulations with Respect to Output Analysis, Stochastic Nature of output data,
- 5.2. Measures of Performance and their estimation, Output analysis of terminating simulation,
- 5.3. Output analysis of steady state simulations,
- 5.4. Simulation Software: Selection of Simulation Software,
- 5.5. Simulation packages, Trend in Simulation Software.

### Unit-6: Analog vs Digital System

- 6.1. Simulation of water reservoir system, simulation of a servo system,
- 6.2. simulation of an auto-pilot, discrete system simulation,
- 6.3. Fixed time step vs event to event model, generation of random numbers,
- 6.4. Test for randomness, Monte-carlo computation vs stochastic simulation.

(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-771: SIMULATION and MODELLING LAB**

Periods/week Credits  
P:2 1.0  
Duration of Exam: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Co-Requisite: Simulation and Modelling (BCS-DS-721)**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-771.1. Apply Matlab for interactive computations.
- BCS-DS-771.2. Analyze the results of problems.
- BCS-DS-771.3. Perform simulation of different queuing systems.
- BCS-DS-771.4. Implement various complex engineering problems using MATLAB and simulation tools.
- BCS-DS-771.5. Construct various matrix operations and matrix relevant equations.

**List of Practicals:**

1. Study the main windows in MATLAB desktop and perform the analysis.
2. Perform Computer Generation of Random Numbers using MATLAB.
3. Implement Chi-Square goodness –of-fit test using dummy values.
4. Perform the test for Standard Normal Distribution.
5. Implementation of Random Number Generators using MATLAB.
6. Perform Monte Carlo Simulation and analyse the results
7. Steps to perform Simulation of Single Server Queuing System.
8. Steps to perform simulation of Two Server Queuing System.
9. Perform two samples Kolmogorov- Smirnov test.
10. Demonstrating how a system is represented using Simulink.

**BCS-DS-734: Automation and Robotics**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Term Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Student will be able to-

- BCS-DS-734.1. Acquire basic knowledge on Intelligent systems
- BCS-DS-734.2. Describe semantic networks
- BCS-DS-734.3. Demonstrate uncertainty of knowledge based systems
- BCS-DS-734.4. Acquire basic knowledge on Robots
- BCS-DS-734.5. Analyze robot transformations and sensors
- BCS-DS-734.6. Design an Intelligent system

**PART –A**

**Unit-1: Introduction**

- 1.1 Introduction: Data, Information and Knowledge
- 1.2 Models of Knowledge Representations
- 1.3 Representation and reasoning in logic
- 1.4 Applications of artificial Intelligence

**Unit-2: Semantic Networks**

- 2.1 Semantic Representations: Semantic networks
- 2.2 Frames
- 2.3 Conceptual dependencies, conceptual graphs
- 2.4 Ontology: Basic introduction

**Unit-3: Knowledge based systems**

- 3.1 Architecture of knowledge based system
- 3.2 Rule based programming and production system
- 3.3 Rule chaining and inference control
- 3.4 Reasoning about knowledge, Temporal Reasoning
- 3.5 Inference under Uncertainty: Bayesian techniques, Fuzzy reasoning

**PART –B**

**Unit-4: Intelligent agents**

- 4.1 Introduction: the agent metaphor and attributes of agent hood
- 4.2 Types of intelligent agents
- 4.3 Agent theory and languages

**Unit-5: Introduction to Robotics**

- 5.1 Robotics Anatomy: Definition, Law of Robotics
- 5.2 History and Terminology of Robotics- Accuracy and Repeatability of Robotics
- 5.3 Architecture of Robotic Systems
- 5.4 Robot Classifications

**Unit-6: Robot Sensors and Controls**

- 6.1 Robot Kinematics types – 2D 3D Transformations Scaling, Rotation, Translation
- 6.2 Sensors in Robot – Touch Sensors Tactile Sensors, Proximity and range Sensors, Light Sensors, Pressure Sensor
- 6.3 Robot Work Cell design – Sequence Control, Operating Interface, Mobile Robot Working Principle

**Text Books / Reference Books:**

**BCS-DS-723: Parallel and Distributed Algorithms**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**

**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-723.1. Define the concepts of parallelism, parallel architecture and applications of parallel and distributed computing
- BCS-DS-723.2. Understand the various principles for parallel algorithm designing
- BCS-DS-723.3. Apply the concepts of parallelism for real life problems of tree traversal and matrix operations
- BCS-DS-723.4. Designing of sorting algorithms and graph related problems using concepts of parallelism
- BCS-DS-723.5. Analyze the performance of numerous parallel computing algorithms using performance model and matrices
- BCS-DS-723.6. Demonstrate the components of different distributed systems models

**PART –A**

**Unit-1: Introduction: parallelism**

- 1.1 The idea of parallelism, reasons of using parallelism
- 1.2 Parallel Computers for increase Computation speed, different parallel architecture,
- 1.3 Forms of Parallelism, Parallel & Cluster Computing
- 1.4 Reasoning about performance of parallel programs.
- 1.5 Applications and challenges of Parallel and Distributed Computing

**Unit-2: Principles of Parallel Algorithm Design**

- 2.1 Decomposition Techniques
- 2.2 Message Passing Technique- Evaluating Parallel programs and debugging
- 2.3 Pointer Jumping: Useful Techniques for Parallelization

**Unit-3: Parallel Algorithms & programming**

- 3.1 Parallel Programming Language, Brent's Theorem
- 3.2 PRAM Algorithms: Parallel Reduction, Prefix Sums, List Ranking, Preorder Tree Traversal, Merging Two Sorted Lists,
- 3.3 Parallel algorithms on network, Matrix-Vector Multiplication, Matrix-Matrix Multiplication

**PART –B**

**Unit-4: Sorting & Graph Algorithms**

- 4.1 Sorting: Bubble Sort and Variants, Quick Sort, Other Sorting Algorithms
- 4.2 Graph Coloring, Minimum Spanning Tree: Prim's Algorithm
- 4.3 Single-Source Shortest Paths: Dijkstra's Algorithm
- 4.4 All-Pairs Shortest Paths

**Unit-5: Performance Models, Metrics and Techniques**

- 5.1 Computational Model - Complexity - Work vs. Cost, Number of operations
- 5.2 Cost-optimality, Number of processors, Brent's Theorem Examples.
- 5.3 Parallel Computing and Performance - Speedup: Amdahl's Law, Multi Core as a special case
- 5.4 Parallel Computing and Performance - Multi-Threading and Latency Hiding; Non-linear Speedup; Scaled Speedup (Gustafson's Law) and Iso-efficiency.

## Unit-6: Distributed System Models

- 6.1 Distributed system models
- 6.2 Distributed shared memory systems and programming achieving constant memory distributed shared memory programming primitives
- 6.3 Distributed synchronization, Consistency
- 6.4 Distributed storage, Wide area computing, distributed hash table

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Computer Networks (BCS-DS-405)**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-724.1. Understand the basic concept of basic layers i.e Physical & Data link layers including its protocols & devices
- BCS-DS-724.2. Describe various addressing Concepts & formation of IP & its types
- BCS-DS-724.3. Introduce IP with its various generation & its format
- BCS-DS-724.4. Learn transport layer protocols with its description.
- BCS-DS-724.5. Analyse application layer protocols.
- BCS-DS-724.6. Explore the concept of unicast & multicast routing protocols

**PART -A**

**Unit-1: Physical & Data Link layer Protocols**

- 1.1 Interfaces, Accessing the Network
- 1.2 Copper access technologies, Cable Access Technologies, Fiber Access Technologies, Air Access Technologies
- 1.3 LLC and MAC sub layer protocol, ATM (frame Format )
- 1.4 Ethernet, Token Ring, Token Bus and FDDI, Bridge protocols,
- 1.5 SONET/SDH standards, Dense wavelength division multiplexing (DWDM)

**Unit-2: Network Layer & its Protocols**

- 2.1 IP Addressing: Address Space, Notations, Classful Addressing , Classless addressing , Network Address Translation
- 2.2 IP: Format , Fragmentation & Options
- 2.3 ICMPV4: Messages, Debugging Tools, ICMP Checksum
- 2.4 Mobile IP: Addressing , Agents, three Phases, Inefficiency in Mobile IP
- 2.5 Virtual Private Network

**Unit-3: Next Generation IP**

- 3.1 IPV6 Addressing: Representation, address space, address space allocation , Auto Configuration, Renummering
- 3.2 Transition from IPV4 to IPV6 : Dual stack ,Tunneling, Header Translation
- 3.3 IPV6 Protocol: Packet Format , Extension Header

**PART-B**

**Unit-4: Transport Layer & its Protocols**

- 4.1 User Datagram Protocol (UDP): Datagram, Services & Applications
- 4.2 Transmission Control Protocol (TCP) : Features, Services , Segment
- 4.3 A TCP connection ,State Transition Diagram
- 4.4 TCP :Error Control, Flow Control. Congestion Control , Timers
- 4.5 SCTP : Services, Features, Packet Format, Error Control. Flow Control

**Unit-5: Application Layer & its Protocols**

- 5.1 World Wide Web , HTTP, FTP, TFTP
- 5.2 Electronic Mail : SMTP,POP, MIME, IMAP, SNMP
- 5.3 DHCP: Static & Dynamic Allocation & DHCP Operation
- 5.4 Remote Login : TELNET & SSH

## Unit-6: Unicast & Multicast Routing Protocols

6.1 Introduction: Inter –domain, Intra-domain Routing

6.2 Routing Algorithms: Distance Vector Routing , Bellman-Ford Algorithm, Link State Routing , Path Vector Routing

6.3 Unicast Routing Protocols: Introduction ,Internet structure, Routing information Protocol (RIP) Open shortest Path first (OSPF)

6.4 Multicast Routing Protocol: Introduction, Multicast Distance Vector (DVMRP), Multicast Link State (MOSPF)

**BCS-DS-725: Network Security & Management**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BSC-DS-725.1. Learn security concepts and ethics in Network Security.
- BSC-DS-725.2. Understand security standards of symmetric and asymmetric cryptography
- BSC-DS-725.3. Recognize about the security threats and viruses.
- BSC-DS-725.4. Identify the concept of Digital Signatures, authentication services and mechanisms
- BSC-DS-725.5. Get familiar with existing protocols for email as well for web security.
- BSC-DS-725.6. Understand about concepts of network management and various associated protocols.

**PART –A**

**Unit-1: Introduction**

- 1.1 OSI Security Architecture
- 1.2 Network security Models
- 1.3 Classical Encryption Techniques: Symmetric cipher model
- 1.4 Substitution Techniques
- 1.5 Transposition techniques, Rotor Machines.

**Unit-2: Block Ciphers and Public Key Cryptography**

- 2.1 Block Cipher Principles and its Modes of Operation
- 2.2 Data Encryption Standard, DES Encryption and Description.
- 2.3 Variants of DES: Double DES and Triple DES.
- 2.4 Principles of Public Key Cryptosystems
- 2.5 RSA Algorithm
- 2.6 Public Key Cryptosystems-Key Management
- 2.7 Diffie Hellman-key-Exchange.

**Unit-3: System Security**

- 3.1 Intruders, Intrusion Detection
- 3.2 Password Management
- 3.3 Malicious Software: Viruses and related Threats, Virus Countermeasures.
- 3.4 Firewalls: Design principles and Trusted Systems.

**PART –B**

**Unit-4: Authentication and Digital Signatures**

- 4.1 Authentication, Authentication requirements and functions
- 4.2 Hash functions, MD5 Message digest Algorithm
- 4.3 Secure Hash Algorithm( SHA)
- 4.4 Digital Signatures.

**Unit-5: Network Security**

- 5.1 Electronics Mail Security: PGP (Pretty Good Privacy), MIME, Data Compression techniques.
- 5.2 IP Security: Architecture, Authentication Header, Encapsulating security Payload, Key Management.
- 5.3 Web security: Secure Socket Layer & Transport Layer security
- 5.4 Secure electronic transactions.

**Unit-6: Network Management**

- 6.1. Network Management Model,

- 6.2. Infrastructure for Network Management,
- 6.3. SNMP v1, SNMP2 & SNMP3
- 6.4. Security Management, Security Analysis,
- 6.5. Change Management, Protecting Storage Area,
- 6.6. Risk Management, Identifying the risk to an Organization.

**BCS-DS-726: Distributed Operating System**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Operating Systems (BCS-DS-403)**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-726.1. Distinguish between operating systems and communication in distributed system.
- BCS-DS-726.2. Apply different mutual exclusion algorithm on the basis of the problem and the concept of deadlock condition in the system .
- BCS-DS-726.3. Create threads and process using various commands.
- BCS-DS-726.4. Demonstrate the file management scenario in distributed file system and the various trends in distributed file system.
- BCS-DS-726.5. Interpret the concept of memory management in distributed system, various consistency model and issue related to the shared memory system.
- BCS-DS-726.6. Examine the process communication and memory management process in MACH operating system.

**PART –A**

**Unit-1: Distributed Operating System Concepts**

- 1.1. Introduction to Distributed System, Goals of Distributed system
- 1.2. Hardware and Software concepts, Design issues
- 1.3. Communication in distributed system: Layered protocols, ATM networks, Client–Server mode
- 1.4. Remote Procedure Calls and Group Communication. Middleware and Distributed Operating Systems.

**Unit-2: Synchronization in Distributed System**

- 2.1. Clock synchronization, Mutual Exclusion
- 2.2. Election algorithm, the Bully algorithm, a Ring algorithm, Atomic Transactions
- 2.3. Deadlock in Distributed Systems, Distributed Deadlock Prevention, Distributed Deadlock
- 2.4. Detection

**Unit-3: Processes and Processors in Distributed Systems**

- 3.1. Threads, System models
- 3.2. Processors Allocation, Scheduling in Distributed System
- 3.3. Real Time Distributed Systems.

**PART -B**

**Unit-4: Distributed File Systems**

- 4.1. Distributed file system Design
- 4.2. Distributed file system Implementation
- 4.3. Trends in Distributed file systems.

**Unit 5: Distributed Shared Memory**

- 5.1. Concept of shared memory, Consistency models
- 5.2. Page based distributed shared memory
- 5.3. Shared variables distributed shared memory.

**Unit-6: Case Study MACH**

- 6.1. Introduction to MACH, process management in MACH, communication in MACH
- 6.2. UNIX emulation in MACH.

**Text Books /Reference Books:**

1. Andrew S. Tanenbaum, 2002, Distributed Operating Systems,1st edition, PHI.
2. Pradeep K. Sinha, 1998, Distributed Operating System, 1st edition,Wiley

**BCS-DS-727: Data Science**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-727.1. Describe a flow process for data science problems.
- BCS-DS-727.2. Classify data science problems into standard typology.
- BCS-DS-727.3. Correlate results to the solution approach followed.
- BCS-DS-727.4. Construct use cases to validate approach and identify modifications required.
- BCS-DS-727.5. Develop R codes for data science solutions.
- BCS-DS-727.6. Assess the solution approach.

**PART –A**

**Unit-1. INTRODUCTION TO DATA SCIENCE:**

- 1.1 Data science for engineers Course philosophy and expectation
- 1.2 Introduction to R
- 1.3 Variables and data types in R, Data frames
- 1.4 Recasting and joining of data frames
- 1.5 Arithmetic, Logical and Matrix operations in R
- 1.6 Control structures, Data visualization in R Basic graphics The study of language, applications of NLP

**Unit-2. LINEAR ALGEBRA AND STATISTICAL MODELLING FOR DATA SCIENCE**

- 2.1 Linear Algebra
- 2.2 Solving Linear Equation
- 2.3 Linear Algebra - Distance, Hyperplanes and Halfspaces, Eigen values, Eigen vectors
- 2.4 Statistical Modelling
- 2.5 Random Variables and Probability Mass/Density Functions
- 2.6 Sample Statistics
- 2.7 Hypotheses Testing

**Unit-3. Optimization for Data Science**

- 3.1 Basics of Optimization
- 3.2 Unconstrained Multivariate Optimization
- 3.3. Unconstrained Multivariate Optimization
- 3.4 Gradient ( Steepest ) Descent ( OR ) Learning Rule
- 3.5 Multivariate Optimization With Equality Constraints
- 3.6 Multivariate Optimization With Inequality Constraints

**PART –B**

**Unit-4. PREDICTIVE MODELLING AND REGRESSION FOR DATA SCIENCE**

- 4.1 Module : Predictive Modelling
- 4.2 Linear Regression
- 4.3 Model Assessment
- 4.4 Diagnostics to Improve Linear Model Fit
- 4.5 Simple Linear Regression Model Building
- 4.6 Simple Linear Regression Model Assessment
- 4.7 Simple Linear Regression Model Assessment ( Continued )
- 4.8 Multiple Linear Regression

**Unit-5. VALIDATION AND LOGISTIC REGRESSION**

- 5.1 Cross Validation

- 5.2 Multiple Linear Regression Modeling Building and Selection
- 5.3 Classification
- 5.4 Logistic Regression
- 5.5 Performance Measures
- 5.6 Logistic Regression Implementation in R

**Unit-6. KNN and Recent trends in various data collection and analysis techniques**

- 6.1 K - Nearest Neighbors (kNN)
- 6.2 K - Nearest Neighbors implementation in R
- 6.3 K - means Clustering
- 6.4 K - means implementation in R
- 6.5 Recent trends in various data collection
- 6.6 Analysis techniques
- 7.7 Various visualization techniques
- 7.8 Application development methods of used in data science.

**BCS-DS-728: Soft Computing**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-728.1. Define the basic concept of Intelligent Systems, Expert Systems, Knowledge Based systems and fuzzy logic.
- BCS-DS-728.2. Describe the Semantic networks, Crisp logic, Fuzzy Systems and different types of Fuzzy hierarchical models, logical reasoning, Classical logic, Multi-valued logics, Fuzzy propositions, Fuzzy quantifier and Linguistic hedges.
- BCS-DS-728.3. Judge the architecture of Fuzzy control, fuzzification and defuzzification.
- BCS-DS-728.4. Apply the basic concepts of Artificial Neural Networks; Models of ANNs; Feed-forward & Feed-back networks, various learning rules and connectionist models.
- BCS-DS-728.5. Examine the various genetic algorithms and its optimization.
- BCS-DS-728.6. Integrate population based incremental learning.

**PART -A**

**Unit-1: Overview of Soft Computing**

- 1.1. Concept of Intelligent Systems,
- 1.2. Knowledge Based Systems and their architecture,
- 1.3. Production Systems,
- 1.4. Expert Systems.
- 1.5. Knowledge representation and processing,
- 1.6. Semantic networks.
- 1.7. Crisp logic, Fuzzy Systems, logical reasoning.
- 1.8. Soft Computing Paradigm: Fuzzy logic, Artificial Neural Networks, Genetic Algorithms.

**Unit-2: Fundamentals of Fuzzy Logic**

- 2.1. Overview of classical sets,
- 2.2. Fuzzy sets, fuzzy arithmetic,
- 2.3. fuzzy numbers, Fuzzy operations, fuzzy equations,
- 2.4. Extension principle, Fuzzy relations, fuzzy selection.

**Unit-3: Fuzzy Logic**

- 3.1. Fuzzy Propositions, fuzzy quantifiers,
- 3.2. linguistic hedges, composition and inference,
- 3.3. Inference laws, conditional fuzzy propositions,
- 3.4. Quantified propositions, fuzziness of fuzzy sets and fuzzy resolution,
- 3.5. Fuzzification and defuzzification.

**PART -B**

**Unit-4: Fuzzy Systems**

- 4.1. Fuzzy expert systems, fuzzy implication, approximate reasoning,
- 4.2. Basics of fuzzy controls,
- 4.3. Fuzzy Control Architecture: hierarchical fuzzy systems, hierarchical models,
- 4.4. Effect of information processing, decision table approach to fuzzy systems.
- 4.5. Introduction to Neuro-Fuzzy Systems,
- 4.6. Architecture of Neuro-Fuzzy Networks.

**Unit-5: Artificial Neural Network**

- 5.1. History, Mathematical Models of Neurons,

- 5.2. Artificial Neural Network (ANN) Architecture,
- 5.3. Activation functions, Learning Rules,
- 5.4. features of Neural Networks,
- 5.5. Supervised & Unsupervised Learning,
- 5.6. Reinforcement Learning.
- 5.7. ANN Training Algorithms, Perceptions,
- 5.8. Training Rules, Delta, Back-Propagation Algorithm,
- 5.9. Application of Artificial Neural Networks

**Unit-6: Genetic Algorithms**

- 6.1. Overview of evolutionary computing, evolutionary programming strategies and genetic programming,
- 6.2. Genetic algorithms, genetic algorithms and optimization,
- 6.3. Genetic Schema theorem, genetic algorithms operators,
- 6.4. Integration of genetic algorithms with fuzzy logic.
- 6.5. Population based incremental learning.
- 6.6. Applications of GA.

**BCS-DS-735: Component Based Development**

Periods/week Credits  
L: 3 T: 0 3.0  
Duration of Examination: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Term Examination : 100

**Pre-Requisite: Nil**

**Course Type:** Program Elective

**Course Outcomes:** The students will be able to-

1. Familiarize with Component Based Systems, their Purpose and Scope
2. Identify Component Based Development Technologies
3. Apply design Of Software Component Infrastructures
4. Analyze Software Engineering Practices related to CBD

**PART- A**

**Unit-1: Component Definition**

Definition of Software Component and its Elements. Component Models and Component Services: Concepts and Principles, COTS Myths and Other Lessons Learned in Component-Based Software Development, Roles for Component-Based Development, Common High Risk Mistakes in Component-Based Software Engineering, CBSE Success Factors: Integrating Architecture, Process, and Organization.

**Unit-2: Software Engineering Practices:**

The Practice of Software Engineering, From Subroutines to Subsystems: Component-Based Software Development

**Unit-3: The Design of Software Component Infrastructures:**

Software Components and the UML, Component Infrastructures: Placing Software Components in Context, Business Components, Components and Connectors: Catalysis Techniques for Defining Component Infrastructures, An Open Process for Component-Based Development, Designing Models of Modularity and Integration.

**PART –B**

**Unit-4: The Management Of Component-Based Software Systems:**

Measurement and Metrics for Software Components, The Practical Reuse of Software Components, Selecting the Right COTS Software: Why Requirements are Important, Software Component Project Management Processes, The Trouble with Testing Software Components, configuration Management and Component Libraries, The Evolution, Maintenance and Management of Component-Based Systems.

**Unit-5: Component Technologies**

Overview of the CORBA Component Model, Transactional COM+: Designing Scalable Applications, The Enterprise JavaBeans Component Model, Choosing Between COM+, EJB, and CCM, Software Agents as Next Generation Software Components.

**Unit-6: Legal and Regulatory**

CBSE as a Unique Engineering Discipline, The Future of Software Components: Standards and Certification, Commercial Law Applicable to Component-Based Software, The Effects of UCITA on Software Component Development and Marketing, Future of CBSE.

**Text Books / Reference Books:**

- 1.Component-Based Development: Principles and Planning for Business Systems: Don Box, Dorling Kingsley,2010, Addison Wilsey.

# **SEMESTER – VIII**

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**PROJ-CS-800: Internship –III**

Periods/week	Credits	Max. Marks	: 300
24 weeks	10.0	Continuous Evaluation	: 200
Duration of Exam: 2 Hrs		End Sem Examination	: 100

**Pre-Requisite: Basic Knowledge of computers**

**Course Type: Projects**

**Course Outcomes:** Students will be able to-

- PROJ-CS-800.1. Recognize the challenges of real working environment.
- PROJ-CS-800.2. Apply their learning skills to solve real life problem.
- PROJ-CS-800.3. Develop the synergetic collaboration between industry and the organization.
- PROJ-CS-800.4. Enhance their Innovative skills.
- PROJ-CS-800.5. Explore options in their career plans.
- PROJ-CS-800.6. Integrate learning for catering to professional ethics and societal needs.

Every student will have to undergo Industrial Training for 10-12 weeks in the relevant field of Engineering in which he/she is enrolled for B.Tech programme after 6<sup>th</sup> semester. Respective Head of Department will approve the Industry/Organization for training. During this course of time he/she will be regularly monitored and evaluated. After successful completion of the training, the student will have to submit the training report, deliver a seminar about the work/project undertaken during the training and will have to appear for viva. The evaluation of the industrial training shall be made as per following:

**Continuous Evaluation during training:**

1. Evaluation by the Supervisor in the Industry	:	75 marks
2. Evaluation by Faculty Mentor during training visit	:	50 marks
3. Internal seminar/ Presentation	:	75 marks

**Total Continuous Evaluation Marks** : **200**

**End Sem Evaluation after training:**

1. Project Report	:	30 marks
2. Seminar/Presentation	:	20 marks
3. Viva	:	50 marks

**Total End Sem Evaluation marks** : **100**

**Total Credits** : **14**

The parameters for evaluation during the training for Supervisor shall be as under:

	<b>Marks</b>
Work/Project undertaken	: 15
Punctuality/Regularity	: 10
Discipline/Overall Conduct/Relations with seniors and others	: 10
Eagerness to acquire technical knowledge	: 20
Overall Proficiency achieved during training	: 10
Any contribution to the organization	: 10
<b>Total</b>	<b>75</b>

The parameters for evaluation by the faculty during training shall be as under:

Maintenance of Training Diary and Regularity	:	10
Relations with seniors and others	:	10
Overall Conduct	:	10
Willingness to Work	:	10
Proficiency achieved	:	10

-----  
50

**COURSE ARTICULATION MATRIX:**

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-822: Fuzzy Theory**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**

**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-822.1. Describe the basic concepts of Crisp & Fuzzy sets
- BCS-DS-822.2. Implement the Operations on Fuzzy Sets.
- BCS-DS-822.3. Apply the concept of Fuzzy numbers, Fuzzy Intervals and Fuzzy Equations.
- BCS-DS-822.4. Relate different Fuzzy logics.
- BCS-DS-822.5. Evaluate the concept of Fuzzy Logic to problems of different areas.
- BCS-DS-822.6. Develop applications with help of Fuzzy Decision making.

**PART- A**

**Unit-1: Fuzzy set theory**

- 1.1 Crisp set theory
- 1.2 Concept of fuzzy set
- 1.3 certain crisp sets associated with Fuzzy set
- 1.4 Alpha cut and its properties
- 1.5 Representation of fuzzy sets
- 1.6 Extension principle for Fuzzy set
- 1.7 Triangular and trapezoidal fuzzy sets

**Unit-2: Operations on Fuzzy sets**

- 2.1 Types of operations (Complement, Union and Intersection)
- 2.2 Properties based on operations
- 2.3 Aggregation Operations and its properties

**Unit-3: Fuzzy Arithmetic:**

- 3.1 Fuzzy numbers
- 3.2 Fuzzy Intervals
- 3.3 Operations on Fuzzy numbers
- 3.4 Fuzzy Equations

**PART- B**

**Unit-4: Fuzzy Relations**

- 4.1 Introduction
- 4.2 Operations on Fuzzy Relations
- 4.3 Alpha-cuts of Fuzzy Relations
- 4.4 Composition of Fuzzy Relations
- 4.5 Projections of Fuzzy Relations
- 4.6 Cylindric extensions
- 4.7 Cylindric closure
- 4.8 Equivalence relations

**Unit-5: Fuzzy Logic**

- 5.1 Introduction
- 5.2 Multi-valued logics and infinite valued logics
- 5.3 Fuzzy logics
- 5.4 Fuzzy propositions and their interpretations in terms of fuzzy sets
- 5.5 Fuzzy inference
- 5.6 Fuzzification
- 5.7 Defuzzification

## 5.8 Generalizations of Fuzzy Logic

### Unit-6: Fuzzy Decision Making

6.1 Role of aggregation operators in decision making

6.2 Individual decision making

6.3 Multi-person decision making

6.4 Multi-criteria decision making

**BCS-DS-823: Computational Linguistics and Natural Language Processing**

Periods/week	Credits	Max. Marks	: 200
L :3	T: 0	3.0	Continuous Evaluation : 100
Duration of Exam: 3 Hrs		End Sem Examination	: 100

**Pre-Requisite: Basic Knowledge of computers**

**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-823.1. Describe the basic concept of Natural Language and different level of Language Analysis.
- BCS-DS-823.2. Discuss the Morphological Analysis and The Lexicon.
- BCS-DS-823.3. Interpret the behavior of different parsing algorithms with Languages.
- BCS-DS-823.4. Understanding the grammar with help of Lexicon theory.
- BCS-DS-823.5. Analysis of wordnet theory with help of languages.
- BCS-DS-823.6. Develop system for Indian language.

**PART- A**

**Unit-1. INTRODUCTION TO NATURAL LANGUAGE UNDERSTANDING:**

- 1.1 The study of language, applications of NLP
- 1.2 Evaluating language understanding systems
- 1.3 Different levels of language analysis
- 1.4 Representations and understanding
- 1.5 Organization of natural language understanding systems
- 1.6 Llinguistic background: an outline of English syntax.

**Unit-2. MORPHOLOGICAL ANALYSIS AND THE LEXICON**

- 2.1 Morphology fundamentals
- 2.2 Morphological Diversity of Indian Languages
- 2.3 Morphology Paradigms
- 2.4 Finite State Machine Based Morphology
- 2.5 Automatic Morphology Learning
- 2.6 Shallow Parsing; Named Entities

**Unit-3. GRAMMARS AND PARSING:**

- 3.1 Grammars and sentence structure
- 3.2 Theories of Parsing
- 3.3. Parsing Algorithms (Top-down and Bottom-up parsers)
- 3.4 Robust and Scalable Parsing on Noisy Text as in Web documents
- 3.5 Hybrid of Rule Based and Probabilistic Parsing
- 3.6 Probabilistic context-free grammars, best first parsing

**PART- B**

**Unit-4. GRAMMARS AND MEANING FOR NATURAL LANGUAGE:**

- 4.1 Auxiliary verbs and verb phrases
- 4.2 Movement phenomenon in language
- 4.3 Handling questions in context-free grammars
- 4.4 Lexical Knowledge Networks
- 4.5 Wordnet Theory
- 4.6 Indian Language Wordnets and Multilingual Dictionaries

**Unit-5. HUMAN PREFERENCES IN PARSING**

- 5.1 Encoding uncertainty
- 5.2 Deterministic parser
- 5.3 Word level morphology and computational phonology
- 5.4 Basic text to speech

5.5 Introduction to HMMs and speech recognition

5.6 Parsing with CFGs; probabilistic parsing

### Unit-6. AMBIGUITY RESOLUTION

6.1 Statistical methods

6.2 Estimating probabilities

6.3 Part-of- speech tagging

6.4 Obtaining lexical probabilities

6.5 Scope Ambiguity and Attachment Ambiguity resolution.

6.6 Word senses and ambiguity, encoding ambiguity in logical form, Indian language case studies.

**BCS-DS-824: Cryptography and Network Security**

Periods/week	Credits	Max. Marks	: 200	
L :3	T: 0	3.0	Continuous Evaluation	: 100
Duration of Exam: 3 Hrs		End Sem Examination	: 100	

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-824.1. Learn security requirement and basic principles.
- BCS-DS-824.2. Compare and review existing cryptography algorithms.
- BCS-DS-824.3. Apply security in our professional and in our day to day life
- BCS-DS-824.4. Examine depth of security on different layers of network.
- BCS-DS-824.5. Evaluate efforts to break security algorithms
- BCS-DS-824.6. Develop new security algorithms as per application requirement.

**PART- A**

**Unit-1: Introduction**

- 1.1 Needs of security
- 1.2 Categories of security
- 1.3 OSI Security Architecture and other Network security Models
- 1.4 Classical Encryption Techniques
- 1.5 Symmetric cipher model
- 1.6 Substitution Techniques
- 1.7 Transposition techniques
- 1.8 Rotor Machines.

**Unit-2: Block Ciphers and Encryption Standards**

- 2.1 Block Cipher Principles and its Modes of Operation
- 2.2 Data Encryption Standard, DES Encryption and Description.
- 2.3 Variants of DES: Double DES and Triple DES
- 2.4 Advance Encryption Standard

**Unit-3: Public Key Cryptography**

- 3.1 Principles of Public Key Cryptosystems
- 3.2 RSA Algorithm
- 3.3 Public Key Cryptosystems-Key Management
- 3.4 Diffie Hellman-key-Exchange.

**PART -B**

**Unit-4: Network Security**

- 4.1 Authentication
- 4.2 Authentication requirements and functions
- 4.3 Hash functions
- 4.4 MD5 Message digest Algorithm
- 4.5 Secure Hash Algorithm( SHA)
- 4.6 Digital Signatures.
- 4.7 Electronics Mail Security: PGP (Pretty Good Privacy), MIME
- 4.8 Data Compression techniques.
- 4.9 IP Security: Architecture, Authentication Header, Encapsulating security Payload, Key Management.
- 4.10 Web security: Secure Socket Layer & Transport Layer security
- 4.11 Secure electronics transactions.

**Unit-5: System Security**

- 5.1 Intruders, Intrusion Detection
- 5.2 Password Management

5.3 Malicious Software: Viruses and related Threats, Virus Countermeasures

5.4 Firewalls: Design principles and Trusted Systems.

### Unit-6: Network Management

6.1 Telecommunication Network Architecture

6.2 TMN management layers, Management information Model, Management servicing and functions

6.3 Structure of management information and TMN information model

6.4 Network Management Protocols: SNMP v1, SNMP2 & SNMP3, RMON1 & RMON2

6.5 Broadband Network Management: ATM, HFC, DSL, ASN.

**BCS-DS-825: Machine Learning with Big Data**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-825.1. Design an approach to leverage data using the steps in the machine learning process.
- BCS-DS-825.2. Apply machine learning techniques to explore and prepare data for modeling.
- BCS-DS-825.3. Identify the type of machine learning problem in order to apply the appropriate set of techniques.
- BCS-DS-825.4. Construct models that learn from data using widely available open source tools.
- BCS-DS-825.5. Analyze big data problems using scalable machine learning algorithms.
- BCS-DS-825.6. Evaluate the different models for different techniques.

**PART- A**

**Unit-1: Introduction to Machine Learning with Big Data**

- 1.1 Machine Learning Overview
- 1.2 Categories of Machine Learning Techniques
- 1.3 Goals and Activities in the Machine Learning Process
- 1.4 Scaling Up Machine Learning Algorithms
- 1.5 CRISP-DM

**Unit-2: Data Exploration**

- 2.1 Data Exploration
- 2.2 Data Exploration through Summary Statistics
- 2.3 Data Exploration through Plots
- 2.4 Exploring Data with KNIME Plots
- 2.5 Data Exploration in Spark

**Unit-3: Data Preparation**

- 3.1 Data Preparation
- 3.2 Data Quality
- 3.3 Addressing Data Quality Issues
- 3.4 Feature Selection
- 3.5 Feature Transformation
- 3.6 Dimensionality Reduction
- 3.7 Handling Missing Values in KNIME
- 3.8 Handling Missing Values in Spark

**PART -B**

**Unit-4: Classification**

- 4.1 Classification
- 4.2 Building and Applying a Classification Model
- 4.3 Classification Algorithms
- 4.4 k-Nearest Neighbors
- 4.5 Decision Trees
- 4.6 Naïve Bayes
- 4.7 Classification using Decision Tree in KNIME
- 4.8 Classification in Spark

**Unit-5: Evaluation of Machine Learning Models**

- 5.1 Generalization and Overfitting

- 5.2 Overfitting in Decision Trees
- 5.3 Using a Validation Set
- 5.4 Metrics to Evaluate Model Performance
- 5.5 Confusion Matrix
- 5.6 Evaluation of Decision Tree in KNIME
- 5.7 Evaluation of Decision Tree in Spark

**Unit-6:Regression, Cluster Analysis, and Association Analysis**

- 6.1. Regression Overview
- 6.2. Linear Regression
- 6.3. Cluster Analysis
- 6.4. k-Means Clustering
- 6.5. Association Analysis
- 6.6 Cluster Analysis in Spark

**BCS-DS-872: Machine Learning with Big Data Lab**

Periods/week Credits  
P :2 1.0  
Duration of Exam: 2 Hrs

Max. Marks : 100  
Continuous Evaluation : 50  
End Sem Examination : 50

**Pre-Requisite: The ability to install applications and utilize a virtual machine is necessary to complete the hands-on assignments.**

**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-872.1. Understand, how to set up a KNIME Workspace and use Nodes in a Workflow.
- BCS-DS-872.2. Categorize data exploration techniques.
- BCS-DS-872.3. Demonstrate how to explore data using KNIME and Spark.
- BCS-DS-872.4. Create a classification model in KNIME and Spark.
- BCS-DS-872.5. Generate and interpret metrics to evaluate a model.
- BCS-DS-872.6. Build a cluster analysis model in Spark

**List of Experiments:-**

1. Downloading and Installation of the Cloudera VM (Virtualbox) and Jupyter Notebook.
2. Download and install KNIME, setup KNIME workspace and navigate KNIME workbench, and use Nodes in a workflow.
3. Handling missing values in KNIME.
4. Handling missing values in Spark.
5. Classification using Decision Tree in KNIME.
6. Classification using Spark and comparing classification results for KNIME and Spark.
7. Evaluation of decision tree in KNIME and Spark.
8. Create an "elbow" plot, the number of clusters vs. within-cluster sum-of-squared errors, to determine a value for k, the number of clusters in k-means.
9. Implement cluster analysis on weather dataset using k-means in Spark.
10. Create parallel coordinates plots to analyse cluster centers.

**Software required/Weblinks:**

[https://www.knime.org/downloads/overview?quicktabs\\_knimed=1#quicktabs-knimed](https://www.knime.org/downloads/overview?quicktabs_knimed=1#quicktabs-knimed)

<https://www.virtualbox.org/wiki/Downloads>

**BCS-DS-826: Wireless and AD-Hoc Network**

Periods/week	Credits	Max. Marks	: 200
L :3	T: 0	3.0	Continuous Evaluation : 100
Duration of Exam: 3 Hrs		End Sem Examination	: 100

**Pre-Requisite: Basic Knowledge of electronics**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BSC-CS-826.1. Learn Ad hoc network and Sensor Network fundamentals
- BSC-CS-826.2. Understand the different routing protocols
- BSC-CS-826.3. Apply an in-depth knowledge on sensor network architecture and design issues
- BSC-CS-826.4. Examine the transport layer and security issues possible in Ad hoc and Sensor networks
- BSC-CS-826.5. Develop to explore more programming platforms and tool
- BSC-CS-826.6. Illustrate & Mange various Adhoc and sensor Attacks

**PART-A**

**UNIT-1: AD HOC NETWORKS – INTRODUCTION AND ROUTING PROTOCOLS**

- 1.1 Elements of Ad hoc Wireless Networks, Issues in Ad hoc wireless networks
- 1.2 Ad hoc wireless Internet
- 1.3 Issues in Designing a Routing Protocol for Ad Hoc Wireless Networks
- 1.4 Classifications of Routing Protocols
- 1.5 Table Driven Routing Protocols – Destination Sequenced Distance Vector (DSDV), On-Demand Routing protocols –Ad hoc On-Demand Distance Vector Routing (AODV).

**UNIT-2: SENSOR NETWORKS – INTRODUCTION ARCHITECTURES**

- 2.1 Challenges for Wireless Sensor Networks
- 2.2 Enabling Technologies for Wireless Sensor Networks
- 2.3 WSN application examples, Single-Node Architecture – Hardware Components,
- 2.4 Energy Consumption of Sensor Nodes
- 2.5 Network Architecture – Sensor Network Scenarios, Transceiver Design Considerations, Optimization Goals and Figures of Merit.

**UNIT-3: WSN NETWORKING CONCEPTS AND PROTOCOLS**

- 3.1 MAC Protocols for Wireless Sensor Networks
- 3.2 Low Duty Cycle Protocols And Wakeup Concepts – S-MAC
- 3.3 The Mediation Device Protocol
- 3.4 Contention based protocols – PAMAS, Schedule based protocols
- 3.5 Schedule based protocols - LEACH, MAC protocol, Routing Protocols, Energy Efficient Routing

**PART-B**

**UNIT-4: SENSOR NETWORK SECURITY**

- 4.1 Network Security Requirements
- 4.2 Issues and Challenges in Security Provisioning
- 4.3 Network Security Attacks,
- 4.4 Layer wise attacks in wireless sensor networks
- 4.5 Key Distribution and Management, Secure Routing – SPINS, reliability requirements in sensor networks.

**UNIT-5: SENSOR NETWORKS AND PLATFORM TOOLS**

- 5.1 Sensor Node Hardware – Berkeley Motes
- 5.2 Programming Challenges
- 5.3 Node-level software platforms
- 5.4 Node-level Simulators – NS2 and its extension to sensor networks,
- 5.5 COOJA, TOSSIM

## UNIT-6: ADHOC NETWORK ATTACKS

- 6.1 QoS Issue in Adhoc Networks: Introduction
- 6.2 Definition of QoS, Medium Access Layer
- 6.3 QoS Routing, Inter- Layer Design Approaches
- 6.4 Security in Mobile Adhoc Networks: Vulnerabilities of Mobile Adhoc Networks
- 6.5 Potential Attacks, Attack Prevention Techniques. Intrusion Detection Techniques

Periods/week	Credits	Max. Marks	: 200
L :3	T: 0	3.0	Continuous Evaluation : 100
Duration of Exam: 3 Hrs		End Sem Examination	: 100

**Pre-Requisite: Computer Organization & Architecture (BCS-DS-402)**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-827.1. Compare different types of parallelism.
- BCS-DS-827.2. Analyze the various type of scheduling for computer architecture.
- BCS-DS-827.3. Explain the cache memory organization.
- BCS-DS-827.4. Examine the different types of processors.
- BCS-DS-827.5. List the different generations of multi-computers.
- BCS-DS-827.6. Proposed the architecture of the linear pipeline and nonlinear pipeline processors.

**PART –A**

**Unit-1: Parallel Computer Models**

- 1.1. Concept of Parallelism, the State of Computing,
- 1.2. Multiprocessors and Multicomputers,
- 1.3. Multivector and SIMD Computers,
- 1.4. PRAM and VLSI Models,
- 1.5. Architectural Development Tracks.

**Unit-2: Program and Network Properties**

- 2.1. Conditions of Parallelism,
- 2.2. Program Partitioning and Scheduling,
- 2.3. Program Flow Mechanisms,
- 2.4. System Interconnect Architectures.

**Unit-3: Principles of Scalable Performance**

- 3.1. Performance Metrics and Measures,
- 3.2. Parallel Processing Applications,
- 3.3. Speedup Performance Laws,
- 3.4. Scalability Analysis and Approaches.

**PART –B**

**Unit-4: Processors and Memory Hierarchy**

- 4.1. Advanced Processor Technology,
- 4.2. Superscalar and Vector Processors,
- 4.3. Memory Hierarchy Technology,
- 4.4. Virtual Memory Technology.

**Unit-5: Bus, Cache, and Shared Memory**

- 5.1. Backplane Bus Systems,
- 5.2. Cache Memory Organizations,
- 5.3. Shared-Memory Organizations,
- 5.4. Sequential and Weak Consistency Models.

**Unit-6: Pipelining and Superscalar Techniques**

- 6.1. Linear Pipeline Processors,
- 6.2. Nonlinear Pipeline Processors,
- 6.3. Instruction Pipeline Design,
- 6.4. Arithmetic Pipeline Design,
- 6.5. Superscalar and Super pipeline Design,

- 6.6. Overview of Parallel and Scalable Architectures,
- 6.7. Multiprocessors and Multicomputers, Multiprocessor System Interconnects,
- 6.8. Cache Coherence and Synchronization Mechanisms,
- 6.9. Three Generations of Multicomputers.

Duration of Exam: 3 Hrs		End Sem Examination	: 100

**Pre-Requisite: Basic Knowledge of computers**

**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-828.1. Outline the basic concept of Neural network and Deep learning.
- BCS-DS-828.2. Describe the biological neural network and to model equivalent neuron models.
- BCS-DS-828.3. Differentiate various learning algorithm and issues of various-feed forward and feedback neural networks.
- BCS-DS-828.4. Apply Neural Networks and deep learning techniques to practical problems.
- BCS-DS-828.5. Design the algorithms and techniques to solve real time problems
- BCS-DS-828.6. Critically evaluate the complexities of various problems in different domains model performance and interpret results.

**PART- A**

**UNIT – 1: Introduction of Neural Network**

- 1.1 Human Brain, Models of a Neuron,
- 1.2 Neural Networks viewed as Directed Graphs,
- 1.3 Network Architectures,
- 1.4 Artificial Intelligence and Neural Networks Learning Process, Machine Learning
- 1.5 Memory Based Learning, Hebbian Learning, Competitive, Boltzmann Learning
- 1.6 Credit Assignment Problem,
- 1.7 Memory, Adaption,
- 1.8 Statistical Nature of the Learning Process

**UNIT – 2: Single Layer Perceptron**

- 2.1 Adaptive Filtering Problem,
- 2.2 Unconstrained Organization Techniques,
- 2.3 Linear Least Square Filters, Least Mean Square Algorithm, Learning Curves, Learning Rate Annealing Techniques,
- 2.4 Perceptron –Convergence Theorem,
- 2.5 Relation Between Perceptron and Bayes Classifier for a Gaussian Environment
- 2.6 Multilayer Perceptron: Back Propagation
- 2.7 Algorithm XOR Problem, Heuristics, Output Representation and Decision Rule

**UNIT – 3: Back Propagation:**

- 3.1 Error Function and Activation Function
- 3.2 Back Propagation and Differentiation,
- 3.3 Feedforward Neural networks,
- 3.4 Gradient descent and the backpropagation algorithm.
- 3.5 Network Pruning Techniques, Virtues, and Limitations of Back Propagation Learning,
- 3.6 Accelerated Convergence

**PART- B**

**Unit 4: Convolutional Neural Networks**

- 4.1 Invariance, stability,
- 4.2 Variability models , deformation model, stochastic model,
- 4.3 Scattering networks,
- 4.4 Group Formalism,
- 4.5 Supervised Learning: classification,
- 4.6 Properties of CNN representations: invertibility, stability, invariance,
- 4.7 covariance/invariance: capsules and related models,
- 4.8 Other tasks: localization, regression,

- 4.9 Embeddings, inverse problems,
- 4.10 Extensions to non-Euclidean domains,

**Unit 5: Recurrent Neural Networks**

- 5.1 Building recurrent NN ,
- 5.2 Long Short-Term Memory,
- 5.3 Time Series Forecasting,

**Unit 6 : Deep Unsupervised Learning**

- 6.1 Autoencoders, standard, denoising, contractive, etc,
- 6.2 Variational Autoencoders
- 6.3 Adversarial Generative Networks
- 6.4 Maximum Entropy Distributions

**Text Books/ Reference Books:**

8. Bengio, Yoshua ,2009, Learning deep architectures for AI " Foundations and trends in Machine Learning.
9. Ian Goodfellow, Yoshua Bengio, Aaron Courville, Francis Bach, 2017, Deep Learning :Adaptive Computation and Machine Learning series

**Software required/Weblinks:**

- <https://nptel.ac.in/courses/106/105/106105215/>
- <https://github.com/joanbruna/stat212b>

**Instructions for paper setting:** Seven questions are to be set in total. First question will be conceptual covering entire syllabus and will be compulsory to attempt. Three questions will be set from each Part A and Part B (one from each unit) Student needs to attempt two questions out of three from each part. Each question will be of 20 marks.

**Distribution of Continuous Evaluation:**

Sessional- I	30%
Sessional- II	30%
Assignment/Tutorial	20%
Class Work/ Performance	10%
Attendance	10%

**Evaluation Tools:**

- Assignment/Tutorials
- Sessional tests
- Surprise questions during lectures/Class Performance
- End Semester Examination

**COURSE ARTICULATION MATRIX:**

**MANAV RACHNA INTERNATIONAL INSTITUTE OF RESEARCH AND STUDIES**  
(Deemed to be University under section 3 of the UGC Act 1956)  
**NAAC 'A' Grade University**

**BCS-DS-829: Advanced Data Warehouse and Data Mining**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Data Warehouse (BCS-DS-531) and Data Mining (BCS-DS-632)**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-829.1. Design a data mart or data warehouse for any organization.
- BCS-DS-829.2. Develop skills to write queries using DMQL.
- BCS-DS-829.3. Extract knowledge using data mining techniques.
- BCS-DS-829.4. Adapt to new data mining tools.
- BCS-DS-829.5. Explore recent trends in data mining such as web mining, spatial-temporal mining.
- BCS-DS-829.6. Understand where data mining can be applied.

**PART- A**

**Unit-1: Introduction**

- 1.1 Introduction : Fundamentals of data mining
- 1.2 Data Mining Functionalities
- 1.3 Major issues in Data Mining
- 1.4 Data Preprocessing: Needs Preprocessing the Data, Data Cleaning, Data Integration and Transformation, Data Reduction
- 1.5 Data Warehouse and OLAP Technology for Data Mining Data Warehouse
- 1.6 Multi-dimensional Data Model
- 1.7 Data Warehouse Architecture
- 1.8 Data Warehouse Implementation.

**Unit-2: Data mining**

- 2.1 Data Mining Primitives, Languages
- 2.2 System Architectures : Data Mining Primitives
- 2.3 Data Mining Query Languages, Designing Graphical User Interfaces Based on a Data Mining Query Language
- 2.4 Architectures of Data Mining Systems.
- 2.5 Concepts Description : Characterization and Comparison
- 2.6 Data Generalization and Summarization-Based Characterization
- 2.7 Analytical Characterization: Analysis of Attribute Relevance
- 2.8 Mining Class Comparisons: Discriminating between Different Classes

**Unit-3: Association rule mining**

- 3.1. Mining Association Rules in Large Databases :Association Rule Mining
- 3.2. Mining Single-Dimensional Boolean Association Rules from Transactional Databases
- 3.3. Mining Multilevel Association Rules from Transaction Databases
- 3.4. Mining Multidimensional Association Rules from Relational Databases
- 3.5. Data Warehouses Classification and Prediction : Issues Regarding

**PART-B**

**Unit-4: Data mining techniques**

- 4.1 Classification and Prediction
- 4.2 Classification by Decision Tree Induction
- 4.3 Bayesian Classification
- 4.4 Classification by Backpropagation
- 4.5 Other Classification Methods, Prediction
- 4.6 Classifier Accuracy.

### Unit-5: Clustering

- 5.1 Cluster Analysis Introduction
- 5.2 Types of Data in Cluster Analysis
- 5.3 A Categorization of Major Clustering Methods
- 5.4 Partitioning Methods
- 5.5 Density-Based Methods
- 5.6 Grid-Based Methods
- 5.7 Model-Based Clustering Method
- 5.8 Outlier Analysis.

### Unit-6: Mining complex types

- 6.1. Mining Complex Types of Data
- 6.2. Multidimensional Analysis
- 6.3. Descriptive Mining of Complex, Data Objects
- 6.4. Mining Spatial Databases
- 6.5. Mining Multimedia Databases
- 6.6. Mining Time-Series
- 6.7. Sequence Data
- 6.8. Mining Text Databases
- 6.9. Mining the World Wide Web.

**BCS-DS-830: Grid Computing**

Periods/week Credits  
L :3 T: 0 3.0  
Duration of Exam: 3 Hrs

Max. Marks : 200  
Continuous Evaluation : 100  
End Sem Examination : 100

**Pre-Requisite: Basic Knowledge of computers**  
**Course Type: Program Electives**

**Course Outcomes:** Students will be able to-

- BCS-DS-830.1. Evaluate enabling technologies such as high-speed links and storage area networks for building computer grids.
- BCS-DS-830.2. Apply grid computing and clustering middleware, such as Parallel Virtual Machine (PVM), Message Passing Interface (MPI), HPC Portals, and Peer-to-Peer networks for implementing virtual super computing resources.
- BCS-DS-830.3. Design a grid computing application in one of the key application areas.
- BCS-DS-830.4. Interpret a grid computing environment.
- BCS-DS-830.5. Develop communications skills and accept the code of professional conduct and practice through short presentations and group work.
- BCS-DS-830.6. Manage Resource scheduling & load balancing

**PART- A**

**Unit-1: Introduction to Grid Computing**

- 1.1. Introduction to Grid Computing
- 1.2. Benefits of Grid Computing
- 1.3. Virtual organization
- 1.4. Grid Application Areas
- 1.5. Introduction to semantic Grids
- 1.6. Grid Architecture & its relationship to other distributed technologies

**Unit-2: Concepts And Architecture**

- 2.1 Introduction – Characterization of grid, Grid related standards bodies, Architecture
- 2.2 Concepts of Parallel and Distributed Computing
- 2.3 Grid Computing - Anatomy of the grid – Introduction, Emergence of virtual organizations
- 2.4 Anatomy of the grid – Nature of grid architecture, Grid architecture description
- 2.5 Review of Web Services – SOAP, WSDL, UDDI, WS-Inspection and web services implementation
- 2.6 OGSA – DAI, WSRF

**Unit-3: Data Management & Grid Portals**

- 3.1. Data Management - Categories and Origins of Structured Data
- 3.2. Data Management - Challenges
- 3.3. Data Management - Architectural Approaches
- 3.4. Data Management - Collective Data Management Services
- 3.5. Data Management - Federation Services
- 3.6. Grid Portals – Introduction
- 3.7. Grid Portals - First & Second-Generation Grid Portals

**PART –B**

**Unit-4: Grid Security**

- 4.1 Grid Security – Introduction, A Brief Security Primer and Cryptography Array based implementation of graphs:
- 4.2 Grid Security - PKI-X509 Certificates
- 4.3 Grid Security – Grid Security Infrastructure (GSI), Authorization modes
- 4.4 Grid Security - Certificates

**Unit-5: Grid Scheduling & Resource Management**

- 5.1. Grid Scheduling and Resource Management - Introduction, Scheduling Paradigms
- 5.2. Grid Scheduling and Resource Management - Working principles of Scheduling.
- 5.3. Grid Scheduling and Resource Management - Condor – Architecture, Daemons, Job life cycle, Security issue and job management
- 5.4. A Review of Condor, SGE, PBS and LSF
- 5.5. Grid Scheduling with QoS - Nimrod/G, Rescheduling, Scheduling with heuristics

**Unit-6: Grid Middleware**

- 6.1. List of globally available Middlewares
- 6.2. Case Studies – Globus Toolkit – GT4 Software architecture model
- 6.3. Hash Globus Toolkit – GT4 Software architecture model - Load balancing
- 6.4. Globus GT4 Toolkit : Programming Model
- 6.5. Globus GT3 Toolkit : Implementation
- 6.6. Globus GT4 Toolkit : High-level services
